# INTRODUCTION:

Welcome to the DC Healthy Schools Act (HSA) Booklist:

## About the Healthy Schools Act:

---

In May of 2010, the Council of the District of Columbia passed the [Healthy Schools Act](#) of 2010. This comprehensive legislation ensures that schools are a healthy place for all students. The HSA has provisions addressing healthy school meals, farm to school, school gardens, physical activity, physical/health education, environmental education, and nutrition education.

## About the Resource:

---

The DC HSA Booklist has been adapted from the [Updated Michigan Team Nutrition Booklist](#) developed by the Michigan State University Extension with funding from [Team Nutrition](#). This booklist contains annotations for over 400 books about food and nutrition, food cultures and customs, gardens and farms, physical education and activity, the environment, and healthy habits for children in grades K-5. Many of the books on this list are also appropriate for children that are older or younger; it's up to you to decide, teachers and educators know their students best!

If you're reading this introduction, it is a safe bet that you feel strongly about childhood health and wellness. Teaching children to read, how to choose, cook and eat healthy foods, how to understand the food system and where foods comes from, how to have fun being physically active, and how to take care of the environment are very important jobs. Thank you for your commitment!

Health educators and other classroom teachers can use the DC HSA Booklist to locate and learn about books with positive food, physical activity, gardening/farming, nutrition, and environmental messages that will help them ...

- Expand on and teach to the health and physical education standards of the DC Office of the State Superintendent of Education and the Common Core State Standards, as well as the Next Generation Science Standards;
- Create enthusiasm for learning about and tasting new foods;
- Explain and describe where food comes from and how food grows;
- Teach children about food, food customs, and physical habits of others;
- Motivate children to be physically active and to enjoy physical activity;
- Nurture healthy habits; and
- Help children develop and improve their reading skills.

## Who is this booklist for?

---

This booklist is for classroom teachers, physical and health educators, school health coordinators, dietitians, nutritionists, school nurses, librarians, parents, foodservice staff members, or anyone interested in reading, learning about health and wellness, and teaching children healthy habits.

## Why link nutrition, health and wellness, physical activity, and the environment with reading?

---

There is a natural link between food and nutrition, physical activity, the environment, and reading. Children are particularly interested in stories that describe or depict things that are connected to their own everyday lives such as food, eating, gardening, grocery shopping, cooking, being active with friends, recycling, and composting. Reading books that focus on preparing and eating healthy foods, buying local produce, setting up a backyard or school garden, or being physically active can motivate children to adopt positive food and physical activity behaviors and reduce their carbon footprint for a lifetime, helping to pave the way for student success in the classroom and in the world!

## How were the books chosen for this list?

---

Each book on this list has been reviewed according to the criteria below, to ensure that it contains accurate nutrition content and positive food, environmental, and physical activity messages:

1. Books about food, nutrition, health, healthy eating, gardening, the environment, and physical activity were selected for review.
2. Books were read by the reviewers and once out loud to children.
3. Books were reviewed to see if they met specified criteria using the following checklist. It was required that that each book met all of the following criteria:
  - Appropriate for children in grades K-5.
  - Promotes or supports one or more of the Healthy Schools Act, 2010 provisions.
  - Contains no negative messages or illustrations about any one food or group of foods. If the phrase “junk food” or “bad food” is mentioned at all, minimal reference is made to “junk food” or “bad food.” Book retains the overall theme: All Foods Can Fit.
  - Contains no negative messages or illustrations about body size or body image.
  - Contains no negative messages, illustrations, or stereotypes about other cultures or ethnicities.
  - Contains only positive messages about physical activity.

## How is the DC Healthy Schools Act Booklist organized?

There are two different ways to search for a book using the Healthy Schools Act Booklist: “by Theme” and “by Title.”

The first section, “Books by Theme,” enables you to search by books that are associated with a specific theme, e.g. cooking, food and nutrition, healthy habits, and more. Many books are listed under more than one theme. There are 9 different themes:

Cooking

Environment

Farm to School

Food and Nutrition

Food Cultures and Customs

Fruits and Vegetables

Gardening

Healthy Habits

Physical Education and Physical Activity

The second section, “Books by Title,” is organized alphabetically and contains short annotations for each book. In addition to the annotation this section also contains the following information for each entry:

• Author

• F (fiction) and N (non-fiction)

• Suggested grade level

### **Why are some books missing from the list?**

Reviewing books for the DC Healthy Schools Act Booklist is an on-going process. A book might be missing from our list because it is one we have not reviewed yet, or it may have been excluded because it did not meet our criteria. If you know of a book that you think should be on our list, please send an e-mail to [osse.healthyschoolsact@dc.gov](mailto:osse.healthyschoolsact@dc.gov).

### **Where can I download this booklist?**

You can download the Healthy Schools Act Booklist, at the Healthy School Act Initiatives Team website: <http://osse.dc.gov/hsabooklist>.

**There has never been a better time to link nutrition, physical education and activity, schools gardens, health and environmental education, and healthy habits with reading.**

Teaching children to read and to eat healthy is a big job, but an extremely important one. By reading the books on this list to or with school-age children you can help them develop a love for reading, beginning reading skills, and important nutrition and physical activity habits and attitudes that will stay with them throughout their lifetime.

Wilma Unlimited: How Wilma Rudolph Became the World's Fastest Woman	Krull, Kathleen	Wilma Rudolph, the first American woman to win three gold medals at a single Olympics, was a sickly child who had polio that paralyzed her left leg and forced her to wear a heavy steel brace. The twentieth child in a close-knit African-American family, Wilma learned to walk using exercise, determination, and faith. Wilma starred in high school basketball and earned a track-and-field scholarship to college. This inspiring book describes how she competed and won in the Olympics at a time when many thought that running was a sport for men, not women.	N	K-2
Yoko	Wells, Rosemary	The children in Mrs. Jenkins' classroom bring different foods to school in their lunches, but they still make fun of Yoko's lunch. Even when they have an international food day, and children bring enchiladas, Caribbean coconut crisps, Nigerian nut soup, Brazil nuts, Irish stew, potato knishes, mango smoothies, spaghetti, and Boston franks and beans, no one will try Yoko's sushi. Then Timothy, still hungry, tries a bite. Much to his surprise, he likes it! This delightful book provides an excellent springboard for talking about dishes from ethnic backgrounds and trying new food.	F	K-2
You Are a Lion! And Other Fun Yoga Poses	Yoo, Taeun	Get ready to bend and stretch and roar! This bright picture book introduces yoga to children in a fun and age appropriate way.	F	K-5
Yummy Rhymes	Mother Goose	This small picture book is a collection of 11 Mother Goose rhymes with food themes. Each poem is accompanied by a lively illustration.	F	K-2
Yummy Riddles	Helmer, Marilyn	These silly riddles about food are sure to please the youngsters in your classroom and they will "groan" when the answer is revealed. Written in a familiar question and answer format, the riddles rely upon puns and word play and are accompanied by cartoon-style illustrations that help convey the humor.	F	K-2
Zieglers and Their Apple Orchard, The	Flanagan, Alice K.	This book features a couple in Illinois, their large apple orchard and small store. The orchard has 1,500 trees and requires a lot of work to produce a good crop. Large, colored photos and simple text provide an overview of the kinds of work involved in growing, harvesting, and selling apples and apple products.	N	K-2
