| **Unit 1**  
**Introduction and Skills**  
*Block: 11 days  
Traditional: 22 days*  
| Students investigate the division of the world into regions and continents and begin to ask geographic questions to analyze the changing perspectives represented by maps. They access a variety of sources (texts, maps, and other visuals) to discover the value of different types of sources.  
| 6.1.7: Locate and define various large regions in the Eastern and Western hemispheres, and divide those regions into smaller regions based on race, language, nationality, or religion.  
| 6.1.8: Ask geographic questions and obtain answers from a variety of sources, such as books, atlases, and other written materials; statistical source material; fieldwork and interviews; remote sensing; word processing; and GIS. Reach conclusions and give oral, written, graphic, and cartographic expression to conclusions.  
| 6.1.9: Give examples of how maps can be used to convey a point of view, so that critical analysis of map sources is essential.  
| 6.1.10: Explain that people develop their own mental maps or personal perceptions of places in the world, that their experiences and culture influence their perceptions, and that these perceptions tend to influence their decision-making.  
| 6.2.1: Name and locate the world’s continents, major bodies of water, major mountain ranges, major river systems, major countries, and major cities.  
| 6.2.2: Give examples and analyze ways in which people’s changing views of places and regions reflect cultural change.  
| 6.2.3: Explain that the concept of “region” has been devised by people as a way of categorizing, interpreting, and ordering complex information about Earth.  
| 6.1.1: Demonstrate that, in attempting to represent the round Earth on flat paper, all maps distort.  
| 6.1.2: Explain that maps contain spatial elements of point, line, area, and volume.  
| 6.1.3: Locate cardinal directions, poles, equator, hemispheres, continents, oceans, major mountain ranges, and other major geographical features of the Eastern and Western hemispheres.  
| 6.1.5: Explain how latitude affects climates of continents.  
| 6.1.6: Explain the relationship between lines of longitude and time zones.  
| 6.1.7: Explain that maps contain spatial elements of point, line, area, and volume.  
| 6.1.8: Ask geographic questions and obtain answers from a variety of sources, such as books, atlases, and other written materials; statistical source material; fieldwork and interviews; remote sensing; word processing; and GIS. Reach conclusions and give oral, written, graphic, and cartographic expression to conclusions.

| 6.2.3: Explain that the concept of “region” has been devised by people as a way of categorizing, interpreting, and ordering complex information about Earth.  
| GS.1: Students explain Earth’s grid system and are able to locate places using degrees of latitude and longitude.  
| GS.2: Students use a variety of maps and documents to identify physical and cultural features of neighborhoods, cities, states, and countries. Students interpret historical maps and charts.  
| GS.7: Students assess how people’s changing perceptions of geographic features have led to changes in human societies. They study current events to describe how people’s experiences of diverse cultures and places influences their perceptions and viewpoints.  
| RH.6-8.1: Cite specific textual evidence to support analysis of primary and secondary sources.  
| RH.6-8.2: Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.  
| RH.6-8.4: Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.  
| RH.6-8.10: By the end of grade 8, read and comprehend history/social studies texts in the grades 6–8 text complexity band independently and proficiently.  
| WHST.6-8.8a: Gather relevant information from multiple print and digital sources.  
| WHST.6-8.8c: Assess the credibility and accuracy of each source.  
| WHST.6-8.5a: With some guidance and support from peers and adults, develop and strengthen writing as needed by planning.

### Unit Information

**Unit 2**

**The Americas**

*Block: 16 days  
Traditional: 31 days  
(End of 1st Advisory 11/2)*

Students engage in regional studies in Units 2-7, beginning with the Americas to build on U.S. History from grades 4 and 5. They analyze the reciprocal relationship between the environment, climate, and human societies, while tracing the impact of geography on religion, culture, and economic systems in North and South America. Students read maps and complex texts, summarizing, citing evidence, and engaging in explicit vocabulary instruction.

### DC Content Power Standards

6.3.1: Explain key migration patterns and the interrelationships among migration, settlement, population distribution patterns, landforms, and climates (e.g., East Indian-Polynesian).

6.3.5: Map the distribution patterns of the world’s major religions, and identify architectural features associated with each.

6.3.8: Identify the cultural contributions of various ethnic groups in selected world regions and countries, including the United States.

6.4.5: Map the worldwide occurrence of the three major economic systems: traditional, command, and market. Describe the characteristics of each and identify influences leading to potential change.

### DC Content Supporting Standards

6.1.4: Locate major countries of the Eastern and Western hemispheres and principal bodies of water, regions, and mountains.

6.2.4: Give examples of critical issues that may be region-specific and others that cross regional boundaries within the United States.

6.3.7: Map the distribution pattern of the world’s major languages, and explain the concept of a lingua franca (a widely used second language; a language of trade and communication).

6.3.8: Identify the cultural contributions of various ethnic groups in selected world regions and countries, including the United States.

6.4.6: Explain the meaning of the word infrastructure, and analyze its relationship to a country’s level of development.

6.4.8: Summarize how cultural norms in a region influence different economic activities of men and women, including literacy, occupations, clothing, and property rights.

6.4.9: Identify patterns of economic activity in terms of primary (growing or extracting), secondary (manufacturing), and tertiary (distributing and services) activities.

### DC Historical and Social Studies Skills Standards

GS.3: Students create maps that show the growth and decline of empires.

GS.4: Students categorize characteristics of places in terms of whether they are physical (natural) or cultural (human). Know and apply the subcategories of physical and cultural characteristics when describing any given place.

GS.5: Students explain the historical migration of people, expansion and disintegration of empires, and the growth of economic systems. Identify spatial patterns in the movement of people, goods, and ideas throughout history.

### Common Core Reading Standards for Social Studies

RH.6-8.1: Cite specific textual evidence to support analysis of primary and secondary sources.

RH.6-8.2: Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.

RH.6-8.4: Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.

RH.6-8.10: By the end of grade 8, read and comprehend history/social studies texts in the grades 6–8 text complexity band independently and proficiently.
### Unit Information

**Unit 3**  
**Middle East and North Africa**

*Block: 8 days*  
*Traditional: 16 days*

Students continue regional study by analyzing the relationship between the environment, climate, and human societies in the Middle East and North Africa. They examine how religion is reflected in culture with particular emphasis on Judaism, Christianity, and Islam. Students consider primary and secondary sources, citing evidence of differences in perspective, and using evidence in written responses.
