		Vine Ripe Tomato		Blueberries
18	19	20	21	22
		Bosc Pear		Red Pepper Strips
25	26	27	28	29
		Snow Peas		Clementine Oranges

FFVP Focus March: Vine Ripe Tomato

There are more than 4,000 varieties of tomatoes ranging in size, shape, and color. Botanically, the tomato is a fruit since it develops in the ovary of the flower and has seeds. However, in 1893, the U.S. Supreme Court declared it a vegetable. Lycopene is an antioxidant pigment found in tomatoes that gives it a reddish color. Eating lycopene rich foods, like tomatoes, may decrease the risk of certain cancers and heart disease and help to keep the immune system healthy. A ½ cup of sliced tomato is about one small tomato and contains lots of vitamins C, A and other nutrients.

All Vegetables are to be served with 1 low fat dressing packet
