| Related Service Provider Responsibility for Documenting Reasonable Efforts.....   | 50        |
| Related Service Providers are critical members of the eligibility process. Therefore, they are also important in documenting reasonable efforts as it relates to the eligibility process. Specifically for all Related Service Providers, the reasonable efforts would primarily be related to scheduling an evaluation appointment. Documentation includes communication with the parent regarding scheduling an evaluation appointment and communication from the parent indicating any barriers impacting timely action (e.g., only Fridays, only a few days within several weeks, death in the family, emergencies, hospitalizations, unexpected travel)..... | 50        |

# Introduction

## Capital Commitment

---

### DCPS Capital Commitment 2017-2022

In shaping DC Public Schools' five-year strategic plan for 2017-2022, [A Capital Commitment](#), we heard from more than 4,500 students, parents, educators, and community members. Their ideas and feedback will guide our work as we strive to become a district of both excellence and equity—a place where every family feels welcome and every child is given the opportunities and support, they need to thrive.

**VISION:** Every student feels loved, challenged, and prepared to positively influence society and thrive in life.

**MISSION:** Ensure that every school guarantees students reach their full potential through rigorous and joyful learning experiences provided in a nurturing environment.

#### OUR VALUES:

- **STUDENTS FIRST:** We recognize students as whole children and put their needs first in everything we do.
- **COURAGE:** We have the audacity to learn from our successes and failures, to try new things, and to lead the nation as a proof point of PK-12 success.
- **EQUITY:** We work proactively to eliminate opportunity gaps by interrupting institutional bias and investing in effective strategies to ensure every student succeeds.
- **EXCELLENCE:** We work with integrity and hold ourselves accountable for exemplary outcomes, service, and interactions.
- **TEAMWORK:** We recognize that our greatest asset is our collective vision and ability to work collaboratively and authentically.
- **JOY:** We enjoy our collective work and will enthusiastically celebrate our success and each other.

### Office of Teaching and Learning

The Office of Teaching and Learning provides educators with curricular resources, academic programs, and aligned professional development to ensure rigorous and joyful learning experiences for every student.

### Division of Specialized Instruction

Our vision focuses on building the capacity of our schools to ensure that they have the systems, supports, tools, and well-trained staff to address the needs of our students with disabilities, allowing them to access education in their neighborhood schools alongside their typically developing peers. DSI's transition to OTL will increase collaboration and alignment with our partners within DCPS and throughout the District to develop clear policies and processes for delivering high-quality instruction and supports to improve the academic achievement of our students with disabilities.

**DSI's core beliefs are:**

- We believe that all children, regardless of background or circumstance, can achieve at the highest levels.
- We believe that achievement is a function of effort, not innate ability.
- We believe that we have the power and the responsibility to close the achievement gap.
- We believe that our schools must be caring and supportive environments.
- We believe that it is critical to engage our students' families and communities as valued partners.
- We believe that our decisions at all levels must be guided by data.

**DSI STRATEGIC GOALS**

In the spring of 2022, the District of Columbia Public Schools (DCPS) Division of Specialized Instruction (DSI) re-initiated the journey of a strategic planning process—a process that ensures we are making the best decisions for our students. DSI is committed to ensuring students receiving special education services and supports have a rigorous and responsive special education program.

Foremost to our strategic plan is our vision: to be the district of choice for students with disabilities. We will achieve this vision by focusing on building the capacity of our schools to ensure that they have the systems, supports, tools, and well-trained staff to address the needs of our students with disabilities, allowing them to access education in their neighborhood schools alongside their typically developing peers. We must also collaborate with our partners within DCPS and throughout the District to develop clear policies and processes for delivering high-quality instruction and supports to improve the academic achievement of our students with disabilities.

*At the time of this publication, DSI's Strategic goals are still in draft form and going through the approval process. Any updates to the DSI Strategic plan will be shared with providers via email.*

**Special Education in DCPS**

DCPS is committed to ensuring that our schools provide a world-class education that prepares ALL of our students, regardless of background or circumstance, for success in college, career, and life. We believe that students who receive special education services are integral to this commitment. As such, our strategic goals for special education are designed to dramatically improve academic outcomes for students with IEP's. We believe we can achieve this vision by providing high-quality, common core aligned instruction in inclusive settings, meaningfully involving families and keeping students focused on their goals.

**Related Services Team Vision**

Assistive Technology and Related Services is committed to increasing the independence of every student in our schools by giving them the strategies, skills and support they need to be successful in the classroom and their community. We collaborate with parents, students, schools and other stakeholders to provide services that are timely and tailored to the unique needs of each student and are provided in conjunction with classroom instruction.

The related services team has THREE goals to achieve over the next three years:

1. 90% of providers will achieve a score of 3.0 on assessment quality section of IMPACT in three (3) years

2. 100% of RSPs are trained in implementing evidence-based interventions (MTSS, inclusionary practices, EBPs, consultation)

## Purpose and Structure of Guidebook

The purpose of this guidebook is to:

- Assist occupational therapy and physical therapy service providers as they support the educational goals of eligible students with disabilities in the District of Columbia Public Schools (DCPS).
- Ensure that all occupational therapists and physical therapists (OTs and PTs) in the District of Columbia Public Schools (DCPS) operate within the same premises, utilize the same procedures and guidelines, and are uniform in presentation.

This guidebook is an internal document written specifically for providers of occupational therapy and physical therapy services. The procedures and best practices in this guidebook are designed to provide optimal school-based interventions as part of a Free Appropriate Public Education (FAPE) in the Least Restrictive Environment (LRE), following IDEA 2004 while simultaneously maximizing equal access to occupational therapists and physical therapists for all District of Columbia Public Schools students.

DCPS regulates the practice of occupational therapy and physical therapy services to students within the public school setting, while the Department of Health, Board of Occupational Therapy and Board of Physical Therapy regulates the overall practice of occupational therapists and physical therapists, respectively. In this guidebook, providers will find guidelines, procedures, suggestions, and ideas that should be used daily to guide them in assuring a high level of professional services for all students and invested stakeholders.

This guidebook replaces any guidebook introduced previously. Providers should expect to receive supplemental policy and procedure documents and/or training throughout the school year.

## Contact Information for the Occupational and Physical Therapy Department

### **Division of Specialized Instruction**

1200 First Street, NE  
8<sup>th</sup> Floor  
Washington, DC 20002

### **Occupational and Physical Therapy Department Office**

Emery Elementary  
1720 1<sup>st</sup> NE, DC, 20002  
Room 112

# DCPS Employee Policies

## Time and Attendance

---

### Tour of Duty

#### ET-11 (12-month CSO employees)

Related Service Providers are to report to their schools for an eight and one-half (8.5) workday inclusive of a duty-free lunch period. Staff members should arrive at their assigned schools no later than the time of arrival expected for all school staff. An extended tour of duty may be inclusive of central office assignments, summer school assessments, compensatory education services, extended school year services, non-public assessment completions, HOD/SA specifications and extra duty cases which extend beyond the regular school day hours.

**Arrival Time – 8:00am**

**Departure Time – 4:30pm**

#### ET-15\* (10-month and 12-month WTU employees)

Related Service Providers are to report to schools for a seven and one-half (7.5) workday inclusive of a duty-free lunch period. Staff members should arrive at their assigned schools no later than the time of arrival expected for all school staff. An extended tour of duty may be inclusive of extra duty team assignments, which extend beyond the regular school day.

**Arrival Time – 8:00am**

**Departure Time – 3:30pm**

\*As stated in the WTU contract

### Signing In and Out

- Immediately upon their arrival, each service provider shall record in the school business office of their immediate supervisor the time of their arrival, and shall report to their classroom or place of duty at least thirty-five (35) minutes before the start of the official school day for students.
- Itinerant service providers shall immediately upon their arrival at each school assigned, record in the school business office their time of arrival.
- Service providers shall record in the school business office or in the office of their immediate supervisor the time of their departure at the end of the school day.
- Service providers shall not be required to use time clocks.

### Time and Attendance Procedures – Revised (January 31, 2008)

A memorandum from the Deputy Chancellor for Special Education stated that:

“It is vital that time and attendance is accurately reported by all personnel. The erroneous reporting of time is against DCPS policy and grounds for disciplinary action against the employee, their supervisor or their timekeeper.

“Effective immediately, all staff must sign-in and sign-out on a **daily basis**. If an employee **does not** submit leave slips, sign-in/sign-out sheets or any other required documentation to verify time and

attendance, then time and attendance **WILL NOT** be entered into PeopleSoft for that employee with **NO EXCEPTIONS.**

**School-based and Itinerant Division of Specialized Instruction (DSI) Staff:**

- All sign-in/sign-out sheets must be signed by you on a daily basis
- All requests for leave must be approved by your Program Manager and submitted via PeopleSoft
  - a. All requests for leave for over 4 days must be approved by your Program Manager
  - b. When an employee is out sick for longer than 3 days, their program manager may ask for a doctor's note
- All annual leave must be approved prior to the leave period
- All administrative leave requests for seminars, conferences and official travel must be accompanied by appropriate documentation (registration, receipt, etc.)
- Itinerant staff should not plan to request leave during the two weeks prior to the start of the new school year. Emergencies will require APPROVAL by the Deputy Chief of Specialized Instruction
- All compensatory time or over-time must be approved by the Chief of Specialized Instruction prior to the work being performed and provide a copy to your supervisor.
- Itinerant staff timesheets and leave requests must be submitted via PeopleSoft.
- If you have any questions or require additional clarification, please contact your Program Manager

## Entering Time in PeopleSoft

### *How do I enter my own time?*

1. Log into the PeopleSoft online system.
    - Inside DC Network: <https://pshcm.dc.gov>
    - Outside of DC Network: <https://ess.dc.gov>
    - Login: Your DCPS email address without @k12.dc.gov (generally firstname.lastname)
    - Use the "Forgot Your Password?" link if you do not know your password.
  2. Click on "Self Service" in the blue box on the left side of the page.
  3. Click on "Report Time" under the Time Reporting heading.
  4. Click on "Timesheet" under the Report Time heading.
  5. Enter the appropriate number of hours for each day of the current week.
    - You may need to change the Date field if you are entering late.
    - After changing the date, click "Refresh" to enter the time for a previous time period.
  6. Select a Time Reporting Code from the drop-down menu. The most frequently used codes are:
    - Regular Pay—REG
    - Annual Leave Taken—ALT
    - Sick Leave Taken—SLT
    - Holiday Pay—HOL
    - Administrative Closing Pay—ACP
    - **Situational Telework- STTW (Only to be used as directed by DCHR)**
- \* While these are the most frequently used codes, it is important that providers pay attention to any correspondence from Time and Labor regarding time codes. There are circumstances where an alternative code may be utilized (i.e., Spring Break, Winter Break, Situational Telework, etc.).
7. Click the "+" at the far right of the line if you will be entering more than one type of time.
    - Ex: 2 lines would be needed if you worked Monday-Thursday, but you were sick Friday.

- Ex: 3 lines would be needed if the above were true except that Monday was a holiday.
8. Click “Submit.”
    - The time submitted can be changed (prior to the end of the pay period) if needed.
    - Saved time cannot be approved. Please do not use the “Save for Later” button.
    - Only enter time for the current week, except prior to winter and spring breaks.

## Time-Keeping FAQs

### ***When do I need to enter my time?***

All ET-11 and ET-15 Occupational and Physical therapists are required to enter time into People Soft Weekly (Thursday). Each OT and PT must submit all supporting documents via email to their assigned Program Manager prior to taking leave.

### ***How do I submit a leave request in PeopleSoft?***

1. Log into the PeopleSoft online system.
2. Click on “Self Service” in the blue box on the left side of the page.
3. Click on the “Time Reporting” heading.
4. Click on “Absence Request” under the Report Time heading.
5. Populate all of the fields on the page (leave may only be taken in 1-hour increments).
6. Click “Submit.” Do not use the “Save for Later” button.

*\*Please check your leave balances prior to submitting requests for leave. Leave balance information can be obtained by logging into PeopleSoft.*

- In DCPS network: <http://pshcm.dc.gov>
- Outside DCPS network: <https://ess.dc.gov>

You will receive an email once your leave is approved. Follow up with your manager directly if you do not receive this confirmation at least 48 hours prior to the start of your leave.

### ***What if I need help?***

Click [here](#) to view online tutorials on how to enter time and absence requests. For more information, refer to the Human Resources page of the [DCPS website](#) or call the PeopleSoft Helpdesk (202.727.8700).

- [Payroll](#): 202-442-5300
- Timesheet questions: [dcps.timeandlabor@k12.dc.gov](mailto:dcps.timeandlabor@k12.dc.gov)
- [Employee Benefits](#): [dcps.benefits@k12.dc.gov](mailto:dcps.benefits@k12.dc.gov)

## Professional Licensing Policies

---

All occupational and physical therapists serving students in DCPS are required to obtain and maintain professional licensure through the District of Columbia Department of Health at all times while employed with DCPS. Occupational and physical therapists within the District of Columbia have specific requirements related to the maintenance and renewal of licensure. OTs and PTs can obtain their discipline-specific licensure requirements here: [DOH Licensing Boards](#).

### Absence/ Leave Policies

#### Absence/ Leave Policies for ET-11

Refer to [Council for School Officers \(CSO\)](#) contract agreement for detailed information regarding the types of leave and policies available for officers.

#### Absence/ Leave Policies for ET-15

Refer to the [Washington Teachers Union Bargaining Agreement](#) for detailed information regarding the types of leave and policies available for members.

### Departmental Close-out Procedures for Providers Who are going on Extended/Maternity/Paternity Leave, Resigning, or Retiring

Below you will find a list of deliverables that are due to close-out your caseload prior to your transition and to assist with the continuity of services for your students upon your departure. These actions are required in order to leave DCPS and the Speech-Language department in “good-standing” and are part of your professional obligation (see Ethics section regarding abandonment). This is applicable to the following scenarios: 1) planned medical/family leave; 2.) maternity leave; 3.) retirement; and/or 4.) Resignation during the school year. Please review the information below and discuss it with your assigned PM prior to your leave/departure.

- Weekly documentation through the agreed upon date of leave must be submitted to SEDS by COB (3:30 PM).
- Service tracker notes for all students must be finalized by COB (3:30 PM) on the last date of leave for all services rendered during the month.
- Submission of the Missed Session form to capture services missed between the beginnings of school through the date of your leave/departure.
- Completion of information in SEDS for upcoming Analyzing Existing Data (AED), IEP meetings (Present Levels of Academic Achievement and Functional Performance (PLAAFP), Goals, Service

Duration/frequency) for students on your current caseload for up to four weeks post the date of your intended leave/departure.

- A letter must be sent home to the parents of the students that you service to notify them of your departure/upcoming leave.
- Return all assessment and intervention materials and laptop that were loaned during the time of your hire. Please make arrangements with your assigned PM regarding the delivery/drop-off of these materials (This only applies to providers who are resigning or retiring).
- Completion and uploading/faxing into SEDS the assessment reports for students (along with their information in the PLAAF, speech and language goals, and recommendation for service amount)
- Most current therapy schedule and caseload roster information
- Submit formal resignation via the [resignation application](#) or [retirement application](#).

## Inclement Weather Policy

*Inclement weather has the potential to impact our school schedule (delayed openings or school closings). As in the past, the decision made and announced will be one of the following:*

### Inclement Weather Options

- Option 1: All schools and district administrative offices are closed. Only essential personnel report to work.
- Option 2: Schools are closed. District administrative offices are open.
- Option 3: Schools open for students and teachers two hours late. District administrative offices open on time.
- Option 4: Schools and district administrative offices open two hours late.

### Notification Options:

When poor weather requires changing school schedules, DCPS works closely with radio, TV and other news outlets to notify the community. During these situations, it is important that related service providers monitor one of the stations listed below or check this page. Look for updates (i.e., delayed openings or complete closures) on the radio and TV stations below. DCPS aims to work with stations to post closings by approximately 5:30 am.

|                   |  |
|-------------------|--|
| <b>AM Radio</b>   | WMAL (630), WOL (1450), Radio America, Spanish (1540), WTOP (1500)   |
| <b>FM Radio</b>   | WAMU (88.5), WTOP (103.5), WHUR (96.3)   |
| <b>Television</b> | Channels 4, 5, 7, and 9 and Cable Channels 8, 16 and 28  |
| <b>Websites</b>   | <a href="http://www.dc.gov/closures">www.dc.gov/closures</a><br><a href="http://www.dcps.dc.gov">www.dcps.dc.gov</a><br><a href="#">DCPS Twitter</a> |
| <b>Telephone</b>  | (202) 442-5885 or dial 311 for DC's Citywide Call Center   |

## Observance of Religious Holidays

DCPS respects employees regardless of their religious affiliations. DCPS provides employees with religious accommodations if those accommodations do not cause an undue hardship for the agency. Examples of reasonable religious accommodation include, but are not limited to:

- Leave for religious observances.
- Flexible scheduling for religious observances.
- Voluntary shift substitutions or swaps.
- Permission to dress in appropriate religious clothing or practice certain grooming techniques.
- Modifications to workplace policies or practices.

If a DCPS employed related service provider would like to receive religious accommodation, they should contact their discipline program manager. Consultation with the program manager will include determining the type of accommodation needed, developing a make-up plan if needed and sending correspondence to the school principal and local education agency representative designee.

For additional information on religious accommodations, please refer to the [DCPS August 2017 Employee Rights and Responsibilities Policy](#).

## Communications

---

### Email

Each service provider has a @k12.dc.gov email address. This is our primary means of communication. ***Messages should be checked daily and returned promptly (within 24 hours).*** Failure to receive notification of job-related information due to a lack of timely checking of one's email is not an acceptable excuse for non-compliance with work responsibilities. Providers are required to use their @k12.dc.gov email address – no other email address should be used.

Program Managers, Special Education Coordinators, Principals, teachers and parents often send email messages to related service providers. Please ensure the LEA RD has the correct email address to ensure proper communication.

Email communication is maintained by the District of Columbia's Office of the Chief of Technology Officer. The help desk number for email difficulties is (202) 442-5715.

If you have any difficulty or have questions in reference to using your @k12.dc.gov email, contact the Service Help Desk at:

- (202)-671-1566 / (202)-442-5715 (DCPS)
- (202)-741-8832 (Fax)
- email: [octohelps.support@dc.gov](mailto:octohelps.support@dc.gov)

### Sample Email Signatures

**Jane Smith, MOT, OTR/L**

T (202) 555-1111

F (202) 555-2222

### Out of the Office Messages

When the service provider is out of the office, the "Out of Office" reply option should be utilized. Your message should include a greeting, dates you will be out of the office, scheduled return date and contact information of your Program Manager during your scheduled absence.

Follow these steps to set up your out of the office message:

- Go to the DCPS web main page: <http://dcps.dc.gov/DCPS>
- Click on the "Employee Webmail Login" at the bottom of the page.

- Enter your username and password in the Outlook Web Access window, and click on “log on”
- Click on “Options” on the left side of the page. This will take it to the “Out of Office Assistant” section
- Select “I am currently out of the office”
- Customize the following message and add it into the box of the “Out of Office Assistant” section

*Thank you for your email. I am out of the office from [DAY, DATE] to [DAY, DATE] and unable to respond at this time. If you need immediate assistance, please contact (Name school level staff as alternate contact.)*

*I look forward to responding to your email within 24 hours of my return.*

*Thanks,*

*Your Name and Title*

*School Name*

*School Address*

*T: Your telephone number*

*F: Your fax number*

*Email: Your dc.gov email address*

- Click on “Save and Close”

## Mailbox and Route mail Service

Service providers are encouraged to check with school staff regarding correspondence.

A DCPS mail service is available for sending documents to DCPS work locations. Envelopes may be available at your school’s main office. An area for all outgoing route mail is designated at each school and work location. Provide the sender’s name and school address on the route mail envelope.

## Provider Management Application (FRONTLINE)

Frontline (formerly Accelify) is the provider management application where RSPs will be able to document MTSS/RTI interventions and 504 services for students on assigned caseload. As an RSP, you will have access to student level data in Frontline. Please refer to the DCPS Data System User Security Pledge in the Appendix. Please see the DSI RSP Frontline documentation requirements. Frontline can be accessed at the following link:

<https://dc.acceliplan.com/Login.aspx>

## DSI Related Services Provider SharePoint Site

The DSI Related Services Provider SharePoint Site is an online platform that houses a variety of resources specific to DSI Related Service Providers. This page contains templates, resources, and guidance documents to support RSPs in their daily work. This page is only accessible to DSI related service providers utilizing their DCPS email address.

### **Occupational Therapy and Physical Therapy SharePoint Page**

Within the DSI Related Service Provider SharePoint site is the [Occupational Therapy and Physical Therapy SharePoint Page](#) which houses information, forms/templates, therapy resources, as well as monthly announcements. Providers will receive notification of the updated monthly newsletter, once it has been posted to the SharePoint page. The monthly newsletter may include reminders of upcoming tasks and important dates or events within DSI and DCPS. Additional correspondence may also be sent via the program email address ([DCPS.OTPTtherapyprogram@k12.dc.gov](mailto:DCPS.OTPTtherapyprogram@k12.dc.gov)).

### **CANVAS**

Canvas is a DCPS platform that houses resources, as well as policies and procedures from teams across the network. RSPs can access Cornerstone Curriculum and Course Companions on Canvas.

### **Contractual Staff (Login Information)**

<https://dcps.instructure.com/courses/2025/pages/instructional-practice-impact>

**Username:** DCPS Contractor

**Password:** canvas22

## Equipment/IT Support

---

### Laptop Computer Support

Laptop computers are assigned to all DCPS centrally funded service providers for the purpose of scoring tests, writing reports, and maintaining progress notes in the Special Education Data System (SEDS). Laptops are the responsibility of each service provider and should be appropriately maintained and secured at all times.

For providers who are issued Macs, all repairs should be handled through your local Apple store. All computer technology issues should be directly referred to the DCPS IT Support department using one of the following options:

- Phone: 202-442-5715
- <https://itremote.dc.gov>
- <http://dcforms.dc.gov/webform/it-servus-request-form>

The DCPS IT support department will provide a ticket number for your technology request. Please retain a copy of this ticket number for your records. In the event your laptop or computer becomes inoperable, this information will be required from your manager and/or OTL.

### Technology Replacement Process

Providers should follow the steps listed below to request replacement of their technology/computer:

1. Providers are to contact OCTO to report the issue by submitting a ticket at [OCTOHelps Self Service System](#) or by calling **202-442-5715**.
2. OCTO will follow up directly with a service call. Once that service call has concluded, OCTO will provide a Remedy email and Remedy Ticket number. If OCTO determines the computer is inoperable, and needs to be replaced, the Remedy ticket must reflect the following information: "computer is 525 and needs replacement." The OCTO ticket must be closed by Remedy Force.
3. Providers should forward the Remedy email that contains the Remedy ticket number to their Program Manager.
4. The Program Manager will request the replacement technology/computer from Central Office.
5. When the replacement technology is available for pick up, providers will receive an email from the IT department with instructions for pick up at Central Office.

### Stolen Computer/ Laptop

In the event your laptop or computer is stolen, please inform your school security officer and the Metropolitan Police Department (MPDC). You are required to file a report with the MPDC. If you are a school based provider, please submit the police report to your school administration. For centrally funded staff, please submit the police report to your manager.

## Test Materials

---

### Assessment/Testing Materials

Assessment materials are assigned to each DCPS employed related service provider during their tenure. Other instruments may be shared between occupational and physical therapists and infrequently used tests are available on a temporary loan basis. It is important to return loaned items promptly since other providers may be waiting for them. Additionally, Occupational and Physical therapists are asked to inform their program manager of any problems found with these tests, such as missing or broken items.

Per contractual agreements between DCPS and vendors, the contract company provides the assessment and intervention materials to their staff.

### Sign-Out

Sign-out is required for all DCPS materials. Information will be cataloged, and the provider assumes all responsibility for the equipment. If the equipment is loaned out between providers, some written verification should be obtained that the materials were loaned and that the materials have been returned. If materials are stolen, it is the providers' responsibility to file and submit police report verification as well as a property accountability form and present it to the appropriate DSI Supervisor.

### Materials on Loans

Materials are on loan to you for DCPS work purposes only. Therefore, upon your resignation, your materials should be returned in good condition to your DSI Supervisor prior to your resignation date. Failure to return property will result in garnishing of wages. This includes laptops and other technology equipment provided by DCPS.

## Dress Code Requirements

---

It is the providers' responsibility to find out the dress code requirements for the schools he/she services, and to wear the appropriate attire. Providers must be in compliance with the dress code for the school. Cleanliness, professionalism, good taste and safety are the primary considerations. The following is a non-exhaustive list of expectations. Please follow your school regulations.

- All clothing should be professional, clean, neat, and not stained.
- Clothing should not contain any suggestive or offensive pictures or messages.
- Appropriate leg and foot covering, as deemed by the school, will be worn. Closed toe, low or no-heeled shoes should be worn for your personal safety.
- Clothing should fit appropriately. Tops should be of opaque fabric (not see-through), not too low cut, tight or loose, and long enough to remain tucked in with movement (i.e., no bare midribs). Tops should allow for rising of hands above head without exposing skin. T-shirts that convey a casual appearance are not to be worn.
- Skirts or "skorts" may be worn but should be no shorter than 2" above the knee and have no slits above the knee.

## Additional Duties and Responsibilities

---

### The Random Moment in Time Study (RMTS)

The Random Moment in Time Study is a mandatory study required by the Federal Centers for Medicare and Medicaid Services (CMS) to evaluate how school-based staff spend their time providing special education services. These snapshots are required to support claims for Medicaid reimbursement of school-based health services, which ultimately generates revenue for DCPS for products and services for special education programs. As a related service provider your participation in this study is crucial to securing these funds; if the response rate drops below 85% for all DCPS providers the federal government will deem the study invalid and penalize our district and DCPS' ability to claim for reimbursement. The terms RMTS and RMS are used interchangeably.

- Moment Timeline
- Each notification is sent in a separate email and must be responded to individually
- Pre-notification 5 Business days before the moment
- Pre-notification 24 hours before the moment
- Notification 0-15 minutes before the moment
- If moment is not completed, reminders are sent 24 hours and 48 hours after the moment
- Moment expires 72 hours after the moment

If you have any questions about the Random Moment in Time Study, you can contact Jason Spencer (Analyst, Grant Administration) at [Jason.Spencer@k12.dc.gov](mailto:Jason.Spencer@k12.dc.gov).

### LEAVE NOTIFICATION PROCESS FOR PLANNED AND UNPLANNED LEAVE

#### DCPS Employees

- Per the current WTU CBA, OTs and PTs must notify their immediate supervisor (program manager) of absence.
- As a courtesy, to alleviate confusion at the school level, OTs and PTs may also notify:
  - principal, LEA Representative Designee, and DCPS Medicaid - [DCPS.Medicaid@k12.dc.gov](mailto:DCPS.Medicaid@k12.dc.gov)
- For planned leave, submit leave requests in PeopleSoft in advance per your bargaining agreement
- Set up your email Outlook out of office notification.

#### Contractors

- Email principal, LEA Representative Designee, DCPS program manager, vendor clinical lead and DCPS Medicaid - [DCPS.Medicaid@k12.dc.gov](mailto:DCPS.Medicaid@k12.dc.gov).
- Set up your email Outlook out of office notification.

### Performance Evaluations

Each Related Service Provider is evaluated twice per school year using IMPACT: The DCPS Effectiveness Assessment System for School-Based Personnel or IMPACT. The primary purpose of IMPACT is to help

the employee become more effective in their work. Our commitment to continuous learning applies not only to our students but to the employees as well. IMPACT supports the employees' growth by:

- **Clarifying Expectations** - IMPACT outlines clear performance expectations for all school-based employees. Over the past year, we have worked to ensure that the performance metrics and supporting rubrics are clearer and more aligned to your specific responsibilities.
- **Providing Feedback** - Quality feedback is a key element of the improvement process. Therefore, during each assessment cycle you will have a conference to discuss your strengths as well as your growth areas. You can also view written comments about your performance by logging into your IMPACT account on QuickBase.
- **Facilitating Collaboration** - By providing a common language to discuss performance, IMPACT helps support the collaborative process. This is essential, as we know that communication and teamwork create the foundation for student success.
- **Driving Professional Development** - The information provided by IMPACT helps DCPS make strategic decisions about how to use our resources to best support you. We can also use this information to differentiate our support programs by cluster, school, grade, job type, or any other category.
- **Retaining Great People** - Having highly effective teachers and staff members in our schools helps everyone improve. By mentoring and by serving as informal role models, these individuals provide a concrete picture of excellence that motivates and inspires us all. IMPACT helps retain these individuals by providing significant recognition for outstanding performance.

All related service providers in schools are in Group 12. There are three IMPACT components for the members of Group 12. Those components include:

1. Related Service Provider Standards (RSP)
2. Assessment Timeliness (AT)
3. Core Professionalism (CP)

Please refer to the DCPS Website to access additional information. You may also contact the IMPACT office at (202) 719-6553 or [Impact.DCPS@k12.dc.gov](mailto:Impact.DCPS@k12.dc.gov).

## NPI Requirement

As a result of the Affordable Care Act, the Centers for Medicare and Medicaid (CMS) issued a final rule<sup>1</sup> on April 12, 2012, requiring all providers of medical services to obtain a National Provider Identifier (NPI). The NPI acts as a unique provider identifier for Medicaid claims submitted to the Medicaid Agency. In order to conduct Medicaid claiming, all providers rendering services on behalf of DCPS must obtain an NPI. Refer to the document "DSI Provider NPI Requirement for New Employees" in the appendix.

---

<sup>1</sup> 42 CFR Parts 424 and 431

All providers rendering services on behalf of DCPS must obtain a National Provider Identifier (NPI). Individuals are eligible to receive one NPI regardless of the number of specialties practiced. Please follow the steps below. If you already have an NPI then please skip section 1 and complete section 2.

There are two ways to apply for an NPI: web-based and paper-based

1. Use the web based NPI application process at <https://nppes.cms.hhs.gov/NPPES/Welcome.do>
2. Click on the hyper link National Provider Identifier to apply for an NPI.
3. **Select Entity type 1**, health care providers who are individuals. Complete sections 2A, 3, 4A, and 5. Completion of the application takes approximately 20 minutes.
4. Obtain the NPI Application/Update form (CMS 10114).
5. Complete and mail application to the following address:  
NPI Enumerator  
P.O. Box 6059  
Fargo, ND 58108-6059

\*Once obtained, your NPI number should be turned in to your assigned program manager and entered into your SEDS EasyIEP profile.

# Ethical Responsibilities of the Occupational and Physical Therapist

## AOTA 2020 Occupational Therapy Code of Ethics

Occupational Therapists within DCPS are expected to adhere to the [AOTA Occupational Therapy Code of Ethics](https://research.aota.org/ajot/), updated in 2020. Below, you will find the ethical responsibilities of an occupational therapist including core values, principles, and standards of conduct, and how each section relates to school-based practice. Please visit <https://research.aota.org/ajot/> for more detailed information.

**Core Values** “provide a foundation to guide occupational therapy personnel in their interactions with others”.

| Core Value | Definition   | Application to School-Based Practice   |
|------------|--|--|
| Altruism   | Unselfish concern for the welfare of others  | Being responsive and understanding of student and family circumstances and needs   |
| Equality   | All persons have fundamental rights and the right to the same opportunities                      | All students deserve to receive services that are evidence-based best practices within their LRE   |
| Freedom    | Each person has a right to exercise autonomy   | All students have a right to participate in their education as independently as possible, no matter their disability   |
| Justice    | Provide OT for all persons in need and maintain goal-directed and objective relationships        | Provide OT services to all students in need within assigned school building(s). Service frequency and delivery recommendations are based off objective data and IEP goals. |
| Dignity    | Importance of valuing, promoting and preserving the inherent worth and uniqueness of each person | Ensure dignity is preserved with each student by respecting privacy, personal boundaries, and cultural differences   |
| Truth      | Be faithful to facts and reality   | Accurate and truthful documentation, assessment reports, and communication with team members, students, and families   |
| Prudence   | Ability to govern and discipline oneself through use of reason                                   | Be mindful of therapeutic use of self when interacting with students and colleagues, to promote a safe and healthy learning environment for students and staff             |

**Principles** “guide ethical decision making and inspire occupational therapy personnel to act in accordance with the highest ideals”.

| Principle      | Definition   | Application to School-Based Practice  |
|----------------|--|---|
| Beneficence    | Demonstrate a concern for the well-being and safety of individuals | Offering services to help students benefit from their curriculum; following health and safety protocols |
| Nonmaleficence | Refrain from actions that cause harm                               | Not participating in actions that would be harmful to students or be contraindicated based              |

|          |  |   |
|----------|--|---|
|          |  | on their disability/condition; report any suspected cases of abuse              |
| Autonomy | Respect the right to privacy, confidentiality and consent    | Following HIPPA/FERPA; obtaining parental consent for assessment and services   |
| Justice  | Promote equity, inclusion and objectivity                    | Providing inclusive and equitable services to students across schools and wards |
| Veracity | Providing comprehensive, accurate, and objective information | Taking accurate, objective data to make informed decisions                      |
| Fidelity | Treat clients and colleagues with respect and fairness       | Maintain professional and collaborative relationships with team members         |

**Standards of Conduct**, *enforced by the AOTA Ethics Commission*

| Section                                   | Application to School-Based Practice  |
|---|---|
| Professional Integrity and Responsibility | Comply with federal and state laws, policies, and procedures (IDEA, Rehabilitation Act, OSSE, DC Department of Health)  |
| Therapeutic Relationships                 | Maintain appropriate relationships with students and families; maintain collaborative relationships with staff  |
| Documentation, Reimbursement              | Aligning documentation timeliness and content to OSSE standards; not submitting false or fraudulent documentation   |
| Service Delivery                          | Timely response to referrals, obtaining consent for assessment and service delivery, completing timely evaluations, and delivering services as outlined in IEP/504-Plan |
| Professional Competence                   | Maintain licensure, ongoing professional development and continuing education, supervision of fieldwork students aligned to ACOTE standards                             |
| Communication                             | Maintain confidentiality; accurate and timely documentation   |
| Professional Civility                     | Professionalism and respect towards students, families, colleagues, and leadership  |

## APTA Physical Therapy Code of Ethics, 2020

Physical Therapists within DCPS are expected to adhere to the APTA Occupational Therapy Code of Ethics, updated in 2020, and the DC DOH Code of Ethics. Below, you'll find the ethical responsibilities and principles of a physical therapist including how each section relates to school-based practice. Please see [APTA Physical Therapy Code of Ethics 2020](#) for more detailed information.

| Principle  | Application to School-Based Practice  |
|--|---|
| PTs shall respect the inherent dignity and rights of all individuals   | Respect towards students, families, colleagues and leadership. Recognize any implicit bias and do not discriminate against others.  |
| PTs shall be trustworthy and compassionate in addressing the rights and needs of clients   | Demonstrate cultural competency; act in the best interest of the student; collaborate with students and team members to ensure progress on goals; adhere to confidentiality (FERPA) |
| PTs shall be accountable for making sound professional judgements  | Use professional judgement when making recommendations to team members and families; refer to other services when appropriate   |
| PTs shall demonstrate integrity in their relationships with others   | Provide truthful and accurate communication to families, students and colleagues; report any suspected cases of abuse   |
| PTs shall fulfill their legal and professional responsibilities  | Comply with local, state, and federal laws and regulations (IDEA, Rehabilitation Act, OSSE, DC Department of Health licensure regulations)  |
| PTs shall enhance their expertise through lifelong acquisition and refinement of knowledge, skills, abilities and professional behaviors | Maintain licensure, professional development, evidence-based practice   |
| PTs shall promote organizational behaviors and business practices that benefit patients, clients and society                             | Professional judgement, not accepting gifts from students/families  |
| PTs shall practice in efforts to meet the health needs of people locally, nationally and globally  | Educate the school team on school-based PT services, refrain from overutilization of PT services, promote health and well-being within the school community                         |

# Special Education Reference Information

## Special Education Disability Classifications

---

The Division of Specialized Instruction (DSI) Special Education Reference Guide contains IEP Process and related guidance on the implementation of the IEP Process as well as best practices for implementation of the IEP Process. This IEP Process Guide will help answer questions about referrals to special education, the eligibility process and IEP development and implementation processes. Additional policy guidance can be found contained within this guide that will help schools implement the regulatory requirements of IDEA and the DCMR.

The presence of a disability is not sufficient to establish eligibility for special education. The disability must result in an educational deficit that requires specially designed instruction (i.e., special education). In order to qualify for services a student, due to their disability, must require special education and related services.

Eligibility for special education and related services is determined by documenting the existence of one or more of the following disabilities and its adverse effect on educational performance. Refer to the [Office of the State Superintendent of Education's Chapter 30](#) policy for more detailed descriptions.

- Autism
- Traumatic Brain Injury
- Intellectual Disability
- Emotional Disturbance
- Specific Learning Disability
- Other Health Impairment
- Orthopedic Impairment
- Speech Language Impairment
- Hearing Impairments including Deaf / Hard of Hearing
- Visual Impairments including Blindness including Blind / Partially Signed
- Multiple Disability
- Developmental Delay

# MTSS and General Education Interventions

## Pre-Referral Interventions

---

Before a student is referred for special education services, interventions in the general education setting may be implemented. This section describes the resources and tools used to provide these interventions and the processes to refer a student for special education services if further intervention is required.

### Pre-Referral Process

The Pre-referral Team is a problem-solving team consisting of school-based personnel. Parents are encouraged to participate as an active member of the Team. The MTSS Coordinator organizes and facilitates regularly scheduled meetings to address the academic and/or behavioral needs of students. The team:

- collects and analyzes student data
- Identifies student need(s)
- Identifies interventions matched to student need(s)
- creates a student intervention plan with desired success targets
- establishes fidelity and monitoring systems
- agrees on a home-school communication system
- schedules the six-week progress update meeting
- provides support to the teacher for plan implementation

Prior to a referral being submitted, the pre-referral team should meet on the student to determine what interventions will be implemented to assist in meeting the individual needs of the student.

### Pre-Referral Process

This process is a vital part of the student referral process. The MTSS team includes three to five members, including, but not limited to, an administrator, a counselor, a regular education teacher, a special education teacher, a school social worker, a parent, with specialists or other central office persons as appropriate. In many schools, the social worker may be asked to chair this team or lead the team regarding behavior concerns. The MTSS process should be implemented over approximately six weeks, to determine if the recommendations are successful. If the strategies are not successful, the team can meet again to modify the strategies. Students should be referred to Special Education if two important decision criteria are met:

- Reasonable classroom interventions of sufficient duration have been carefully attempted, without success.
- The cause of the problem is suspected to be a disability that cannot be resolved without special education services.

Exceptions to the process include those students for whom MTSS would delay obviously needed special education services. In these cases, the MTSS process may occur concurrently during the special education referral/assessment process.

# Multi-Tiered Support System (MTSS) @DCPS and Related Services

---

## Background and Overview

In previous years, DCPS has adopted a Response-to-Intervention (RTI) model that is often reactive and grounded in a deficit approach prior to beginning interventions. Beginning in school year 2021-2022, DCPS seeks to become a district that aligns to a whole child purpose. This entails DCPS operating as a district that is trauma-responsive and where educators are prepared and supported to meet the individual and holistic needs of each child. The targeted outcome of a whole child approach is improvement in teacher/student relationships and experiences leading to enhanced developmental skills, mindsets and academic mastery, in service of equitable whole child thriving.

MTSS@DCPS is focused on rolling out a district-wide process that provides a coherent structure through which educators will be able to reflect on their improvement efforts related to whole-child core practice; interrogate schoolwide systems, structures and practices that often lead to inequitable outcomes for students; and reflect on student assets and needs to ensure that every student in the district gets the enhancements and supports needed to be successful. MTSS@DCPS is rooted in the science of how children learn and develop guided by these five core science principles:

### 1. Development is Bi-Directional

- The ongoing, dynamic interaction between nature and nurture – our genes and our environment – drives all development.
- This back-and-forth biological process highlights the malleability of our brains and bodies.

### 2. Context Matters

- The malleable nature of development is both an opportunity and a vulnerability, based on the context.
- In a positive developmental context, a safe and affirming environment, attuned and responsive relationships, and rich instructional experiences support healthy development and learning.

### 3. Learning is Integrated

- Learning is not “academic” or “social and emotional” – students become increasingly capable of complex skills through the integration of their cognitive, social and emotional development.
- No part of the brain develops in isolation – it is structurally and functionally integrated.

### 4. Pathways are Unique

- There is no such thing as an average student – each is on their own individual developmental trajectory.
- It is the challenge of educators to support the fullest expression of what a student can do by designing both shared and individualized experiences that support their holistic development.

### 5. Student Voice is Critical

- Creating better conditions for learning and development must build from the assets and interests of young people.

- When students are empowered, and we work to dismantle the long-standing barriers in their way, we can move towards more equitable opportunities and outcomes.

This new model for DCPS hopes for a successful tiered system of supports that recognizes all students have unique strengths and needs, which are best met with an integrated and holistic approach that requires collaboration between educators, clinicians, caregivers and communities. Research demonstrates that there are reasons behind the academic, social, emotional, and motivational challenges that students present.

Our goal as educators is that instead of asking why a student is not motivated or what is wrong with this student, we can ask:

- “What has happened to this student that contributes to their struggles?”
- “How can we create an equitable school environment that does not identify the student as the problem but rather honors individual context?”

Our response to these questions with a multi-tiered system of support works in service of holistic outcomes and in service of equity. DCPS’ focus is now on creating the conditions for student success and having holistic conversations about students and ensuring that all students receive unique supports or accelerators to reach their potential.

## MTSS@DCPS Tiers of Support

The following table provides a description of supports within a tiered system:

| <b>Tier 1</b><br>Universal Supports<br>Proactive supports that <b>ALL</b> students receive in order to be successful. Educators reflect on the quality of the relationships, environments, and experiences they create for students. Tier 1 supports are also grounded in strong and holistic instruction.  | <b>Tier 2</b><br>Targeted Supports<br>Individual or small group supports students receive when universal supports are not meeting their needs; these supports do not replace Tier 1 instruction and supports. Approximately 20-35% of students may need additional supports in order to be successful. | <b>Tier 3</b><br>Intensive Supports<br>Personalized supports an individual student receives when they have more significant needs or when Tier 2 supports are not meeting their needs. Approximately 10% of students will benefit from intense supports. |
|---|--|--|
| <b>Common across all three tiers:</b> <ul style="list-style-type: none"> <li>• Adult collaboration <a href="#">and capacity-building</a></li> <li>• Educator capacity-building</li> <li>• Attention to bias and antiracist mindset</li> <li>• Equity focus</li> <li>• <a href="#">Context and conditions drive conversations and solutions</a></li> <li>• <a href="#">Student agency and voice</a></li> </ul> |  |  |

## MTSS@DCPS and Special Populations

### Specialized Instruction & Related Services

MTSS@DCPS is a model that promotes school improvement through engaging, evidence-based academic and behavioral practices. Multi-tiered systems of support are intended to meet the needs of all learners, including students with disabilities across the continuum. MTSS is a collaborative, concurrent and communicative process involving all school staff, general education and special education. There is an expectation that educators are effectively working and communicating with all stakeholders throughout the implementation. A Multi-Tiered System of Supports restructures the educational system by creating a culture in which there is a shared responsibility and collaboration between general education and special education for the purpose of ensuring that the educational needs of every student are met. General and special educators work closely together within collaborative learning groups to create instructional plans that are rigorous and purposeful.

Effective MTSS practices will provide all students access to high quality instruction, relationships and experiences. The model should lead to fewer students requiring a formal IEP with modifications and accommodations to their classroom environment. For students whose IEP only requires classroom modifications, MTSS interventions could keep those students from unnecessary labels, increase their amount of time in the general education setting versus special education setting and lead to an overall reduction in special education referrals. Academic, behavioral and social-emotional tiered supports will also support in the reduction of the overidentification and over representation of black males with a special educational disability classification of Emotional Disturbance.

Universal Tier 1 supports are for all students, general education and special education. Tier 2 and Tier 3 supports are not intended to replace Tier 1 supports for students with learning challenges or students with IEPs. At different points, any student may need the supports in Tiers 2 and 3 and should have equitable access to each tier.

It is important to understand that Tier 3 is not synonymous with special education. In fact, students with disabilities may not need Tier 3 support while other students not identified as having a disability may require those supports. It is critical to understand that MTSS@DCPS does not function as a step ladder. A student may need intensive Tier 3 support without first accessing Tier 2 supports. For example, if a student suffers a traumatic event, individual counseling daily may be needed. We do not suggest they try to attend weekly group sessions to see if those work first if the student is in crisis. We must provide the student with the level of support required regardless of a defined disability or a predetermined sequence of scaled supports.

If a student is responding positively to interventions, the student is probably not a student that would need the specially designed instruction of special education. If supports and interventions are unsuccessful, the evidence-based interventions data will be useful for the special education team for the evaluation process and determining the level of support a student may need. Throughout the MTSS process, the school team must monitor student progress when a student is suspected of having a disability requiring specially designed instruction. A referral for evaluation under IDEA can occur at any point in the MTSS process and continue during and after the special education process is completed.

In the tiered support planning and discussions for students with IEPs, the MTSS team expands to include additional stakeholders across general education and special education, to ensure all experts are represented. The MTSS process is not a general education process or special education process, it is a collective process. Connecting MTSS with special education enables teams to blend the resources and expertise of both general and special education personnel to provide a unified system of supports that meets the needs of every student.

Tier 1 supports for students with IEPs may include co-teaching, inclusion instruction and co-planning with general education content teachers. Here are some Tier 2 or 3 examples for students with IEPs:

- Students who qualify for special education services in reading may need Tiers 2 or 3 support in mathematics.
- Students who qualify for special education services in behavior, may need access to Tier 2 or 3 for academics.
- Students who qualify for special education services in speech therapy, may need access to Tier 2 or 3 for reading.

Students with disabilities should be able to access the level of support needed, regardless of whether the supports in question are provided in the general or special education setting. Schools need to be cognizant of making sure the level of support the student receives doesn't *decrease*, if the student qualifies for special education services. For students with IEPs, student progress should be included in the Special Education Data System (SEDS) quarterly IEP progress report. Updates to the IEP may be warranted by the multi-disciplinary team based on student progress monitoring data from the tiered supports.

As educators and students return to school, it is important to align our expectations about student progress with the district's educational offerings and account for the time needed for recovery. We must be diligent about not labeling students according to their needs. Tiers are not placements or designations that follow students throughout their academic careers. MTSS@DCPS is an iterative process that is fluid based on data from universal screening, on-going progress monitoring and the problem-solving model. For more information to help planning for recovery, please see [Recovery Planning Considerations for Special Education](#)

### *Key Concepts*

- MTSS is NOT a process that automatically results in a referral or eligibility to special education.
- A student receiving interventions through the MTSS process should NOT delay a referral to special education.
- Students with disabilities are general education students first and should have access to the full system of supports available to all students.
- Accessing an appropriate educational program should be SEAMLESS; the MTSS framework should be flexible to meet the needs of EVERY student.
- MTSS@DCPS employs a systems approach, using data-driven problem-solving process.

For additional information regarding MTSS@DCPS including progress monitoring within the MTSS process, please visit the MTSS site at: [https://dck12.sharepoint.com/sites/DCPSWay/SitePages/21-22-Multi-Tiered-System-of-Supports-\(MTSS\).aspx](https://dck12.sharepoint.com/sites/DCPSWay/SitePages/21-22-Multi-Tiered-System-of-Supports-(MTSS).aspx)

## Role of the RSP in the MTSS Process

Related Service Providers can play a key role in each tier of the MTSS process. As MTSS looks to be proactive, the RSP does not have to wait for another educator to mention an area of concern. Instead, starting with Tier 1, RSPs can provide critical and vital supports that is beneficial for all students in the classroom. Below are examples of how RSPs can be involved in each tier of the MTSS process:

| Tier 1   | Tier 2   | Tier 3  |
|--|--|---|
| <ul style="list-style-type: none"> <li>•Co-teaching with classroom teacher so all students receive support from the RSP</li> <li>•Training for teachers on UDL strategies and supports related to the RSP's clinical expertise</li> <li>•Reviewing progress monitoring data with the MTSS team</li> <li>•Co-planning with teachers related to embedding strategies and supports beneficial for all students</li> </ul> | <ul style="list-style-type: none"> <li>•Provision of small group or individual supports related to the clinician's area of expertise</li> <li>•Completing progress monitoring/data collection for students receiving Tier 2 supports</li> <li>•Collaborating with the classroom teacher regarding student progress and support</li> <li>•Meeting with the MTSS team to provide updates regarding student progress and updates</li> </ul> | <ul style="list-style-type: none"> <li>•Individualized, personalized EBP supports related to the RSP's clinical expertise</li> <li>•Progress monitoring of the student's performance within Tier 3 supports</li> <li>•Collaobrating with the classroom teacher regarding student progress and support needs</li> <li>•Meeting with the MTSS team to provide updates regarding student progress and updates</li> </ul> |

### Tier I: Universal screening and intervention:

In Tier I, the OT and PT collaborate with educational staff on curriculum enrichment providing universal, proactive, and preventive intervention strategies to support a high-quality core instructional program and progress monitoring of all students in all settings. Program enrichment and accommodations are made in order to support the success of all children in the educational setting. The curriculum and activities become more accessible and meaningful. At this level of service, children have not been identified as requiring OT or PT as a related service to special education.

Tier I Activities may include:

- In-service training sessions and provision of resources
- Accommodations for all children to gain access to the curriculum, classroom, and campus, including modifications of tools, tasks, materials, or the environment or all four
- Seating and/or positioning of the desk and chair for proper ergonomic fit
- Sensory-enriched classroom and curriculum design
- Adaptations to support fine and gross motor development
- Activity analysis and activity demonstration
- Universal Design for Learning (UDL)

For example, at Tier I the OT may make suggestions to the classroom teacher regarding different handwriting curriculum and strategies for fine motor and visual motor development; discuss appropriate

ergonomic posture for desktop activities; make suggestions to facilitate improved core muscle strength; and illustrate the importance of children using an efficient pencil grasp and activities to improve hand strength and dexterity. Handwriting samples or a child's portfolio may be used to monitor progress toward meeting language arts state standards. After providing a universal screening of writing samples, the teacher and OT may identify a small group of children who need additional support in language arts for developing handwriting skills.

At Tier I, the PT may discuss gross motor skill development and milestones with the classroom teacher; identify specific motor skills needed to participate in the educational environment; pinpoint modified motor skills that children may use to accomplish the same activities with their peers; discuss sitting and standing posture and the importance of maintaining proper alignment for motor activities; or make suggestions for decreasing the level of difficulty of the motor skills required (e.g., use the ramp instead of the stairs). The PT may observe the children participating in natural opportunities (physical education, recess, free play) using their motor skills and based on this general observation, target a group of children for further screening if motor skills difficulty is noted.

#### **Tier II: Targeted group intervention (strategic):**

In Tier II, the role of the OT or PT may include an analysis of the screening of all children. The screening assists in forming highly structured groups of children with similar needs for appropriate evidence-based instructional strategies and interventions for success in the curriculum. Screenings are conducted in a natural environment conducive to eliciting a representative sample of a child's functional abilities in the school setting. Screening must not involve any activity that removes a child from regular school activities. Screenings may include observation (please see form in APPENDIX and CANVAS) of a child in a peer group if the observation does not identify or single out a particular child (EC § 56301). A teacher or specialist may screen a child to determine appropriate instructional strategies for curriculum implementation. Screening is not considered an assessment for determining eligibility for special education and related services and therefore does not require parental consent (34 CFR § 300.302; EC § 56321(g)). Tier II intervention targets at-risk students and is short term in duration.

Tier II Activities may include:

- Review teacher data and the outcomes of Tier 1 classroom accommodations.
- Consult with parents, teachers, and other school staff to learn about their concerns regarding participation of various groups of children in the general education curriculum.
- Review group work samples identifying groups of children with specific needs.
- Review curriculum and propose modifications to meet targeted needs.
- Analyze ongoing curriculum data collected by the teacher and assist with disability identification.
- Assist in designing and implementing targeted group instruction.
- Review scientifically based data collected through the pre-referral process.
- Provide follow-up screening and intervention for a targeted group, as appropriate.

The following outcomes may result from the screening:

- Information to the teacher, school staff, or parent supports the determination that the child's abilities are adequate to gain access to educational opportunities.

- Targeted interventions, program accommodations, and data collection are recommended and implemented by the classroom teacher or parents or both.
- There is follow-up support in the form of a referral to the Student Success Team (MTSS) or other general education process for MTSS.

At Tier II, the OT may assist the teacher in developing a handwriting center in the classroom where children receive strategic instruction in targeted groups with ongoing monitoring and feedback from the teacher. The OT may suggest developmentally appropriate accommodations based on research, such as various handwriting programs, physical and sensory strategies, the use of a pencil grip, or paper with clear visual boundaries. If a child continues to demonstrate difficulties meeting state standards even with Tier II supports, more individualized attention may be suggested.

At Tier II, the teacher, parent, and school staff may discuss with the PT concerns about the child's gross motor skills. In turn, the PT analyzes the concerns and then may form a gross motor challenge (e.g., obstacle course) in which the entire class participates. This strategy allows the PT to note general performance patterns and to observe if any child demonstrates difficulties with these skills. From the general screening, the PT may discern that the majority of children demonstrate similar patterns or that more specific data are required to determine differences in performance. In addition, if the majority of the children demonstrate similar patterns, the PT may suggest skills for the children to practice and rescreen them in a given period to note any changes in the children's performances ([National Center on Response to Intervention 2010](#)).

### **Tier III: Intensive Intervention:**

In Tier III, the OT and PT provide follow-up consultation to the classroom teacher, staff, and parents and support the collection of progress-monitoring data to help identify more effective individualized intervention strategies and accommodations. In collaboration with the teacher, the OT or PT develop a measurable goal and implement a specific, targeted intervention to address the area of concern. A systematic method of data collection is employed to monitor the child's progress toward the goal. Upon review of the data, the MTSS determines whether the intervention was successful and further intervention is necessary. If the child did not make adequate progress, the MTSS modifies the intervention method and may refer the child for a special education assessment for all areas of a suspected disability.

Tier III Activities may also include:

- Participate on the MTSS or other general education processes for MTSS.
- Develop and monitor measurable goals.
- Assist the MTSS in providing systematic monitoring of the child's progress by reviewing the data.

Throughout all of these phases, progress is continuously monitored. If a student continues to struggle after targeted interventions and accommodations are in place and documented for a reasonable amount of time (as determined by the MTSS team), a referral for a special education evaluation should be made. If MTSS activity is not successful in addressing the identified difficulties the student should be referred for an assessment.

### Documentation Requirements for RSPs

For SY 21-22, RSPs will continue documentation of MTSS supports in Frontline in the RTI portal. The service line in Frontline should clearly define the tier of support and the related area of concern (e.g., receptive vocabulary, fine motor grasp, etc.). The comment for the note should contain the following elements:

- Identification of the intervention activity/activities
- Description of the student's response to the intervention (quantitative and qualitative information)
  - Quantitative includes accuracy percentage, number of trials/opportunities, etc.
  - Qualitative includes level of prompting/dependence (i.e., moderate verbal prompts, tactile cues, maximum supports, etc.), behaviors impacting/contributing to progress, etc.
- Explanation of the relevance of the activity to the student's MTSS plan or area of support

While RSPs will log their service lines for MTSS in Frontline, RSPs will need to share data/progress monitoring information with the MTSS team so that it can be included in the student's overall MTSS profile which will be located in Panorama.

For additional information on MTSS@DCPS, see [DCPS Way MTSS page](#).

### Vision and Hearing

Vision and hearing screenings are completed by school personnel (i.e., school nurse). If either screening is failed, appropriate measures must be taken (parent notified, audiological assessment obtained, glasses prescribed, requests for vision/hearing assessments etc.) to correct the problem before the student can be evaluated, in most cases. If it is ascertained that a vision or hearing impairment cannot be corrected or has been corrected to the extent that it can be, this information should be included and incorporated into the assessment report.

In the event an audiological assessment is warranted, please complete the following steps:

- Have the LEA order the Audiological Assessment in the Special Education Data System (SEDS)
- Contact the Audiology Department via email at [speech.audiology@k12.dc.gov](mailto:speech.audiology@k12.dc.gov) or send an email to the Educational Audiologist assigned to your school if you know who your school's assigned audiologist is.

### Special Education Referral Process

Once strategies implemented through the MTSS process have proved unsuccessful and an occupational therapy or physical therapy assessment is necessary, a referral for assessment will be initiated through the IEP team (See pg. 51-52). Once a referral for an occupational or physical therapy assessment has been made, the Analyzing Existing Data section in EasyIEP is completed.

### Analyzing Existing Data

The analyzing existing data (AED) step of the evaluation process should be completed to determine whether there is sufficient information to make an eligibility determination or if further information, such

as formal assessments, is needed to make a determination. This review must be conducted by a group of individuals that include the required members of an IEP Team.

1. Review existing evaluation data
  - Information provided by parents
  - Classroom-based observations (please see required form in APPENDIX and SharePoint)
  - Response to MTSS in the General Education setting
  - Information provided by teachers
  - Formal and informal assessments
2. The IEP team should begin their review of the referral by analyzing as many of the following types of existing data as are available (*best practice is to use at least three data points*):
  - Attendance
  - Behavior or Incident reports
  - Classroom observations (please see required form in APPENDIX and SharePoint)
  - Class work samples
  - Current grades
  - Discipline reports
  - Documentation of academic and behavior interventions
  - Evaluations and information provided by parents
  - Health records and medical reports
  - Report cards
  - Standardized test scores
3. Identify the data that needs to be determined
  - Category of disability
  - Present level of performance
  - Special education and related services
  - Modifications to allow child to meet IEP goals and participate in general education
  - The student's progress
4. Documentation of this review must include:
  - The team conclusions/decisions
  - The date the conclusions/decisions are finalized
  - The names of individuals participating in the review
  - Conclusion if additional assessments are needed

# OT/PT Services and the Special Education Process

## Special Education Process

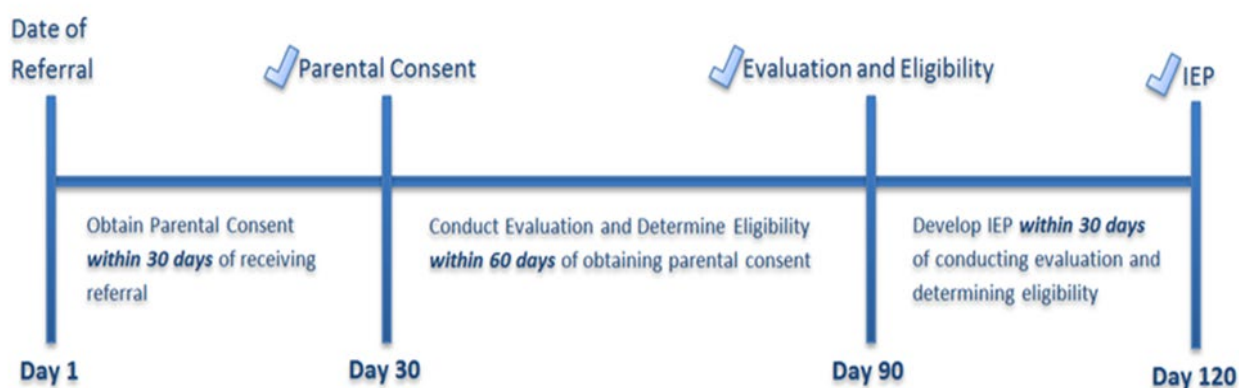

Eligibility refers to the meeting of specific criteria for receiving special education and related services. A student may not receive special education and related services as defined in IDEA unless they have been determined to be eligible by the MDT. The chart below illustrates how the identification and eligibility process will trigger whether a student is eligible for special education and related services. This section will illustrate the steps required in this process:

### Special Education Eligibility / Timeline

As a result of the Enhanced Special Education Services Amendment Act of 2014, beginning July 1, 2017, the *maximum amount of time allotted* for the evaluation and assessment period for students recommended for special education services will change (DC Code §38-2561.02 (a)).

- After receiving the student's referral for special education services, the LEA has 30 days to obtain parental consent for an evaluation.
  - A referral may be oral or written. Oral referrals must be documented by the LEA within 3 business days of receipt (DCMR 5-E3004).
  - The LEA must make reasonable efforts to obtain parental consent (DCMR 5-E3005). The LEA must make at least three attempts to communicate with a parent using three different modes of communication. Possible modes include correspondence by mail, by phone, or by conducting home visits. All communication attempts must be documented in the communications log in SEDS.
- After gaining parental consent, the LEA has 60 days (*adjusted from 120 days*) to conduct an evaluation and determine the student's eligibility.
- After conducting an evaluation and determining eligibility, the LEA has 30 days to develop the IEP (20 USC §1414(d); 34 CFR §300.320-326).

Timeline by Law:

**Note:** If parental consent is gained on Day 5, conducting an evaluation and determining eligibility must be completed by Day 65. Since each phase has a specific amount of time allotted, the timetable for each phase begins immediately after the preceding phase is completed.

**Note:** IEP teams may elect to hold the evaluation / eligibility and IEP meeting on the same day.

| Time Allotted By Best Practices   |                |                 |
|---|----------------|-----------------|
| Step  | Best Practices | Required by Law |
| Review Referral and Send Procedural Safeguards Manual and Referral Acknowledgement Letter to parent   | 3 days         | ≤ 30 days       |
| Collect Student Information and Send Referral Meeting Invitation to parent  | 3 days         |                 |
| Analyze Student Information   | 4 days         |                 |
| If Assessment is NOT Needed: Hold Referral Meeting, Obtain Parental Consent, and Schedule Eligibility Meeting   | 5 days         |                 |
| If Assessment IS Needed: Hold Referral Meeting, Obtain Parental Consent, Schedule Eligibility Meeting, and Order Assessment, Assigning Assessment to the Provider <i>within 48 hours of</i> Obtaining Parental Consent            | 10 days        |                 |
| If Assessment IS NOT Needed: Prepare for Eligibility Meeting and Send Eligibility materials for discussion to parent <i>at least 10 days in advance</i>   | 10 days        | ≤ 60 days       |
| If Assessment IS Needed: Conduct Assessments, Prepare for Eligibility Meeting, and Send Eligibility materials for discussion to parent <i>at least 10 days in advance</i>   | 45 days        |                 |
| Note: After the IEP Team orders an assessment, providers have 45 days to conduct it   |                |                 |
| <b>Hold Eligibility Meeting</b><br><br><b>PWN:</b> Send Eligibility Determination to parent<br><br>Note: For initial IEPs, teams should be prepared to hold an IEP development meeting on the same day as the Eligibility meeting | 10 days        |                 |
| <b>Develop IEP</b>  | 30 days        | ≤ 30 days       |

If a student is found eligible for special education under IDEA, decisions about the need for related services are made by the IEP team taking into consideration the OT and PT assessment information provided. When a student is suspected of having a disability and initially referred for a comprehensive evaluation, the eligibility committee reviews the assessments and any pertinent information to determine if the child has a disability that requires special education. Once eligibility has been established, the IEP team determines if related services are needed to help the student benefit from his educational program or access the general curriculum. The IEP team makes this determination based on the current data in the child's education record, or by evaluating the child in accordance with applicable requirements.

### Initial Evaluation

Requires LEAs to make reasonable efforts to obtain parental consent to evaluate the child within 30 days of referral, and then complete the evaluation and eligibility determination within 60 days of parental consent. This requirement of the law takes effect “beginning July 1, 2017, or upon funding, whichever occurs later.”

### Eligibility Timelines and Reasonable Efforts

Reasonable efforts are the communication efforts of the LEA to keep the special education process moving forward. Reasonable efforts are an LEA obligation under the law. A reasonable effort means:

- Contact is with the parent/legal guardian
- The reason for the contact is related to the evaluation process
- The result of the communication is documented
- The language used to document the effort is specific.

OSSE does not consider the following to be “reasonable efforts”:

- A 2<sup>nd</sup> or 3<sup>rd</sup> attempt at an inactive phone number/email
- A reminder call related to a currently scheduled appointment
- Communication logs that do not make the reason for contact clear

Reasonable efforts can be made utilizing the following modalities:

- Phone call
- Text message
- Email
- U.S. mail
- In-person meeting.

Reasonable efforts are more effective if they are completed in multiple modalities (when possible) and during different days and different times during the day.

As the LEA, we must engage in reasonable efforts to contact the parent at each distinct step in the referral/eligibility process. This includes response to a referral, obtaining consent, scheduling an evaluation appointment, scheduling an eligibility meeting, and obtaining consent to develop and implement an IEP. Reasonable efforts must cross the minimum threshold of occurring on 3 different dates and made in 2 different modalities (also known as 3/2 contacts).

Reasonable efforts must be documented in the SEDS Communication Log to be recognized by OSSE. Any documents sent to the parent that are not also documented by a SEDS communication log will not be considered reasonable efforts. The documentation in the Communication Log must be specific to identify its purpose.

### Related Service Provider Responsibility for Documenting Reasonable Efforts

Related Service Providers are critical members of the eligibility process. Therefore, they are also important in documenting reasonable efforts as it relates to the eligibility process. Specifically for all Related Service Providers, the reasonable efforts would primarily be related to scheduling an evaluation appointment. Documentation includes communication with the parent regarding scheduling an evaluation appointment and communication from the parent indicating any barriers impacting timely

action (e.g., only Fridays, only a few days within several weeks, death in the family, emergencies, hospitalizations, unexpected travel).

The following are examples of specific documentation language that meets OSSE's expectations:

- "Called parent to schedule an initial evaluation appointment."
- "Texted the parent to reschedule a missed evaluation appointment."
- "Emailed parent regarding scheduling the evaluation at the following location for the following date \_\_\_\_\_ and time \_\_\_\_\_."

The following examples do not meet OSSE's expectations for specific documentation language:

- "Called parent to schedule a meeting."
- "Texted parent to reschedule."
- "Emailed parent about the evaluation process"
- "Sent letter to parent about the upcoming IEP meeting"

**Related service providers must document all attempts (successful and unsuccessful) to schedule or assess a student in the SEDS Communication Log following the Reasonable Efforts guidance.**

### **Parental Consent**

Before a student may be assessed, the District must notify the parents in writing. This notice must describe any assessment procedure that the District proposes to use. Parents must give their informed consent in writing before their student may be evaluated/assessed. Once a meeting is held to determine if assessments should be ordered, parent consent is gained. Once consent is gained an assessment is ordered in EasyIEP within 48 hours and the respective provider begins the assessment process.

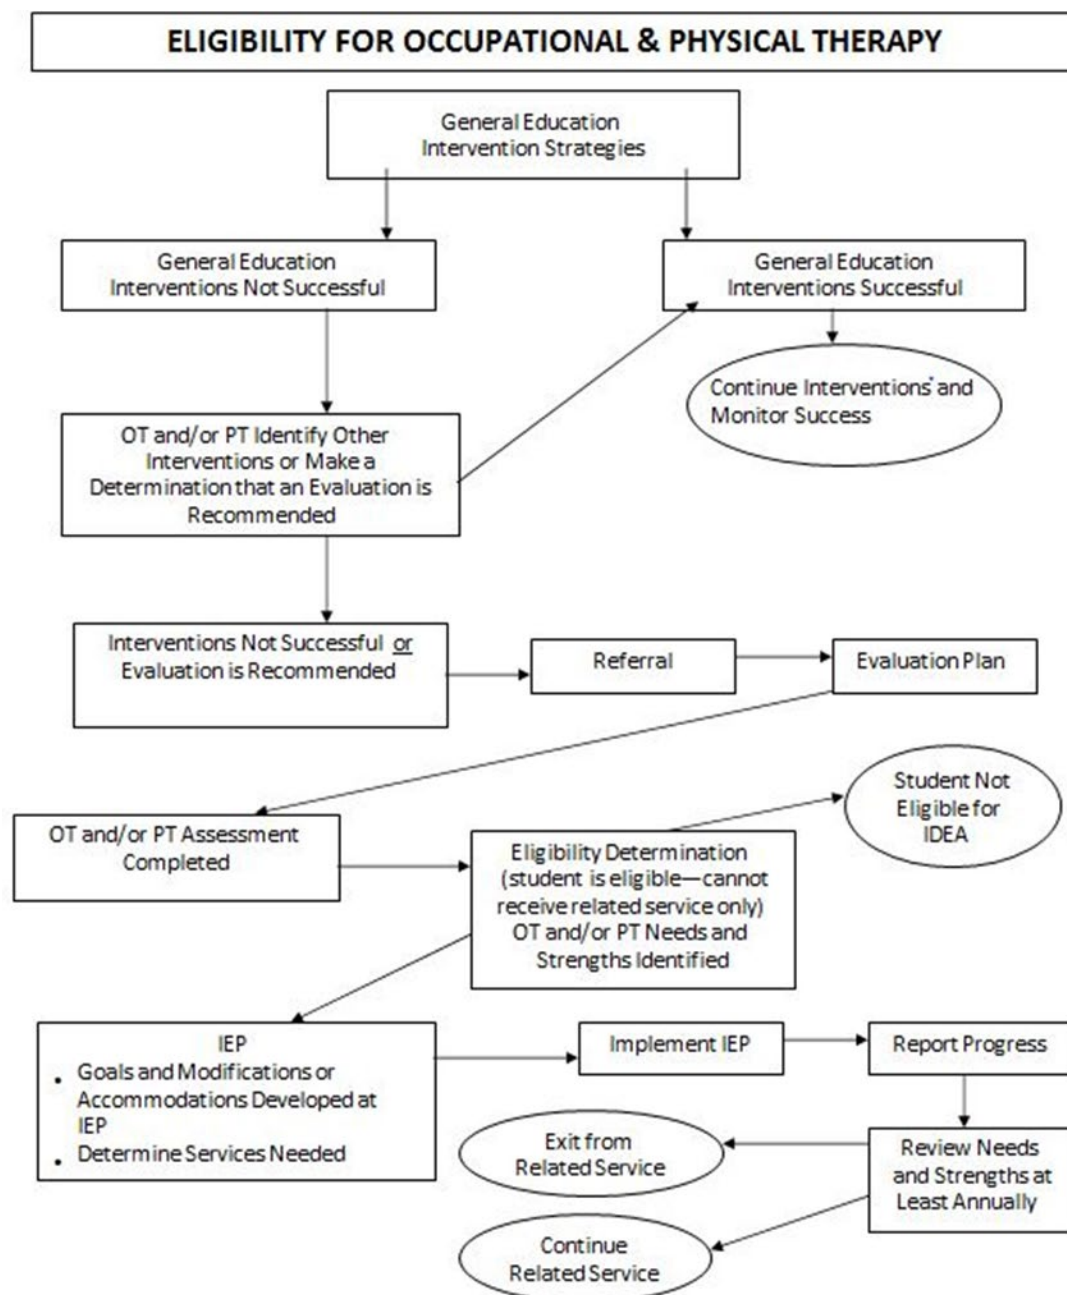

**\*Per IDEA guidelines, all evaluations must be completed within 45 days of parental consent.**

Once the evaluation process is complete a multi-disciplinary team will use data from these assessments to determine whether a student has a disability, the student's present levels of academic achievement and functional performance. If eligible for special education and related services, the MDT will then use this information to develop a student's IEP. The information will also be used to determine whether modifications are needed to enable the student to achieve his or her annual IEP goals, and to participate in the general education curriculum. For preschool students this information is used to help them participate in age-appropriate activities.

The multidisciplinary team is responsible for determining the need for an occupational or physical therapy assessment, while the service provider is responsible for choosing appropriate assessment methods and intervention strategies.

## Overview: Eligibility Process for OT and PT Services

The following flow-chart depicts the process for providing OT/ PT services at DCPS. The process is completed in the following stages of OT/PT service process: General Education Intervention and Referral, Evaluation and Assessment, Eligibility Determination, Intervention, and Monitoring.

## Early Stages Eligibility and OT/PT Services

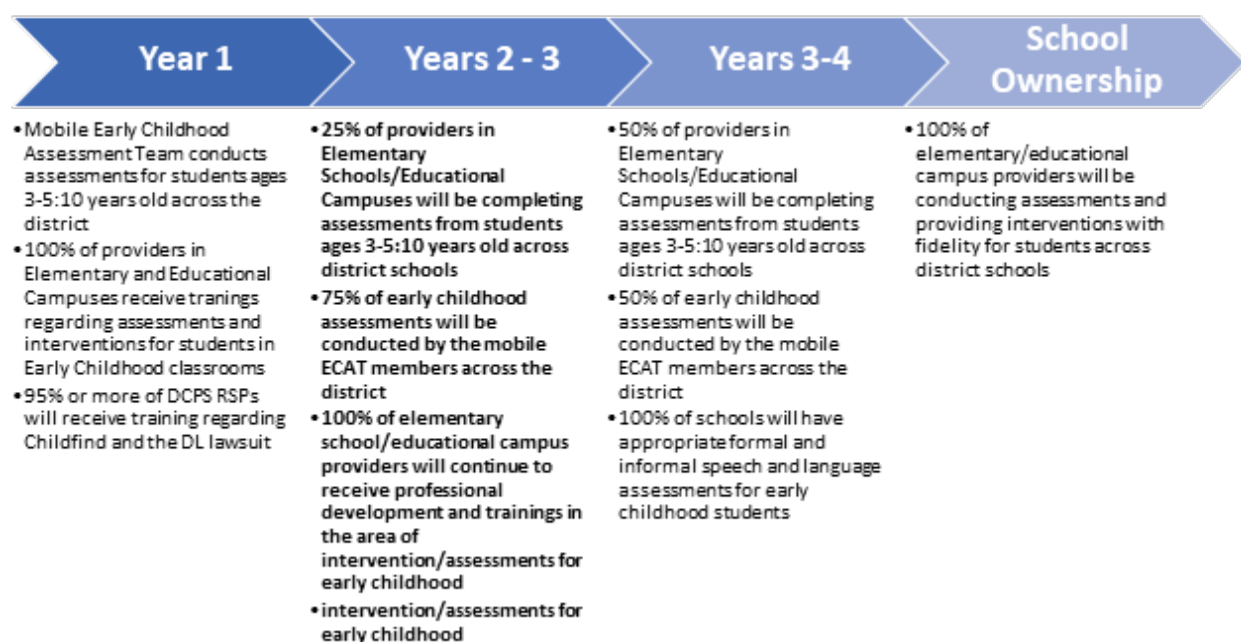

---

Unenrolled students between the ages of 3 and 5 years, 10 months who are referred for an initial special education evaluation are assessed by the Early Stages team. Initial assessments for student's special education eligible 5 years, 11 months, are to be completed by the RSPs assigned to the school. Initial OT or PT assessments for students under 5 years, 10 months with an existing IEP, must be completed by the local school. Reassessments for students between the ages of 3 years and 5 years, 10 months should be completed by the IEP team at the student's attending school. The assessment process should **not** be deferred to provide MTSS. Interventions should be provided simultaneously as a student is going through the assessment and eligibility process at Early Stages.

Early Stages has two locations:  
Walker Jones Education Center  
Minnesota Avenue Center  
(202) 698-8037  
[www.earlystagesdc.org](http://www.earlystagesdc.org)

Students enrolled in a DCPS school between the ages of 3 and 5 years, 10 months are assessed by special education team at the local school. To support the DCPS schools, a district-wide multidisciplinary team, Early Childhood Assessment Team (ECAT), will complete occupational therapy, speech and language, and psychological assessments for initial special education referrals for DCPS students between the ages of 3 and 5 years, 10 months, with the exception of selected schools whose school-based provider will conduct the assessments. ECAT was designed as a temporary unit to help schools by providing assessment assistance but also to build the capacity for local schools to inherit the work in the coming years. ECAT will provide tiered support to schools which include assessment, training and support. The goal is to transition all phases of PK child find to the local schools.

## ECAT Team Transition to Schools

## Students transitioning from IFSPs to IEPs

Student's transitioning from an IFSP (Part C) to IEP (Part B) may not be re-evaluated by Early Stages providers. This process takes into account Presumptive Eligibility since the student is currently receiving services as a Part C child with an IFSP. RSPs at Early Stages evaluate students by reviewing OSSE Strong Start documentation (assessment and intervention) and completing student observations, interviews, screenings and supplemental assessments. Early Childhood assessments completed at Early Stages are a snapshot of the student's present level of performance during the evaluation. This may impact the format and information incorporated in some of the assessment reports received from Early Stages. Assessments and progress monitoring for early childhood students should be ongoing after the assessment and IEP are completed.

## Multidisciplinary Assessment Reports

In order to facilitate a greater streamlined process of trans disciplinary collaboration, some reports will incorporate the findings of all educational testing/observations within one report. Therefore, these assessment reports will indicate cumulative strengths/weaknesses across all disciplines.

## Part C and Transition

Each discipline has its own perspective and definitions for the evaluation and assessment procedures used within their scope of practice. However, under Part C of IDEA 2004, the definitions of these procedures may differ from those used in other practice settings; therefore, providers must be well informed about the definitions under Part C.

### Steps for a Smooth Transition

For all toddlers with an IFSP, the steps, at the time of the transition meeting, shall include provision of information; parent training and discussion of transition needs, as appropriate, regarding future placements; and plans for the transition to special education programs under Part B, to early education, or other appropriate services (34 CFR § 303.344(h); 17 CCR § 52112(c) and (d)). The transition IFSP must also include the procedures to prepare the toddler for changes in service delivery. Steps to help the toddler adjust to and function in a new setting, as well as a projected date are established for conducting a final review of the IFSP to document progress toward achieving early intervention outcomes by age three (17 CCR § 52112(c)(3)).

For toddlers who may be eligible for preschool services from the LEA under Part B (e.g., special education and related services), the transition must include the following steps:

- Obtain parental consent for exchange of information about the toddler with the LEA (e.g., progress reports, evaluation/assessments).
- Review IFSPs that have been developed and implemented and other relevant information.
- Identify the needed assessments to determine special education eligibility.
- A statement of the process necessary to ensure that the LEA receives the referral in a timely manner to ensure that assessments required are completed and that an IEP is implemented by the toddler's third birthday.
- Specialized instruction and services are delivered to the student by the child's third birthday.

This means that the referral must be received by the LEA no later than the time the toddler is two years nine months old, or before the LEA's break in school services if the toddler will become three years of age during a break in school services. DCPS has their own evaluation and assessment procedures to determine eligibility. The eligibility criteria reflect differences in the populations served, as well as the focus and purpose of the services that are needed, as a result of these evaluations and assessments. One of the key changes at the time of transition from early intervention services to Part B services is the shift in service delivery, primary focus, and purpose of services. Specifically, OT and PT, under Part C of IDEA, may be required or primary early intervention services if the team determines that they are needed and they are specified on the IFSP. However, once the child becomes eligible for special education services, OT or PT may be identified as a related service, which means that OT or PT may be determined to be necessary for the child to benefit from their special educational program as a related service.

### The Collaborative Relationship Between Schools and Early Childhood Assessors

Related Services supports DCPS' child find efforts for students ages 3 through 21. There is a focus on early childhood Child Find through early identification, aggressive intervention, and progress monitoring to support individualized exit recommendations.

Students enrolled in a DCPS school between the ages of 3 and 5 years, 10 months are assessed by the special education team at the local school. To support the DCPS schools, a district-wide multidisciplinary team, the Early Childhood Assessment Team (ECAT), will complete assessments for initial special education referrals for DCPS students between the ages of 3 and 5 years 10 months. ECAT was designed as a temporary unit to help schools by providing assessment assistance but also to build the capacity of local schools to inherit the work. ECAT will provide tiered support to schools which include assessment,

training and support. The goal is for a systematic and gradual transition to all phases of PK child find to the local schools.

The assessments conducted by Early Childhood Assessors (Early Stages and ECAT) play an integral part in the shaping of the students receiving Occupational and/or Physical Therapy services within the schools. The early identification of students is intended to reduce future educational impact and adverse effects the student may experience throughout their educational career. In order to ensure that the needs of our students are adequately met, it is imperative that the Early Childhood Assessors and School-based RSPs collaborate as it relates to identification, recommendations, and determination of services and service delivery.

On many occasions, Early Childhood Assessors require input from the student's potential schoolteachers and/or related service providers. To ensure greater collaboration that educational impact is captured Early Childhood Assessors may complete the following methods of contact with providers at elementary schools and educational campuses:

- Share findings from assessment reports regarding students that may enroll in their assigned schools.
- Provide recommendations and/or determinations of service delivery models/types and frequency.
- Collaborate with the school-based provider regarding development of IEP (goals, IEP frequency/ location of services) for students assessed. \*\*If the eligibility meeting and the IEP meeting are not scheduled back-to-back on the same day, the ECAT assessor will not be available to participate in the IEP meeting.
- Discuss current service delivery interventions that are being implemented within the school setting for greater alignment when making recommendations/formulating goals.

## Determination of Settings for Interventions

The student's overall progress and level of severity dictates the amount of service and the location. There may be occasions, when the Early Stages clinician might recommend that services may be provided in both the general education setting and outside the general education setting (this typically happens if a school has not yet been identified for the student and they are unable to contact the assigned school-based provider). Given those occasions the Early Stages clinician should input the following into SEDS to reflect the setting of the delivery of service (as an example):

| Service                          | Setting                           | Begin Date | End Date  | Time Frequency |
|----------------------------------|-----------------------------------|------------|-----------|----------------|
| Occupational or Physical Therapy | Outside General Education Setting | 2/27/2020  | 2/26/2021 | 60 min/month   |
| Occupational or Physical Therapy | Inside General Education Setting  | 2/27/2020  | 2/26/2021 | 60 min/month   |

OR

| Service | Setting | Begin Date | End Date | Time Frequency |
|---------|---------|------------|----------|----------------|
|---------|---------|------------|----------|----------------|

|                                  |                                   |           |           |               |
|----------------------------------|-----------------------------------|-----------|-----------|---------------|
| Occupational or Physical Therapy | Outside General Education Setting | 2/27/2020 | 6/20/2020 | 120 min/month |
| Occupational or Physical Therapy | Inside General Education Setting  | 6/21/2020 | 2/26/2021 | 60 min/month  |

## Gold Collaboration

### Teaching Strategies Gold® - Educational Relevance and Impact for Early Childhood Students

Early childhood classrooms in DCPS utilize a curriculum and assessment tool called Teaching Strategies GOLD. Teaching Strategies GOLD is an authentic observational assessment system for children from birth through kindergarten. It is designed to help teachers get to know their students well, what they know and can do, and their strengths, needs and interests.

The Teaching Strategies GOLD assessment system blends ongoing, authentic observational assessment for all areas of development and learning with intentional, focused, performance-assessment tasks for selected predictors of school success in the areas of literacy and numeracy. This seamless system for children is designed for use as part of meaningful everyday experiences in the classroom or program setting.

It is inclusive of children with disabilities, children who are English-language or dual-language learners and children who demonstrate competencies beyond typical developmental expectations.

The assessment system may be used with any developmentally appropriate curriculum.

The GOLD links key developmental milestones with instruction in order to track student progress. Individual objectives correspond to the dimensions which include: (a) Social-Emotional; (b) Physical; (c) Language; (d) Cognitive; (e) Literacy; (f) Mathematics; (g) Science and Technology; (h) Social Studies; (i) The Arts; and (j) English Language Acquisition.

The Teaching Strategies GOLD goals in the area of Physical Development are as follows:

- **Objective 4 – Demonstrates travelling skills**
  - Moving purposefully from place to place without
  - Coordinates complex movements in play and games
- **Objective 5 – Demonstrates Balancing Skills**
  - Sustains balance during simple movement experiences
  - Sustains balance during complex movement experiences
- **Objective 6 – Demonstrates Gross-Motor Manipulatives skills**
  - Manipulates balls or similar objects with flexible body movements
  - Manipulates ball or similar objects with a full range of motion
- **Objective 7 – Demonstrates fine-motor strength and coordination manipulative skills**
  - Uses fingers and Hands
    - Uses refined wrists and finger movements
    - Uses small, precise finger and hand movements

- Uses writing and drawing tools

*Early childhood teachers may reach out to the OT or PT to help collaborate on GOLD ratings.*

### **Definition of Educational Impact for Early Childhood Population**

**For occupational therapy,** educational impact is defined as decreased ability to apply, use, and generalized foundation fine motor, visual motor, and sensory processing skills towards academic and non-academic school tasks. These can include (but not be limited to) the following: written communication (pre-writing strokes, letter formation, organization of written work), multistep activities (arts and crafts, simple meal preparation, motor-based activities [i.e. gym class, organized classroom games, etc.], gathering materials for school activities, keeping track of materials for school activities, etc.), efficient and safe manipulation of school tools (crayons, chalk, pencils, scissors), independence with age appropriate self-care tasks (clothing management, feeding, personal hygiene, tooth brushing), and establishing and maintaining functional and meaningful relationship(s) between peers and school staff (i.e. attending, expanding upon play schemes, etc.).

**For physical therapy,** educational impact is defined as decreased ability to access the school environment and accessing materials needed safely and functionally for academic and social success. *Short version—student demonstrates serious difficulty on effectively and safely accessing educational environment(s) and/or materials.*

Occupational and Physical therapists should use these objectives to inform eligibility discussions, drive goals, gauge progress in treatment, and determine educational relevance and impact with the early childhood population. RSPs providing intervention services to early childhood students will provide input into the GOLD assessment tool for quarters 1 and 4 for the GOLD objectives related to their discipline. Each RSP assigned to an elementary school or educational campus should familiarize themselves with Teaching Strategy GOLD.

## Parentally Placed/Self-Funded Students

---

District of Columbia Public Schools' (DCPS), Centralized IEP Support Unit (CIEP), is responsible for locating, identifying, and evaluating all parentally placed, self-funded private and religious school children ages 3 years to 22 years old who have a disability or suspected disability. Children who have been parentally placed, and self-funded in a private or religious school will be evaluated to determine whether they are eligible for special education. Staff will be placed on the CIEP teams and will be responsible for several groups of students. These Teams are responsible for all students who are parentally placed and self-funded, private and religious schools. The school served could be a:

- Day Care Center
- Private school
- Parochial school
- Non-Public School

If it is determined that the student is eligible for special education, an IEP is developed. The parent has the option of accepting the IEP and enrolling their child full time into a DCPS school or remaining in the private/religious school and receiving equitable services.

In the event the parent elects to remain with the private, religious, daycare, or homeschool option, the parents reject the IEP, and an ISP (Individual Service Plan) is developed. DCPS offers to provide the related services from the ISP during the school day at the student's location. These ISP services are considered equitable services.

### Documenting

Documentation for students receiving equitable services is completed using the Equitable Services Therapy Log form and Equitable Services Quarterly Progress Report form. Providers must complete the required equitable services documentation and upload it into SEDS by relabeling a miscellaneous cover sheet.

For additional information or questions, contact the Centralized IEP Support Team at [DCPS.childfind@k12.dc.gov](mailto:DCPS.childfind@k12.dc.gov).

## Assessment Procedures

---

Assessments are crucial components of the special education evaluation process. Expert assessments can help the IEP team determine appropriate Occupational Therapy or Physical Therapy services for a student as necessary.

### Comprehensive Occupational Therapy Evaluations

A Comprehensive Evaluation is an assessment completed to determine if areas of weaknesses or suspected disability are affecting a student academically, social/emotionally, and/or vocationally. The mandatory areas that must be assessed in an initial or re-evaluation for an evaluation to be considered comprehensive are indicated below. A comprehensive Occupational or Physical Therapy Evaluation must include both quantitative and qualitative measures and components.

As outlined in *AOTA's Occupational Therapy Framework: Domain and Process, 4<sup>th</sup> ed.* (4th ed.; OTPF-4; The American Journal of Occupational Therapy, August 2020, Vol. 74, Suppl. 2), "Evaluation occurs during the initial and all subsequent interactions with a student" (OTPF, p. 21). The evaluation consists of three steps: the occupational profile, analysis of occupational performance, and synthesis of evaluation process.

1. **Create a Student's Occupational Profile**
2. **Analysis of Occupational Performance:** In the analysis of occupational performance, the OT identifies the student's skill level(s) and their ability to effectively perform expected tasks via formal and information methods.
3. **Synthesis of the Evaluation Process:** The occupational therapist synthesizes the information gathered through the occupational profile and analysis of occupational performance.

**Exhibit 2. Operationalizing the Occupational Therapy Process**

Ongoing interaction among evaluation, intervention, and outcomes occurs throughout the occupational therapy process.

| Evaluation   |
|--|
| <p><b>Occupational Profile</b></p> <ul style="list-style-type: none"> <li>• Identify the following:             <ul style="list-style-type: none"> <li>• Why is the client seeking services, and what are the client's current concerns relative to engaging in occupations and in daily life activities?</li> <li>• In what occupations does the client feel successful, and what barriers are affecting their success in desired occupations?</li> <li>• What is the client's occupational history (i.e., life experiences)?</li> <li>• What are the client's values and interests?</li> <li>• What aspects of their contexts (environmental and personal factors) does the client see as supporting engagement in desired occupations, and what aspects are inhibiting engagement?</li> <li>• How are the client's performance patterns supporting or limiting occupational performance and engagement?</li> <li>• What are the client's patterns of engagement in occupations, and how have they changed over time?</li> <li>• What client factors does the client see as supporting engagement in desired occupations, and what aspects are inhibiting engagement (e.g., pain, active symptoms)?</li> <li>• What are the client's priorities and desired targeted outcomes related to occupational performance, prevention, health and wellness, quality of life, participation, role competence, well-being, and occupational justice?</li> </ul> </li> </ul> <p><b>Analysis of Occupational Performance</b></p> <ul style="list-style-type: none"> <li>• The analysis of occupational performance involves one or more of the following:             <ul style="list-style-type: none"> <li>• Synthesizing information from the occupational profile to determine specific occupations and contexts that need to be addressed</li> <li>• Completing an occupational or activity analysis to identify the demands of occupations and activities on the client</li> <li>• Selecting and using specific assessments to measure the quality of the client's performance or performance deficits while completing occupations or activities relevant to desired occupations, noting the effectiveness of performance skills and performance patterns</li> <li>• Selecting and using specific assessments to measure client factors that influence performance skills and performance patterns</li> <li>• Selecting and administering assessments to identify and measure more specifically the client's contexts and their impact on occupational performance.</li> </ul> </li> </ul> <p><b>Synthesis of Evaluation Process</b></p> <ul style="list-style-type: none"> <li>• This synthesis may include the following:             <ul style="list-style-type: none"> <li>• Determining the client's values and priorities for occupational participation</li> <li>• Interpreting the assessment data to identify supports and hindrances to occupational performance</li> <li>• Developing and refining hypotheses about the client's occupational performance strengths and deficits</li> <li>• Considering existing support systems and contexts and their ability to support the intervention process</li> <li>• Determining desired outcomes of the intervention</li> <li>• Creating goals in collaboration with the client that address the desired outcomes</li> <li>• Selecting outcome measures and determining procedures to measure progress toward the goals of intervention, which may include repeating assessments used in the evaluation process.</li> </ul> </li> </ul> |

*Note: Standardized assessments are preferred, when available, to provide objective data about various aspects of the domain influencing engagement and performance. The use of valid and reliable assessments for obtaining trustworthy information can also help support and justify the need for occupational therapy services.*

Although testing in many areas is needed in a comprehensive OT evaluation, not all of these tests and measures are necessary for every child. Common child-specific areas assessed by OTs related to participation in school activities may include:

|  |  |
|--|--|
| Activities of daily living   | Arousal, attention, adaptive behavior, and organizational skills |
| Assistive and adaptive technology                                      | Community integration  |
| Environmental, home, and work (school/play/job) modifications          | Ergonomics and body mechanics                                    |
| Fine motor and gross motor function (motor control and motor learning) | Habits, routines, and roles                                      |
| Leisure skills   | Neuromuscular functions  |
| Occupational profile, interests, values                                | Play   |
| Praxis   | Rest and sleep   |
| Self-determination   | Social Participation   |
| Tool use   | Visual motor integration   |
| Work and prevocational skills  |  |

**CHANGES BY AOTA as of 2017**

- The descriptions in CPT® in 2017 set the stage for promoting optimal occupational therapy practice. By conducting a profile, doing standardized and other tests and measures, and showing the breadth of concerns occupational therapy considers, we promote distinct value. The evaluation process can communicate to others the full scope of occupational therapy practice.
- There are three complexity levels for OT assessments: low, moderate and high. DCPS related services evaluations are considered to be in the **moderate** range. Moderate complexity assessments include:
  - *“An occupational profile and medical and therapy history, which includes an expanded review of medical and/or therapy records and additional review of physical, cognitive, or psychosocial history related to current functional performance.”*
  - *“An assessment(s) that identifies 3–5 performance deficits (i.e., relating to physical cognitive or psychosocial skills) that result in activity limitations and/or participation restrictions.”*

| CPT® Skill Areas | CPT® Descriptors of Skill Areas  |
|------------------|--|
| <b>Physical</b>  | Physical skills refer to body structure or body function (e.g., balance, mobility, strength, endurance, fine or gross motor coordination, sensation, dexterity).   |
| <b>Cognitive</b> | Cognitive skills refer to the ability to attend, perceive, think, understand, problem solve, mentally sequence, learn, and remember, resulting in the ability to organize occupational performance in a timely and safe manner. These skills are observed when a person (1) attends to and selects, interacts with, and uses task tools and materials; (2) carries out individual actions and steps; and (3) modifies performance when problems are encountered. |

|                                     |   |
|-------------------------------------|---|
| <b>Psychosocial</b>                 | Psychosocial skills refer to interpersonal interactions, habits, routines and behaviors, active use of coping strategies, and/or environmental adaptations to develop skills necessary to successfully and appropriately participate in everyday tasks and social situations.   |
| <b>AOTA Performance Skill Areas</b> | <b>AOTA Descriptors of Performance Skill Areas</b>  |
| <b>Motor</b>                        | Motor Skills— “Occupational performance skills observed as the person interacts with and moves task objects and self around the task environment” (e.g., activity of daily living [ADL] motor skills, school motor skills: Boyt, Gillen & Scaffa, 2014a, p.1237).   |
| <b>Process</b>                      | Process Skills— “Occupational performance skills [e.g., ADL process skills, school process skills] observed as the person (1) selects, interacts with, and uses task tools and materials; (2) carries out individual actions and steps; and (3) modifies performance when problems are encountered” (Boyt Schell et al., 2014a, p. 1239). |
| <b>Social Interaction</b>           | Social Interaction Skills— “Occupational performance skills observed during the ongoing stream of asocial exchange” (Boyt Schell et al., 2014a, p. 1241).   |

- Please refer to appendix and SharePoint for updated template
- Please also see the link with the full AOTA article below:
- <https://www.aota.org/~media/Corporate/Files/Advocacy/Reimb/Coding/final%20version%2010%20page%20article.pdf>

## Occupational Therapy Assessment Report Writing

The following elements must be included in every assessment report (please find a blank template in appendix as well as the SharePoint website:

<https://dck12.sharepoint.com/sites/DSIRelatedServiceProvidersPage/SitePages/OT-PT-Page.aspx>).

### Mandatory Occupational Therapy Assessment Report Elements

The following items and their respective descriptions are required in the Mandatory Occupational Therapy Assessment Report. Each section must include the mandatory elements with the required information. Each section must include a summary of the test results using quantitative and qualitative information/data. In addition, the report should describe the specific skills and the student’s ability to access the curriculum /grade level material. As school-based providers, the written report must discuss in detail the student deficits and their educational impact based on the test results, observations, teacher reports, etc. Please find a description of all required elements below:

1. DCPS Letterhead,
2. Page numbers
3. Title: Initial OT/PT Evaluation; OT Re-Evaluation; OT Classroom Observation; OT Independent Assessment Review
4. Student Identifying Information

- a. Student Name
  - b. Date of Birth
  - c. Student Identification Number
  - d. Chronological Age
  - e. Grade
  - f. School (Home/Attending)
  - g. Date of Evaluation/Assessment
  - h. Date of Report/Review
  - i. Teacher
  - j. Examiner
  - k. **PARENTAL CONSENT DATE**
5. Reason for Referral
6. History/Background/Record Review
7. Teacher, Parent, Other RSP and Student Interview or Report
8. Classroom Observation
9. Behavioral Observations (during assessment)
10. Validity Statement
11. Assessment Tools & Procedures (Qualitative and Quantitative Procedures)
  - a. Standardized/Non-Standardized Testing (list test names)
  - b. Must assess a minimum of 3 domains/components
  - c. Physical components
  - d. Cognitive components
  - e. Psychosocial components
12. Fine Motor
13. Handwriting
14. Visual Motor
15. Visual Perceptual
16. Sensory Processing
17. Activities of Daily Living
18. Equipment
19. Assistive Technology
20. Summary
  - a. Overall statement
  - b. Strengths
  - c. Areas of Growth
  - d. Impact on Learning and Participation
21. Recommendations
  - a. Recommendations for educational staff
  - b. Recommendations for parents/caregiver
  - c. MDT Statement
22. Signature (electronic signature)
23. Title/Credentials/DC DOH License Number

# Occupational Therapy Assessment Report Template

## COMPREHENSIVE OCCUPATIONAL THERAPY INITIAL EVALUATION OR RE-EVALUATION

|                                       |   |
|---------------------------------------|---|
| <b>Name:</b> Name of student          | <b>Parental Consent Date:</b> Date parent consented to evaluation (located in SEDS) |
| <b>DOB:</b> Date of Birth             | <b>DOE:</b> Date of Assessment / Evaluation   |
| <b>SID#:</b> Student ID number        | <b>DOR:</b> Date of Report/Review   |
| <b>CA:</b> Chronological age          | <b>Grade:</b> Student grade level   |
| <b>Examiner:</b> Name and credentials | <b>School:</b> Name of Attending school   |
|                                       | <b>Teacher:</b> Name of student's teacher   |

### REASON FOR REFERRAL

This section must state that the assessment was ordered by the multidisciplinary team, as well as the type of assessment (i.e., initial, re-evaluation, etc....) and purpose (i.e., difficulty writing sentences during classroom activities, etc....). In the case of an initial assessment, this section may also include the person who is making the referral.

*School-based occupational therapy may be provided within special education services. OT is a related service that targets skills that may not be addressed by other services, such as functional fine motor, visual motor, visual perceptual, or sensory processing deficits that impede the student's ability to access their academic curriculum.*

**ASSESSMENT TOOLS & PROCEDURES** (List of all formal and informal assessment procedures used in completing the assessment. Delete any that were not used!)

- Review of Records
- Parent Interview
- Teacher Interview
- Other RSP Interview
- Student Interview
- Clinical Observations
- Analysis of Work Samples
- Standardized/Formal Assessments (list test names and dates that tests were administered):
  - Ex. BOT-2
  - Ex. SPM
- Psychosocial assessment tools/procedures: ex. Classroom observation
- Cognitive assessment tools/procedures: ex. Classroom/clinical observations

- Physical assessment tools/procedures: *ex. BOT-2, DTVP-3*

### **HISTORY /BACKGROUND / RECORD REVIEW**

- Pertinent birth, medical, and academic history and information from student file
- Current academic program (general education, special education, PARCC or academic data, instructional hours on IEP, current MTSS academic or behavior interventions, 504, etc.)
- Previous OT Assessment results. State the date of previous report, name of previous examiner and findings and level of severity.
- Was MTSS initiated, completed; progress with MTSS
- If re-assessment, include list of current IEP goals, status, progress and performance level.

### **INTERVIEWS - TEACHER, PARENT, OTHER RSP and STUDENT**

Report information from the teacher and/or parent that is gathered from interviews, rating scales, or questionnaires to describe the student's current level of functioning and support possible educational impact. Narrative should the name(s) of individuals interviewed. Teacher interview is required. The other individuals are optional.

### **CLASSROOM OBSERVATIONS**

This section is required and should include observations of the student's performance across multiple educational settings. Observations should include information on the student's performance in the areas of concern expressed by the teacher, parent and/or results from testing; include behavioral observations.

### **TESTING BEHAVIOR**

This section should include observations of the student's behavior while participating in formal or informal assessment. Be sure to include any behavioral observations that may have impacted the validity of the assessment results (*ex. attention, amount of prompting required, behavioral incentives, differences in behavior in 1-1 vs. classroom, etc.*)

### **VALIDITY STATEMENT**

This section must answer the following three (3) questions: (1) Was the assessment procedure valid for the intended purpose? (2) Were the assessment procedures valid for the student to whom it was administered, and the results are a valid report of the student's current functioning? (3) Were procedural modifications made when assessing the student to increase the validity of the results?

### **FORMAL ASSESSMENTS**

**\*\* All formal assessments or procedures for fine motor, handwriting, visual motor, visual perceptual, sensory processing, and activities of daily living must include the following:**

- Description of the test, subtest or procedure and the skill areas measured.
- Description of what the student was supposed to do to indicate the skill (copy letters using sample, etc.)
- Description and interpretation of the standard/scaled scores (include table with scores if appropriate)
- Description of student's strengths and weaknesses on this formal assessment

- All standardized tests must include standardized scores, unless the clinician is unable to establish a baseline/basal. In those instances, the provider must indicate that the test/subtest was attempted and describe (i.e., behaviors, etc...) that precluded the student from being able to complete the test tasks.

### **CLINICAL OBSERVATIONS AND ANALYSIS**

*\*Describe observations and analysis of each area below in narrative form. Do not ONLY state “within functional limits”; instead provide a description of how you came to the conclusion. Must report on all areas below to ensure the report is comprehensive.*

#### **Neuromotor/Muscular Skills:**

- Muscle Tone (*the resistance felt to movement or the tension in the muscles at rest*):
- Postural Control (*ability of the student to assume and maintain postures against gravity like pivoting on his/ her stomach, lifting legs and head while lying on his/ her back and sitting upright on the chair*):
- Muscle Strength (*the ability of a muscle to produce force, which may result in the production or prevention of movement*):
- Range of Motion (*amount of active [AROM] or passive [PROM] movement available at a joint and is necessary for movement*):
- Motor Planning (*motor planning consists of the ability of students to imagine a mental strategy to carry out a movement or an action; for instance, how to get on top of a table, how to move from point A to point B and overcome some obstacle, how to execute a dance step, or learning how to skip*):

**Fine Motor Skills:** *The refined movements of the hands and fingers to grasp and manipulate a variety of tools within the classroom and school setting, such as pencils, scissors, clothing fasteners, and utensils for self-feeding.*

*\*Examples: In-hand manipulation skills, pencil/scissor grasp, strength, stringing beads, opening containers, putty/play-doh, fingertip-thumb tapping, hand preference/dominance.*

**Bilateral Coordination Skills:** *the efficient use of both sides of the body together to perform a task; it is necessary for writing, cutting, typing, and many other academic activities and self-care tasks.*

*\*Examples: stabilizing the paper with their non-dominant hand, using non-dominant hand to manipulate the paper while cutting with dominant hand, opening and closing containers, folding, crossing midline during writing, coloring or drawing tasks, ball play, stringing beads, removing beads from putty, self-care tasks, typing.*

**Ocular Motor Skills:** *Refers to the ability of the eyes to work together to simultaneously and efficiently to focus on and track objects. Ocular motor skills are important for reading, writing, navigating one's environment, locating items within a backpack, locker or classroom, and focusing on a given task.*

*\*Can complete a brief assessment looking at child's ability to track a highlighter in all directions and converge eyes to track the highlighter to midline. Can include information on convergence/divergence, crossing midline, peripheral vision, smooth saccades, visual fixation, tracking, visual attention.*

**Visual Motor Integration (VMI) Skills:** *The ability to coordinate finger-hand movements given visual information.*

\*Examples: cutting on a line or cutting out a shape, tossing and catching a ball, coloring within a boundary, copying block designs, drawing, puzzles, etc.

**Visual Perceptual Skills:** *The brain's ability to recognize, differentiate, and interpret visual information including size, distance, and shape without motor involvement.*

\*Examples: completing simple puzzles, matching, sorting, figure ground skills, visual closure, visual spatial relations, scanning board/worksheets, climbing stairs, playground skills

**Handwriting Skills:** *Handwriting is a complex task that requires the simultaneous functioning of a variety of sensory and motor processes, including visual motor integration, visual perception, fine motor skill development, overall muscle development, strength and endurance, and sensory processing.*

\*Examples: letter formation, sizing, spacing, alignment, overall legibility, letter/number reversals, speed, endurance, copying vs. dictation, omissions. Does it improve with accommodations, such as dotted-lined paper, visual model, or a slant board?

**Sensory Processing Skills:** *Sensory processing is the brain's ability to orient, regulate, and use multi-sensory information to successfully complete activities and make the appropriate adjustments to assure ongoing success. Sensory processing skills help lay the foundation for a variety of behaviors and skills such as emotional affect, the ability to maintain focus and attention, fine motor and visual-motor skills, and the ability to transition between activities.*

\*Examples: describe appropriate responses towards sensory input, ability to self-regulate, or concerns with hypo- or hyper-responsiveness towards sensory input. Include observable behaviors, such as: covering ears, fidgeting, rocking, climbing on furniture, etc. List interventions trialed, such as: movement breaks, reward charts, frequent breaks, etc.

**Activities of Daily Living:** *Activities of daily living refer to the occupational tasks required of the person throughout the day. Daily occupations within the school setting include but are not limited to classroom/academic tasks, dressing (donning/doffing coat, changing into P.E. clothes, etc.), toileting, and self-feeding.*

\*Examples: donning/doffing coat at the beginning and end of the day, opening and closing backpack, dressing/undressing during toileting, self-feeding, washing hands, maintaining organization of materials in desks/locker, following routines

## **EQUIPMENT**

Is the student currently using equipment or support in the classroom? Description of trial equipment used during assessment. Did the IEP team consider Assistive Technology during the last IEP meeting? Is equipment recommended? Has the IEP team consulted with the Assistive Technology team for support/equipment options?

## **SUMMARY**

Summary of formal and informal assessment, observations, and interpretation. This should be written in paragraph format.

- Include student's strengths and areas of growth

- If re-assessment, compare results with previous test results. Can use chart/table if helpful

- Psychosocial factors affecting student's access to the curriculum.
- Cognitive factors affecting student's access to the curriculum.
- Physical factors affecting student's access to the curriculum.

### IMPACT ON LEARNING & PARTICIPATION

-Impact statements must include a clear explanation including at least one specific example of how disability impacts the student's achievement in the general education setting.

-If the results indicate that there are deficits or impairments, then the provider must indicate that there is no potential educational impact or difficulties accessing the curriculum.

### RECOMMENDATIONS

- Include strategies for teachers and parents based on student needs (must align with indicate areas of weaknesses identified in the report or concern areas stated by teacher or parent).

- Statements regarding eligibility and placement should defer to the MDT or IEP after all relevant data / assessments have been reviewed and discussed. **This statement must be included within the report: *The results of this evaluation will be reviewed by the MDT to determine the need for occupational therapy as a related service within their educational curriculum.***

-Do not use any references to whether the student qualifies/does not qualify OR make reference to the continuation/discontinuance of services OR service amount/frequency

- Do not recommend any additional evaluations, services, or equipment/materials that parents may expect DCPS to fund.

## Comprehensive Physical Therapy Evaluations

A Comprehensive Evaluation is an assessment completed to determine if areas of weaknesses or suspected disability are affecting a student academically, social/emotionally, physically and/or vocationally. The mandatory areas that must be assessed in an initial or re-evaluation for an evaluation to be considered comprehensive, must include both quantitative and qualitative measures and components.

Multiple methods often are used during the evaluation process to assess student, environment or context, occupation or activity, and occupational performance. Methods include:

- An interview with the student and significant others
- Observation of performance and context
- Record review
- Direct assessment of specific aspects of performance.
- Formal and informal, structured and unstructured, and standardized criterion- or norm-referenced assessment tools can be used.

*Note:* Standardized assessments are preferred, when available, to provide objective data about various aspects of performance. The use of valid and reliable assessments for obtaining trustworthy information can also help support and justify the need for physical therapy services.

### NEW CHANGES BY APTA as of 2017

The 2 familiar CPT codes for physical therapy evaluation and reevaluation disappeared beginning January 2017. In their place, PTs must use 3 new evaluation codes and a new reevaluation code.

As part of APTA's longstanding efforts to pursue a new payment system that fairly reflects the expertise, skill, and responsibility of physical therapists in caring for their patients and clients, the association and its collaborators developed this 3-tiered system of CPT evaluation codes to replace the current single code that covered all physical therapist evaluations.

Please also see the link below for more information

<http://www.apta.org/EvalCodes/>

DCPS related services evaluation are considered to be in the moderate range.

Factors that will need to be included in PT reports moving forward:

Activity limitations

Body functions

Body regions

Body systems

Participation restrictions

Personal factors

<http://www.apta.org/uploadedFiles/APTAorg/Payment/Reform/NewEvalCodesQuickGuide.pdf>

## Physical Therapy Report Writing

The following elements must be included in every assessment report (please find a blank template in appendix as well as the SharePoint website:

<https://dck12.sharepoint.com/sites/DSIRelatedServiceProvidersPage/SitePages/OT-PT-Page.aspx>).

### Mandatory Physical Therapy Assessment Report Elements

The following items and their respective descriptions are required in the Mandatory Occupational Therapy Assessment Report. Each section must include the mandatory elements with the required information. Each section must include a summary of the test results using quantitative and qualitative information/data. In addition, the report should describe the specific skills and the student's ability to access the curriculum /grade level material. As school-based providers, the written report must discuss the student deficits and its educational impact based on the test results, observations, teacher reports, etc. Below please find a description of all required elements.

1. DCPS Letterhead,
2. Page numbers
3. Title: Initial PT Assessment; PT Re-Assessment; PT Classroom Observation; PT Independent Assessment Review
4. Student Identifying Information
  - a. Student Name
  - b. Date of Birth
  - c. Student Identification Number
  - d. Chronological Age
  - e. Grade
  - f. School (Home/Attending)
  - g. Date of Evaluation / Assessment
  - h. Date of Report / Review
  - i. Teacher
  - j. Examiner
  - k. **PARENTAL CONSENT DATE**
5. Reason for Referral
6. History/Background/Record Review
7. Teacher, Parent, Other RSP and Student Interview or Report
8. Classroom Observation
9. Behavioral Observations
10. Validity Statement
11. Assessment Tools & Procedures Completed (Qualitative and Quantitative Procedures)
  - a. Must include areas identified from APTA
  - b. Activity limitations, body functions, body regions, body structures, body systems, participation restrictions and personal factors.
12. Assessment Procedure / Tool Results / Clinical Assessment
  - a. Examination of Body Systems
  - b. Body structures - The structural or anatomical parts of the body, such as organs, limbs, and their components, classified according to body systems.

- c. Body functions (including psychological functions) - The physiological functions of body systems, including psychological functions
  - d. Activity limitations/participation restrictions - Difficulties an individual may have in executing a task, action, or activities (e.g., inability to perform tasks due to abnormal vital sign response to increased movement or activity).
  - e. Assessment Tool Results
- 13. Equipment
  - 14. Summary Clinical Presentation
    - a. Overall statement
    - b. Strengths
    - c. Areas of Growth
    - d. Impact on Learning and Participation
  - 15. Recommendations and Clinical Decision Making
    - a. Recommendations for educational staff
    - b. Recommendations for parents / caregivers
    - c. MDT Statement
  - 16. Signature (electronic signature)
  - 17. Title/Credentials/DC DOH License Number
  - 18. Date

*Please see further information on each mandatory element and section*

# Physical Therapy Assessment Report Template

## COMPREHENSIVE PHYSICAL THERAPY INITIAL EVALUATION OR RE-EVALUATION

|                        |                        |
|------------------------|------------------------|
| Name:                  | Date(s) of Evaluation: |
| Date of Birth:         | Date of Report:        |
| Student ID Number:     | Grade:                 |
| Age:                   | School:                |
| Examiner:              | Teacher:               |
| Parental Consent Date: |                        |

### REASON FOR REFERRAL

This section must state that the assessment was ordered by the multidisciplinary team, as well as the type of assessment (i.e., initial, re-evaluation, etc....) and purpose (i.e., difficulty writing sentences during classroom activities, etc....). In the case of an initial assessment, this section may also include the person who is making the referral.

*School-based physical therapy may be provided within special education services. Physical therapy is a related service that targets functional gross motor skills which impede the student's ability to navigate and access their school environment and educational goals.*

**ASSESSMENT TOOLS & PROCEDURES** (List of all formal and informal assessment procedures used in completing the assessment. Delete any that were not used!)

- Review of Records
- Parent Interview
- Teacher Interview
- Other RSP Interview
- Student Interview
- Clinical Observations
- Standardized/Formal Assessments (list test names and dates that tests were administered):
  - Ex. SFA
- Body Structures assessment tools/procedures
- Body Functions assessment tools/procedures
- Activity limitations/participation restrictions assessment tools/procedures

### HISTORY /BACKGROUND / RECORD REVIEW

- Pertinent birth, medical, and academic history and information from student file

- Current academic program (general education, special education, PARCC or academic data, instructional hours on IEP, current MTSS academic or behavior interventions, 504, etc.)
- Previous PT Assessment results. State the date of previous report, name of previous examiner and findings and level of severity.
- Was MTSS initiated, completed; progress with MTSS
- If re-assessment, include list of current IEP goals, status, progress and performance level.

### **INTERVIEWS - TEACHER, PARENT, OTHER RSP and STUDENT**

Report information from the teacher and/or parent that is gathered from interviews, rating scales, or questionnaires to describe the student's current level of functioning and support possible educational impact. In this section, evaluators can discuss student's participation in field trips and community-based instruction. Narrative should the name(s) of individuals interviewed. Teacher interview is required. The other individuals are optional.

### **CLASSROOM/SCHOOL ENVIRONMENT OBSERVATIONS**

This section is required and should include observations of the student's performance across multiple educational settings. Observations should include information on the student's performance in the areas of concern expressed by the teacher, parent and/or results from testing; include behavioral observations and observations of transitions between settings.

### **TESTING BEHAVIOR and COGNITIVE FUNCTIONS**

This section should include observations of the student's behavior while participating in formal or informal assessment. Be sure to include any behavioral observations or cognitive functions that may have impacted the validity of the assessment results (*ex. attention, amount of prompting required, behavioral incentives, differences in behavior in 1-1 vs. classroom, etc.*)

### **FORMAL ASSESSMENTS**

\*\* All formal assessment write-ups must include the following:

- Description of the test, subtest or procedure and the skill areas measured.
- Description of what skill the testing item was assessing
- Description and interpretation of the standard/scaled scores (include table with scores if appropriate)
- Description of student's strengths and weaknesses on this formal assessment
- All standardized tests must include standardized scores, unless the clinician is unable to establish a baseline/basal. In those instances, the provider must indicate that the test/subtest was attempted and describe (i.e., behaviors, etc...) that precluded the student from being able to complete the test tasks.

### **CLINICAL OBSERVATIONS AND ANALYSIS**

*\*Describe observations and analysis of each area below in narrative form. Do not state "within functional limits." Must report on all areas below to ensure the report is comprehensive.*

#### **Body Structures:**

- Neuromotor (*relating to nerves and muscles, and the communication between the muscular and nervous systems*):
- Musculoskeletal (*relating to the joints, tendons, ligaments, nerves, and muscles which support gross body structures such as the limbs, neck, and back*):
- Muscle Tone (*the resistance felt to movement or the tension in the muscles at rest*):
- Range of Motion (*amount of active [AROM] or passive [PROM] movement available at a joint and is necessary for movement*):

### **Body Functions:**

- Motor Planning (*the ability of students to imagine a mental strategy to carry out a movement or an action*):
- Postural Control (*ability of the student to assume and maintain postures against gravity*):
- Coordination (*the efficient use of body parts together to simultaneously perform an action or task*):
- Muscle Strength (*the ability of a muscle to produce force, which may result in the production or prevention of movement*):
- Endurance (*the ability to sustain contraction of a muscle or muscle groups against resistance for a period of time*):

### **Activity Limitations/Participation Restrictions:**

- Ambulation/Mobility:
- Transfers/Transitions:
- Navigating stairs:
- Participation in physical education:
- Cafeteria Skills:
- Arrival and Dismissal:
- Fire Drills/Evacuation:
- Bus Accessibility:

### **EQUIPMENT**

Is the student currently using equipment or support in the classroom? Description of trial equipment used during assessment. Did the IEP team consider Assistive Technology during the last IEP meeting? Is equipment recommended? Has the IEP team consulted with the Assistive Technology team for support/equipment options?

### **VALIDITY STATEMENT**

This section must answer the following three (3) questions: (1) Was the assessment procedure valid for the intended purpose? (2) Were the assessment procedures valid for the student to whom it was administered,

and the results are a valid report of the student's current functioning? (3) Were procedural modifications made when assessing the student to increase the validity of the results?

### SUMMARY

Summary of formal and informal assessment, observations, and interpretation. This should be written in paragraph format.

- Include student's strengths and areas of growth
- If re-assessment, compare results with previous test results. Can use chart/table if helpful
- Be sure to include the following (in paragraph/narrative form):
  - Body structures affect student's access to the school environment.
  - Bodily functions affecting student's access to the school environment.
  - Activity limitations/participation restrictions affecting student's access to the school environment.
  - Overall functional level within the school setting

### IMPACT ON LEARNING & PARTICIPATION

- Impact statements must include a clear explanation including at least one specific example of how disability impacts the student's achievement in the general education setting.
- If the results indicate that there are deficits or impairments, then the provider must indicate that there is no potential educational impact or difficulties accessing the school environment and/or curriculum.

### RECOMMENDATIONS

- Include strategies for teachers and parents based on student needs (must align with indicate areas of weaknesses identified in the report or concern areas stated by teacher or parent).
- Statements regarding eligibility and placement should defer to the MDT or IEP after all relevant data / assessments have been reviewed and discussed. **The following statement must be included:** *The results of this evaluation will be reviewed by the MDT to determine the need for physical therapy as a related service within their educational curriculum.*
- Do not use any references to whether the student qualifies/does not qualify OR make reference to the continuation/discontinuance of services OR service amount/frequency
- Do not recommend any additional evaluations, services, or equipment/materials that parents may expect DCPS to fund.

## Standards for Quality Assessments

When writing assessment reports, service providers should include all the components ***necessary to support the MDT on its mission to determine eligibility for special education and related services***, and adhere to the following criteria:

- The report should be devoid of educational/medical jargon and written with language that is understandable for all stakeholders involved.
- The language in the report should be sensitive in nature as it reflects the identified classification.
- The report should refrain from using absolute statements.
- The report should have the correct student's name and utilize consistent pronouns throughout.
- The report should be grammatically correct, and all data points should be sensitized in a way that answers the referral question(s) and incorporates all measures used via qualitative and/or quantitative assessment.
- The report should consistently contain scores, a description of all the tools used, interpretation of the results, and describe any concerns about validity.
- The report should be problem and/or issue focused and should clearly state and substantiate the impact of the student's behavior on their ability to access grade-level material, acquisition of academic goals and overall educational experience.
- Raw evaluation data or completed questionnaires are not considered reports and should not be included. In all cases, merely collecting data without analyzing and reporting what the data means is of little benefit.
- The report should consistently make student specific and detailed recommendations as appropriate, and always be written in the proper format.
- The report should include, in accessible language, practical strategies that school staff and families can use to help improve the student's academic and/or functional achievement.

**\*\*\*Please remember that the decision of qualifying a student for special education, occupational or physical therapy services and any other related services relies on the Multidisciplinary IEP Team, and it also includes recommendations/approval for time, duration, and amount of therapy. The eligibility for provision of related services should never be a unilateral decision of the occupational or physical therapist or any singular IEP team member.**

### Validity Statements

Validity statements are a requirement of all occupational therapy and physical therapy assessment reports. Validity statements are beneficial to the reader in ensuring that the results of the assessment are an accurate representation of the student's functional skill level. There are certain instances where caution needs to be taken when interpreting the results of an assessment, which may impact the validity of the test administration:

- Special accommodations are provided, which are not permitted per the administration manual of the assessment
- Medications were or were not taken that may/may not have impacted attention, focus, and/or behaviors
- Assessment was attempted, however based on the student's cognitive functioning and/or behaviors the assessment tool was not appropriate or did not accurately measure student's performance

- Child is bilingual and needed an interpreter when the assessment was administered
- Special seating needed
- The communication output of the student varied (i.e., the use of an AAC device or picture icons)

### Examples of Validity Statements

**Example 1:** The findings of this assessment should be reviewed with caution due to the student demonstrating non-compliance and work-refusal behaviors, therefore it may not be an accurate reflection of his abilities. Student required multiple redirections to tasks and additional repetition of instructions beyond that indicated in the assessment manual.

**Example 2:** The assessment procedures used throughout the testing sessions were valid for their intended purpose to assess the student's motor skills. Based on performance and observation, the procedures were valid and accurately reflected the student's current level of functioning. However, a French interpreter was used to read and translate the student's responses to increase the student's ability to comprehend information and answer questions to increase the validity of the results.

**Example 3:** The evaluation procedures included the use of standardized measures, informal assessment, observation in a variety of settings, and interviews of student, classroom teachers and parents. All tests were administered in the student's primary language and were administered by qualified personnel in accordance with the instructions provided by the test publishers. Tests were selected to provide results that accurately reflect the student's aptitude, achievement, and which are not influenced by impaired sensory, manual, or communication skills. Except where otherwise noted, the results of this assessment are believed to be valid.

### What to do when a quantitative (Standardized) assessment is not warranted or recommended

There are two types of assessments that typically guide our evaluation process, Quantitative (which includes the administration of standardized tools) and Qualitative. In an attempt to script the best possible learning profile of a student it is optimal that a combination of quantitative and qualitative assessments be conducted. This practice allows the professionals administering these assessments to drill down numerical outcomes and conduct cross analysis with all descriptions and anecdotal data.

### Rationale for Utilizing Qualitative Assessments

Standardized tests may not be easily administered according to the recommended procedures with certain populations (e.g., students who fail hearing screenings, students with severe cognitive or attention problems, students from culturally diverse backgrounds, etc....) In some cases, modifications of these procedures may yield important descriptive information about conditions under which the student's performance improves or deteriorates. When tests are modified in any way, modification should be reported in the validity section of the assessment report and test norms cannot be applied, as they are no longer valid. At this point, you should proceed to complete a qualitative assessment administering qualitative tools.

### Quantitative Assessment Method:

A quantitative assessment includes methods that rely on numerical scores or ratings. A quantitative measurement uses values from an instrument based on a standardized system that intentionally limits

data collection to a selected or predetermined set of possible responses. Quantitative assessment approaches work by the numbers, collecting, analyzing, interpreting, and charting results, trends, and norms. As such, this type of assessment in the educational setting allows for objective data and the ability to compare student performance across ages, grades, peers and oneself.

#### **Qualitative Assessment Method:**

A qualitative assessment gathers data that does not lend itself to quantitative methods but rather to interpretive criteria. This can include methods that rely on descriptions/ anecdotal information as opposed to numeric values. This type of assessment is more concerned with detailed descriptions of situations or performance; therefore, it can be much more subjective but can also be much more valuable when analyzed by an expert. This tends to be the case because it accounts for human behavior, emotions, needs, desires and routines, which naturally captures insight into the “why” not just the numerical outcome.

| <b>Quantitative Assessment Method</b>   | <b>Qualitative Assessment Method:</b>  |
|---|--|
| <ul style="list-style-type: none"> <li>▪ <i>Focuses more on numerical outcomes</i></li> <li>▪ <i>Focuses on average performance, comparison with peers</i></li> <li>▪ <i>More of an objective interpretation</i></li> </ul> | <ul style="list-style-type: none"> <li>▪ <i>Focuses more on contextual data</i></li> <li>▪ <i>Focuses more on individual performance and progress</i></li> <li>▪ <i>Considers performance outcomes based on exposures with environmental filters</i></li> <li>▪ <i>Subjective interpretation</i></li> <li>▪ <i>May be more time consuming</i></li> </ul> |

#### **A qualitative (informal) assessment should be utilized in the following types of scenarios:**

- When a student fails a hearing or vision screening, but proceeds with OT and PT assessment
- When a student’s behavior and/or attention impacts their ability to engage in the tasks of an assessment tool
- When a student is unable to achieve a basal score on the components of a standardized assessment
- When a standardized assessment tool has not been norm-referenced on the population that is being tested (i.e., student who speaks another language that the test was not normed on)
- When a student’s cognitive abilities and/or limited verbalizations may impact the student’s performance on a standardized assessment

#### **Definition of Descriptive Measures for Qualitative Assessments**

Below you will find terminology along with a corresponding description that is commonly found within comprehensive assessment reports. These terms are defined to assist providers with expectations and understanding the type of information that is included within reports.

- Record review (birth, developmental, medical, social, previous assessment data and educational histories)
- Direct Observation of the student within the natural environment/setting to elicit a representation of classroom function

- Parent/Teacher Interview (probing to determine level of demands within the communicative environment.
- Questionnaires and/or inventories that provide information regarding the student's communication abilities within the home and school settings, such as making request, length of MLU, joint attention, etc. (to be completed by the parent and/or teacher)
- A criterion-referenced assessment which compares a student's performance on specific skills, to a previously determined performance level. The criterion is based on expectations of what the child should be able to do.
- Dynamic assessment places emphasis on a student's learning potential rather than test performance by capturing the potential change in a student's performance on a task in response to specific facilitation techniques
- Play-based assessment uses free and structured play opportunities to observe and document the student's behavior as he/she interacts with toys and people.

### Format for Qualitative Assessment Reports

Report format for qualitative assessments should adhere to the outlined DCPS format as per the OT/PT Guidebook and maintain the headings and content areas. Below outlines the procedures for how to input information within certain sections of the report when utilizing qualitative assessments.

- Validity - This section should indicate why standardized tests were not used in the administration of the OT/PT assessment. It should also indicate that the findings of the assessment should be interpreted with caution secondary to issues indicated in the scenarios outlined in the "Determination of Appropriateness for Qualitative Assessment" section of this document. These are some of the situations where there could be potential invalidation of the findings within the assessment report.
- The "Recommendation" section needs to indicate the type of follow-up recommended if necessary, following the administration of the assessment, such as suggestions for future assessments (this could be to gain additional information needed to make determinations). An example of this is to rule-in/rule-out an impairment and the need for a re-evaluation following the outcome of any other assessment

### Triennial Assessments/ Reevaluations

Students placed in special education must have their individualized educational programs/services re-evaluated every three years to determine continued eligibility. The purpose of the triennial assessment is to determine:

- If the student is still eligible for services under IDEA
- Determine the student's present levels of academic achievement and functional needs
- Whether any additions or modifications to the special education services in a student's IEP are needed, such as a change in disability category.

After a thorough review of the information available regarding a student's present level of performance, the IEP team (including the parent) is responsible for deciding if new assessments are needed to address the above bulleted questions. The Analyzing Existing Data section of SEDS must be completed by the team members for all areas of concern as part of the re-evaluation process. Using this data, the team can determine if assessments are warranted.

Occupational and Physical Therapy assessments are not always necessary for re-assessments. The need for a formal assessment should be reviewed and discussed by the IEP team/MDT. Examples of when a formal Occupational Therapy or Physical Therapy assessment is not warranted for a triennial assessment, include:

- Standardized testing would not provide any additional relevant information.
- The student has demonstrated minor change in functional skills.
- There is sufficient anecdotal and informal assessment information to provide an accurate assessment of a student's needs and current levels of performance as documented in the Analyzing Existing Data section and under the Information Reviewed fax cover sheet.
- There is no change in eligibility or location of services.

If the decision is not to conduct new assessments, the parents must be informed of the school decision, reasons for it, and their right to request new assessments.

- Informed parental consent should be sought with due diligence by the school before any new assessments take place. The school division may proceed with a new assessment if the school can show that it has taken reasonable measures to obtain this consent and the parents have failed to respond. These attempts must be documented in SEDS.
- A triennial assessment must include new assessments if the parent requests it.
- A triennial assessment should include new assessments, if:
  1. Additional information is needed for continued placement and/or delivery of services.
  2. The IEP committee is considering a change of placement, disability, or eligibility.
  3. The evaluator determines that the previous assessment(s) is outdated, erroneous or inconsistent.

If the decision is to conduct new assessments, a comprehensive occupational or physical therapy evaluation must be conducted using the OT or PT re-evaluation template.

**\*\*\*All students must be reassessed in order to exit occupational or physical therapy services.**

## Independent Evaluations (IEEs)

There are times when an outside assessment is submitted to the public schools for consideration for the eligibility of a student with a suspected disability for the purpose of seeking placement in education programs or accessing services. An IEE can also be requested by a parent if the parent disagrees with a DCPS evaluation. Other sources for IEEs include the following:

- Ordered by Hearing Officer Decision (HOD)

- Agreed to in a Settlement Agreement (SA)
- Ordered by a judge in a Child and Family Service Agency (CFSA) or juvenile proceeding

A multidisciplinary (MDT) assessment team is required to review all relevant documentation and decide if data is sufficient and whether additional information is needed.

### IEE Checklist

Once an RSP receives an IEE, they must first complete the [DCPS Review of Independent Assessment checklist form](#).

When completing the DCPS Review of Independent Assessment Checklist form, the provider must indicate if the IEE will be accepted and meets the requirements for a DCPS Comprehensive Assessment. The IEE Checklist must be uploaded into SEDS within **5 days** of receiving the IEE from the Case Manager/LEA RD.

### IEE Report Elements

A DCPS Occupational Therapist or Physical Therapist must review all independent OT or PT assessments. In addition to the completion of the form, a typed review of the report must be attached to the IEE and uploaded into SEDS. The review report of an independent report must include the following components:

- Place on DCPS letterhead
- Title: Independent Assessment Review
- Student's identifying information
- Background information
- Teacher and/or parent interview
- Classroom Observation (required)
- Assessment Protocol
- Results

Independent assessments must meet DCPS' criteria of a comprehensive OT or PT assessment per the DCPS OT/PT Eligibility / Dismissal Criteria. There may be occasions where the administration of additional test batteries are required (i.e., vocabulary batteries, a complete language battery, etc.). In those instances where a provider needs to complete additional testing for the student to have a comprehensive speech and language assessment, the provider must use the IEE review and title it "Additional Testing Completed".

### IEE Timeline

When a school receives an IEE, it is the LEA RD/Case Manager's responsibility to upload the IEE into SEDS **and** inform the provider via email (with the IEE attached) of the IEE. Once the provider receives the IEE, the RSP has **5 days** to complete the IEE Checklist form. If no additional test batteries are needed to make the IEE comprehensive, then the RSP has 20 days (from the date of receipt) to upload the IEE Review report.

For IEEs that require additional testing, the AED section will need to be completed by the Multi-Disciplinary Team. The AED meeting should be scheduled within two days of receiving the IEE Review Form. At the AED meeting, previous data is reviewed, and parental consent should be obtained by the LEA RD/Case Manager and the appropriate evaluation should be ordered in SEDS by the LEA RD or Case Manager within 2 days of signed parental consent. Once parental consent is obtained, the provider has 45 days to complete the additional testing, write the report and upload the written report into SEDS. The MDT reconvenes to review the additional assessment report(s).

## OT/PT IEE Report Template

### Occupational Therapy/Physical Therapy Independent Assessment Review

|  |  |
|--|--|
| <b>Name:</b> Name of student   | <b>DOE:</b> Date of Assessment                 |
| <b>DOB:</b> Date of Birth  | <b>DOR:</b> Date of Report/Review              |
| <b>SID#:</b> student ID number   | <b>Grade:</b> The grade that the student is in |
| <b>CA:</b> Chronological age   | <b>School:</b> Name of Attending School        |
| <b>Examiner:</b> Name and credentials  | <b>Teacher:</b> Name of student's teacher      |
| <b>SEDS Parental Consent Date:</b> Date of signed parental consent (if additional testing is required) |  |

#### History/Background/Record Review

- Pertinent birth, medical, and academic history and information from student file
- Previous OT/PT Assessment results
- Progress on interventions (MTSS or OT/PT IEP goals)
- When conducting a re-evaluation, this section must include information regarding previous therapy goals and progress made/performance
- When referring to previous assessments, state the date of report/assessment, name and credentials of the examiner, findings and level of severity

#### Teacher Interview

- Report information from the teacher and/or parent that is gathered from interviews, rating scales, or questionnaires to describe student's current level of functioning and support possible educational impact.

#### Parent Interview

- Report information from the teacher and/or parent that is gathered from interviews, rating scales, or questionnaires to describe student's current level of functioning and support possible educational impact.

#### Classroom Observation

- Report information from observing the student engaged in tasks or activities related to the area of concern within the classroom setting.
- Indicate the type of class/setting student was observed in along with their participation and engagement in the tasks.

- Be sure to address information as it pertains to motor skills, self-regulation, attention and focus, etc.

### Assessment Protocol

- List of formal and informal assessment procedures used in completing the assessment

### IEE Results

- Include assessment result information from the IEE for each area of communication addressed. The information included should be informal and formal assessment information.
- This section should also include test findings and interpretation of the scores from the reviewing related service provider
- For each formal or informal assessment result, an educational impact statement must be included. The educational impact statement answers the question of how the student should perform based on the results of the assessment.

### Additional Assessment Data

- In the event additional assessment data is required, this section will include formal/informal assessment information for the additional testing completed
- Descriptions of what the test/subtest measured
- Description of what the tasks were supposed to do to indicate the skill
- Results and the interpretation of the standard/scaled scores for each test and/or subtest given
- Qualitative description of the student's performance. Indicate the student's strengths and weaknesses as it pertains to the student's performance on the tests and subtests
- For each formal or informal assessment result, an educational impact statement must be included. The educational impact statement answers the question of how the student should perform based on the results of the assessment.

### Summary

- Summary of formal and informal assessment information/findings.
- Information on the educational impact of the student's abilities must be discussed.
- Impact statements must include a clear explanation including at least one specific example of how disability impacts the student's achievement in the general education setting
- If the results indicate that there are no motor/sensory impairments, then the provider must indicate that there is no potential educational impact.
- For re-evaluation reports, there must be a comparison statement regarding the current findings of the assessment report with results/performance from previous assessment reports.

### DCPS' Recommendations

- Statements regarding eligibility and placement should defer to the MDT or IEP after all relevant data / assessments have been reviewed and discussed.
- Do not use any references to whether the student qualifies/does not qualify OR refer to the continuation/discontinuance of services OR service amount/frequency
- Strategies for teachers and parents to improve functional skills based on student needs
- The strategies must align with areas of weaknesses identified in the report
- If there were no areas of weaknesses, then the strategies should align with the referral concerns.

## Untimely Assessment Due Diligence

All reports that are late or are incomplete will be considered Untimely. In those cases, please adhere to the Missed Related Services and Untimely Assessment Guidelines developed in **April 2017**. Please see Appendix for the Missed Related Services and Untimely Assessment Guidelines.

## Alternative Assessment Reports

An alternative assessment report is the report format when parental consent is received to conduct an assessment, and the student is not available to conduct portions or all of the evaluation process. The process for an **alternative assessment** should only be followed if **all** of the following conditions have been fulfilled:

- You have made at least 3 documented attempts to assess the student, and the student was uncooperative or absent each time.
- You have been in communication with the school staff (Case Manager, Special Education Coordinator, or Administrator) about the case, and they have not been able to assist in making the student available for testing.
- You have spoken to the parent/guardian about the case OR you have confirmed the phone number for the parent/guardian and name/contact information of this individual with school staff, and you have left at least three voice messages (one after 5pm) for the parent and they were not returned.

This process should not be followed if:

- You have not tested the student because you were unable to keep a scheduled appointment for any reason
- You have not successfully scheduled an appointment because you are waiting to hear back from school staff

An **alternative assessment report** should include the following:

- An explicit explanation of why a complete battery of testing measures was not conducted
- A chronological reference to each act of due diligence conducted by the provider. This includes information you sent or provided to the parent/guardian in any format, explaining the scope of the testing you intended to conduct and requesting parental assistance make the student

available for testing and to be present on the day of the evaluation. Include dates of phone calls and/or letters sent to caregiver for this purpose.

- Explain your interaction with the LEA/SEC, case manager, and school staff. Include reference to any communication that the LEA or school staff has made to the parents regarding this matter.
- Title your report as **“Occupational/Physical Therapy Data Review Evaluation”**.

#### *Alternative Assessment Report Format*

In the absence of new test data, your report should emphasize a robust summary of existing data based on records review, interviews with all school staff who interact with the students who are available, and parents/guardians. The Alternative Assessment Report should contain the same mandatory elements of a full occupational or physical therapy evaluation and follow the proper format. Within each area of communication, the following should be emphasized:

- Work samples or notes from the student’s classroom teacher
- Teacher’s concerns/observed difficulties as they pertain to academics affected by the areas of concern
- Accommodations and adaptations the classroom teacher has made to mitigate/remediate deficits, and results.
- Information on the student’s cooperation towards the implementation of those accommodations and adaptations.
- Previous assessment reports
- Progress reports by related service providers (where relevant)
- Data from the Classroom observation (if completed)

In the recommendations section of the alternative assessment report, the RSP must state that you or another DCPS provider may complete the full range of initially recommended testing if upon review of this report by the IEP team both of the following statements is true:

1. The team (or parent) still believes there is not enough data available to make an eligibility determination; AND
2. There is reason to think that the factors that previously inhibited you from completing the testing will be resolved.

## CONFIDENTIAL

Occupational Therapy Data Review Evaluation or Physical Therapy Data Review **Evaluation**".

## STUDENT IDENTIFYING INFORMATION:

|                                       |  |
|---------------------------------------|--|
| <b>Name:</b> Name of student          | <b>DOE:</b> Date of Assessment                 |
| <b>DOB:</b> Date of Birth             | <b>DOR:</b> Date of Report/Review              |
| <b>SID#:</b> Student id number        | <b>Grade:</b> The grade that the student is in |
| <b>CA:</b> Chronological age          | <b>School:</b> Name of Attending school        |
| <b>Examiner:</b> Name and credentials | <b>Teacher:</b> Name of student's teacher      |
| <b>Parent Consent Date:</b>           |  |

## SECTION II. BACKGROUND INFORMATION:

- Background History and Record Review:
  - Birth history:
  - Medical/Physical history:
  - Psychosocial history:
  - Cognitive history:
  - Academic history:
  - Previous Services:
- Student's current program and support consists of:
- Progress on intervention (MTSS or Occupational/Physical Therapy IEP goals)
- Reason for Referral:

## SECTION III. ASSESSMENT PROTOCOL:

- Record Review
  - SEDS Review, service trackers from RSPs
- Interviews
- Clinical Observations, Classroom Observations and Clinical Assessment
- Analysis of Work Samples
- Previous assessment reports
- Standardized/Non-Standardized Testing

## A. Interviews

- Classroom Teacher Interview:
  - Teacher's concerns/observed difficulties as they pertain to academics affected by the areas of concern
  - Accommodations and adaptations the classroom teacher has made to mitigate/remediate deficits, and results.
  - Information on the student's cooperation towards the implementation of those accommodations and adaptations.
- Special Education Teacher Interview:
- Parental Interview:
- Other Related-Service Provider Interview:

- Student Interview:

### B. Testing Attempts

- An explicit explanation of why a complete battery of testing measures was not conducted
- A chronological reference to each act of due diligence conducted by the provider. This includes information you sent or provided to the parent/guardian in any format, explaining the scope of the testing you intended to conduct and requesting parental assistance make the student available for testing and to be present on the day of the evaluation. Include dates of phone calls and/or letters sent to caregiver for this purpose.
- Explain your interaction with the LEA, case manager, and school staff. Include reference to any communication that the LEA or school staff has made to the parent regarding this matter

### RECOMMENDATIONS:

- Your report must state that you or another DCPS provider may complete the full range of initially recommended testing if upon review of this report by the IEP team both of the following statements are true:
  1. The team (or parent) still believes there is not enough data available to make an eligibility determination; AND
  2. There is reason to think that the factors that previously inhibited you from completing the testing will be ameliorated.

Date

## Closing Out Assessments

Upon completing an assessment, the report must have an e-signature, saved as a PDF, uploaded and closed out in SEDS on the same date as the SEDS report completion date. The following steps should be taken to enter and submit assessment results.

### Creating an Electronic Signature

- Using a Blank Sheet of paper – Sign your Signature to the sheet of paper
- Go to a copy/fax machine with scanning capabilities. Scan the document
- Enter the destination email (which should be your dc.gov email address)
- Once the scanned signature has been received in your email. Save it as a JPG or Picture file for later use (suggestion: save it as “ESignature” so you’re able to find it for future uses)

### Adding Your Signature to Assessment Reports (prior to uploading report into SEDS)

- Open your document or assessment in Microsoft Word
- Go to the signature line of the document
- Click Insert Picture
- Select the file containing your signature and Click Insert

### Entering Assessments Results

- To enter results for a completed assessment, click the “Results” button in the appropriate assessment type column.
- You will be taken to a separate details page for the assessment type you selected.
- Enter the date assessment completed.
- If applicable, you may indicate which tools you used as part of the assessment by selecting from the drop-down menu and clicking the “Add Assessment Tool” button.
- In the areas addressed by this assessment section, select the appropriate areas to be considered for the student (ex. Motor Development).
- For each area selected, complete a statement of strengths and concerns identified by the results of the completed assessments.
  - TIP: The list of areas that appears is based upon what was selected on the Analyzing Existing Data page as an area where more information was needed.

### Submitting Assessment Reports

- Assessment reports must be submitted in SEDS by uploading a PDF version of the report. *Reports should not be faxed or copied or pasted in SEDS.*
- In order to create an EasyFax cover sheet, first select the “Fax” option in the drop-down menu, then click the “Create Occupational Therapy Assessment Report Cover Sheet” or “Physical Therapy Assessment Report Cover Sheet” button.
- The cover sheet will appear in a separate document table.
- Attach your PDF version of your assessment report to the coversheet.
- To submit assessment results, click the “Submit Assessment Results” button.
- After you submit the results, you will no longer be able to edit the information on the page.

### Emailing the Case Manager

- Click the “Email Case Manager” button to access the **Send Email** composition page.
- The *To* and *from* address fields are pre-populated based on the user information available in the system.
- The subject link will be “Assessment Completed”.
- In the body of the email, the text will indicate the type of assessment (OT or PT) that has been completed, along with the *Date of Request*, the *Date Due* and the *Date Completed*.
- Add additional comments in the text field if applicable.
- Click the “Save & Continue” button to send the email and return to the previous page.

It is expected that all providers upload e-signed PDF assessment reports. Completed assessments must be uploaded and closed in SEDS within 45 days from the date of consent. Faxing and copying and pasting into the summary section are no longer an acceptable format for submission.

Assessment timeliness will be determined from the initial upload date, which should correspond with the assessment completion date entered in SEDS. All reports that are late or are incomplete will be considered untimely. Please be sure to document and contact your Program Manager if there are any barriers to completing assessments in a timely fashion.

## Close Out Procedures: FAQ

### Canceling Assessments in SEDS

*Scenario One:* Staff orders assessments and the correct provider was not at the table to say assessment was warranted. If the provider doesn't agree assessment is needed.

*Response:* The RSP should call LEA Rep or SEC to cancel the assessment. No need for deletion. *Follow Up*

*Scenario Two:* School refuses to cancel assessment.

*Response:* Contact your PM to reach out to the school's SES

### Deleting Assessment Reports Uploaded in SEDS

*Scenario One:* Assessment was uploaded for the wrong student by the provider.

*Response:* The provider should upload a new assessment report with the correct student's name and inform the upload. Provider should escalate to [spedoda.dcps@dc.gov](mailto:spedoda.dcps@dc.gov), to confirm correct student was uploaded and deletes the erroneous report.

*Scenario Two:* Team reviewed assessment at table, but parent wants to amend report – e.g., correct incorrect information. Report is uploaded into SEDS.

*Response:* Help Desk will instruct the provider/user to upload new reports and keep the old one in there. The provider must title the report "Updated" and have the same name as other report.

*Scenario Three:* The provider states report was uploaded into SEDS, but all the pages are not showing.

*Response:* Won't delete original fax, but provider can upload the full completed report again.

*Scenario Four:* None of the above.

*Response:* Contact ODA SEDS Help Desk staff.

Please refer to your SEDS manual for additional information located at the following website:

<https://osse.pcgeducation.com/dcdcps>

## Bilingual Assessments and Interpreter Request Process

The Individuals with Disabilities Education Act (IDEA) regulations require assessments and other evaluation materials to be provided and administered in the student's native language or other mode of communication.

When a student has gone through the referral process and it is concluded based on the results of the English Proficiency Test that he/she needs to be assessed in their native language, the Special Education Coordinator will forward a referral package for a bilingual assessment. It is still necessary for all of the pre-referral steps, including intervention, to be completed prior to the referral package being forwarded to the Bilingual Team.

Currently DCPS does not have an OT or PT as part of the Bilingual Team. OT and PT staff will need to request an interpreter.

### DSI Related Services Interpreter Request Process

The Division of Specialized Instruction (DSI) Related Services Interpreter Request process allows Related Services providers (RSPs) to formally request interpreter/translation services. Interpreter/translation services may be requested to support RSPs while conducting student evaluations and assist parents participating in student meetings. All requests for interpreter/translation services require the RSP to submit an Interpreter Request Form or filling out the form electronically via the MS forms link (please see appendix).

An interpreter may be necessary to facilitate the bilingual assessment of ELL students. An interpreter may also be necessary to facilitate review meetings or other MDT meetings with non-English speaking parents. **Scheduling an interpreter for the meeting is the responsibility of the LEA Representative. Scheduling for an interpreter for testing is the responsibility of the assigned provider or evaluator.**

Requests can be made for the following services:

1. Interpretation/translation in the student's native language during evaluation
2. American Sign Language services
3. Translation of student assessments:

<https://forms.office.com/Pages/ResponsePage.aspx?id=7kagKk6zM0qSt5md8rwKMgoYF525eB5LhdoLQ3f1ATFUNjNNODRCQTdFNTVDQVVaVIFLN0pIOFJWSi4u>

The information below outlines the process to secure an interpreter for testing that must be completed by the provider or evaluator:

1. LEA orders the assessment in SEDs and assigns the assessment to the school's assigned provider
2. The provider completes the Interpreter Request form using the following link:  
<https://forms.office.com/r/u0fx3SU6TP>
3. The DSI point of contact will identify a vendor to complete the interpreter services and provide confirmation of interpreter/translation services at least two days prior to the date of services
4. Upon completion of interpreter services, the provider sends a follow-up email to DCPS SPED Translations at [spedtranslations.dcps@k12.dc.gov](mailto:spedtranslations.dcps@k12.dc.gov). Confirming the services were rendered with attached evaluation form (interpreter should provide form for the provider to complete at the time of service). All evaluation forms should be sent within 2 days of completed interpreter services.

Refer to the DCPS Bilingual Assessment Referral Guidelines.

### How to Use an Interpreter

Prepare the interpreter by using the Briefing, Interaction and Debriefing (BID) process:

1. **Briefing**
  - Establish Seating Arrangement.
  - Provide overview of assessment purpose, session and activities.
  - Review student behaviors and characteristics that may impact; Discuss plans in case the child is not cooperative.
  - Discuss issues of confidentiality and its boundaries.

- Provide protocols, interviews, materials in advance so that the interpreter can become familiar with them.
- Discuss technical terms and vocabulary ahead of time so that the interpreter may ask questions to verify concepts.
- Discuss cross-cultural perspectives. The interpreter may provide the OT or PT with rules consistent with the student's background
- Explain that the interpreter will need to limit non-verbal cues, such as hand gestures or vocal variations that may impact assessment results
- Remind the interpreter to take notes on the student's responses

## **2. Interaction**

- Develop an agenda for the assessment session and review it with the interpreter interaction
- Welcome students, introduce participants and establish rapport
- Inform the student of the role of the interpreter and the role of the OT or PT
- Speak directly to the student avoiding darting eyes between the interpreter and student
- Speak in short, concise sentences and allow time for the interpreter to translate everything precisely
- Pause frequently to allow the interpreter to translate information
- Avoid oversimplification of important explanations
- Avoid use of idioms and slang

## **3. Debriefing**

- Review student responses
- Discuss any difficulties in the testing and interpretation process

## Special Education Eligibility Meeting and Determination

---

### OT/PT Participation in an Eligibility Meeting Discussion

For an IEP team or related service provider to consider the need for services, a student must be experiencing difficulties that impede the student's learning. The student's response to evidence-based, pre-referral interventions, and applicable outside reports should be reviewed in the process of making this determination. To avoid the inappropriate identification of students requiring OT or PT services, the IEP team must determine these needs and include the parents/guardians and either an occupational or physical therapist.

When considering occupational and physical therapists, the IEP team should start with the basic question, "What does the child need to do in order to be successful in their educational program?" The functional skills a student needs to perform in the educational setting are dependent on a variety of factors, including the student's diagnosis, present level of function, educational program, and overall developmental, cognitive, and academic abilities. Some skill deficits may not directly impact educational progress and may not constitute educational need. In order to receive services at school, the impairment must be linked to the student's inability to access the curriculum and to achieve educational goals and objectives on the IEP. Also, the student's needs must be met in the least restrictive environment.

The team may consider the following conditions when determining that a child needs OT or PT to benefit from the education program, progress in the education setting and/or access the curriculum:

- A student's educational performance in the general education or special education program is negatively impacted if needs are not addressed by OT or PT, and he/she is not functional within the educational environment.
- Students require OT or PT as a related service in order to benefit from his or her special education program.
- Students do not consistently demonstrate behaviors that would inhibit participation in OT or PT, such as lack of cooperation, motivation, or chronic absenteeism. In those circumstances, the IEP team should consider the initial eligibility decisions since the behaviors may reflect social maladjustment, environmental, cultural, or economic factors rather than an actual disability. The IEP team may also explore alternative services or strategies to remedy the interfering behaviors or conditions.
- Students' needs cannot be served by an alternative program and/or service, as determined by the IEP team.
- Changes in medical or physical status do not make therapy contraindicated.
- Students graduate from high school with a diploma.
- Student reaches the age of twenty-two years.
- When the student's anticipated goals and expected outcomes related to OT or PT intervention have been met for a particular episode of care.
- When based upon the therapist's judgment it is determined that the student will no longer benefit from therapy.

## RELATED SERVICES ONLY IEPS

Per [OSSE Chapter 30](#) regulations and guidelines, Speech and Language services can serve as specialized instruction on an IEP. Occupational therapy and physical therapy are related services, meaning that they are embedded within an IEP to support the student with their academic goals.

If a student is referred for OT or PT related concerns, the following steps should occur:

- The team should analyze existing data for all areas of concern, ensuring that the team includes data related to the *educational* area in which the student is being impacted due to OT or PT related deficits, in addition to the motor skills or health/physical sections.
- A team meeting should be held to review the existing data and determine whether evaluations are recommended; if evaluations are recommended, the team should follow the eligibility procedures and timelines
- If the team determines that the student is not found eligible for special education services, but the team is recommending OT or PT support, the team should consider the following:
  - Are the student's deficits in the areas evaluated by OT or PT impacting the student's access and/or participation in their education? If so, which areas are impacted?
  - Is the child eligible for the disability classification of developmental delay?
    - If so, can academic goals be added in areas that are impacted by the deficits found during the OT/PT evaluation process? (If so, further educational testing may need to be completed)
  - Can the student's challenges be resolved by accommodations or modifications to the environment, instructional methods, materials, and/or assistive technology?
- Additional considerations
  - The team *may* want to consider if the student is eligible for a 504 plan. However, it is important for the team to remember that 504-plans are meant for students who require accommodations to their educational plan due to a "physical or mental impairment that substantially limits one or more major life activities", and not all students who are not found eligible for an IEP will qualify for a 504-plan.

### Providing Documents to Parents Before and After Eligibility and IEP Meetings

D.C. Municipal Regulations require schools to provide parents with all related documents before Eligibility and IEP meetings. Please pay close attention to action items for OT/PT providers (i.e., make sure that all of their reports are available to be sent to parents by the appropriate dates and following up with LEA Rep to make sure that their reports were included, and Communications log entry was made).

### At least ten (10) business days before scheduled meetings, schools must:

1. Send parents all documents that will be discussed during that meeting must be sent home to parents and the Pre-Meeting Packet letter that explains the information should be sent with packet (can be found in Canvas and in Appendix).
2. A Communications Log entry must be completed after providing parents with documents.

3. If any of the IDEA required IEP team members will be unable to attend or participate by phone, a Mandatory IEP Meeting Excusal Form is required.

The following chart describes the most common documents that must be sent home prior to Eligibility/ IEP Meeting:

| Documents to Provide Before an Eligibility Meeting  | Documents to Provide Before an IEP Meeting   |
|---|--|
| Analyzing Existing Data Report  | Draft IEP  |
| Copies/ results of any formal or informal assessments and/or evaluations (educational, FBA, OT/PT speech, psychological, etc.)                        | ESY Criteria Worksheet   |
| Any other additional relevant documents that will be discussed at the meeting.  | Post- secondary transition plans and any informal vocational assessments or surveys (students 14+) |
| If any of the IDEA required IEP team members will be unable to attend or participate by phone, a Mandatory IEP Meeting Excusal Form is also required. | LRE observation reports (if applicable)  |
|   | Transportation forms (if applicable)   |
|   | Dedicated aide observation reports (if applicable)   |
|   | Any data/documents related to possible change of service hours                                     |
|   | Any other documents that will be discussed in the meeting.   |

Within 2 business days after an Eligibility or an IEP meeting, the school must:

1. Send the **finalized documents to parents, including:**
  - Finalized Eligibility or IEP
  - Signed Eligibility or IEP signature page
  - Eligibility or IEP PWN
2. A Communications log entry must be completed after providing parents with documents.

### Middle School and High School Transition

*The Enhanced Special Education Services Act of 2014 (DC Law 20-195; [DC Official Code § 38-2614](#) and [§ 38-2561.02](#)) Made important updates to special education services in DC, including:*

- **Secondary Transition:** Lowers the minimum age for the creation of secondary transition plans for students with disabilities from age 16 to 14, “beginning July 1, 2016, or upon funding, whichever occurs later.”

**Occupational Therapist and Physical Therapist Roles in Transition Planning**

| <b>Occupational Therapist</b>   | <b>Physical Therapist</b>  |

## IEP Process

Once student's eligibility for special education and related services have been determined, the team must consider the following while developing the IEP:

### Present Levels of Academic Achievement and Functional Performance (PLAAFP)

Traditionally, IEPs have focused on helping students develop basic academic and functional skills with little connection to a specific academic area or grade-level expectations. In contrast, standards-based IEPs are directly tied to content standards; both the student's present level of performance and annual academic IEP goals are aligned with and based on the Common Core State Standards (CCSS,) creating a program that will assist the student in reaching greater academic proficiency.

### Writing PLAAFP and Goals for IEP (also referred to as PLOP)

The first main element of an IEP is a statement of the student's present levels of academic achievement and functional performance (PLAAFP). The purpose of the PLAAFP is to describe the problems that interfere with the student's progress in the general education classroom and with the general education curriculum. The PLAAFP is the foundation to develop the student's IEP and measure the student's short-term and long-term success. From the PLAAFP, the IEP team develops an IEP that identifies the student's appropriate goals, related services, supplementary aids and supports, accommodations, and placement. The IEP team should include goals as well as any necessary accommodations and/or modifications, related service, or supplementary aides and supports to address any identified area of weakness.

| Academic Achievement   | Functional Performance  |
|--|---|
| <ul style="list-style-type: none"> <li>Reading</li> <li>Written Language</li> <li>Mathematics</li> </ul> | <ul style="list-style-type: none"> <li>Physical, Health, Sensory Status</li> <li>Emotional/Social/Behavioral</li> <li>Communication difficulties</li> <li>Vocational skills (ages 15 and older)</li> <li>Daily life activities</li> </ul> |

Anyone who reads a student's PLAAFP should have a comprehensive understanding of the student's strengths and weaknesses. The PLAAFP should contain information on both the student's academic achievement and functional performance:

#### Data Sources

In order to draft a student's PLAAFP, the IEP team should consider data from a variety of sources. Data sources for the PLAAFP include:

|   |  |
|---|--|
| Most recent special education evaluation(s) | Student performance on DC-CAS/DC-CASalt            |
| Teacher report(s)                           | Classroom observations                             |
| Parental input                              | Cumulative records: grades, attendance, retentions |
| Discipline records                          |  |

**Three Components in Writing a PLAAFP statement**

|   |   |
|---|---|
| <b>Component 1 -</b><br>Present Levels of Academic Achievement and Functional Performance:  | A description of the student's strengths and weaknesses using multiple sources of current data.   |
| <b>Component 2 -</b><br>Description of how the student's disability affects the student's <b>access</b> to the general education curriculum   | Focus on the skill sets the student requires <u>to access the general education curriculum</u> , as well as functional performance, that impacts the student's ability to receive instruction in the general education setting.   |
| <b>Component 3 -</b><br>Description of how the student's disability affects the student's <b>progress</b> in the general education curriculum | Describe how disability <u>affects the student's progress</u> in the general curriculum. Identify the previous rate of academic/developmental growth and progress towards meeting grade- level standards/milestones. Convey the unique challenges or barriers that exist for the student as a result of disability. |

**PLAAFP Linked to Goals**

PLAAFP are inherently linked to the development of annual goals because they serve as baseline data that describe how the student is currently performing academically and functionally. Therefore, PLAAFP should be used as the starting point in developing goals. For each area of weakness identified in the student's PLAAFP, the IEP team must develop appropriate goals.

The present levels section provides insight into the relative strengths and needs of the student. Anyone who reads this section of the IEP should get a quick, yet comprehensive understanding of where the student is struggling and how to capitalize on the student's strengths. When writing the present levels section, teachers should have access to formal assessment results, and the classroom data – both quantitative and qualitative – that has been collected over the course of a year.

**Writing IEP Goals**

IDEA (the Individuals with Disabilities Education Act) 2004 wants to ensure that children with disabilities have "access to the general education curriculum in the regular classroom, to the maximum extent possible, in order to [20 U.S.C § 1400(c)(5)(a)(i)] meet developmental goals, and to the maximum extent possible, the challenging expectations that have been established for all children; and (ii) be prepared to lead productive and independent adult lives, to the maximum extent possible."

DCPS requires goals and objectives to be written in a S.M.A.R.T. format:

**S** Specific

**M** Measurable

- A** Achievable
- R** Realistic and relevant
- T** Time-limited

**Specific** goals and objectives "target areas of academic achievement and functional performance. They include clear descriptions of the knowledge and skills that will be taught and how the child's progress will be measured." To write specific goals and objectives the Related Service Provider should ask themselves the questions, "who, what, when where and how?"

**Measurable** means that the goal can be measured by counting occurrences or by observation. "Measurable goals allow parents and teachers to know how much progress the child has made since the performance was last measured. With measurable goals, you will know when the child reaches the goal." The Related Service Provider should ask the question, "How can I measure this goal?"

- Action words should be used— "IEP goals include three components that must be stated in measurable terms: direction of behavior (increase, decrease, maintain, etc.), area of need (i.e., reading, writing, social skills, transition, communication, etc.), and level of attainment (i.e., to age level, without assistance, etc.)."

**Achievable (attainable)** goals which respond to the questions; "Can the student meet the goal? "Is the goal too difficult to be met, considering the student's physical, cognitive, social and environmental barriers?"

**Realistic and Relevant** goals and objectives "address the child's unique needs that result from the disability. SMART IEP goals are not based on district curricula, state or district tests, or other external standards". The Related Service Provider should ask the question "Is this goal meaningful to the student?"

**Time-limited** goals enable you to monitor progress at regular intervals. The Related Service Provider should ask the question, "What kind of time frame should be used?"

Annual goals and objectives are required for students that are taking an alternative assessment (portfolio).

In addition to writing goals that fit the S.M.A.R.T format, the provider must also learn to use the data provided by the educational team and progress monitoring tools employed by the Social Worker (per e.g., Ohio Scales, CPSS, SDQ) which can provide valuable help in formulating goals. This data can include test results, assessments, benchmark tests and studies conducted on, with or for the student, which are available in Easy/IEP for review and can be provided to the provider by the student's school or by the caregiver<sup>2</sup>.

**All DCPS goals should be linked to Common Core State Standards (CCSS)**

## Extended School Year (ESY)

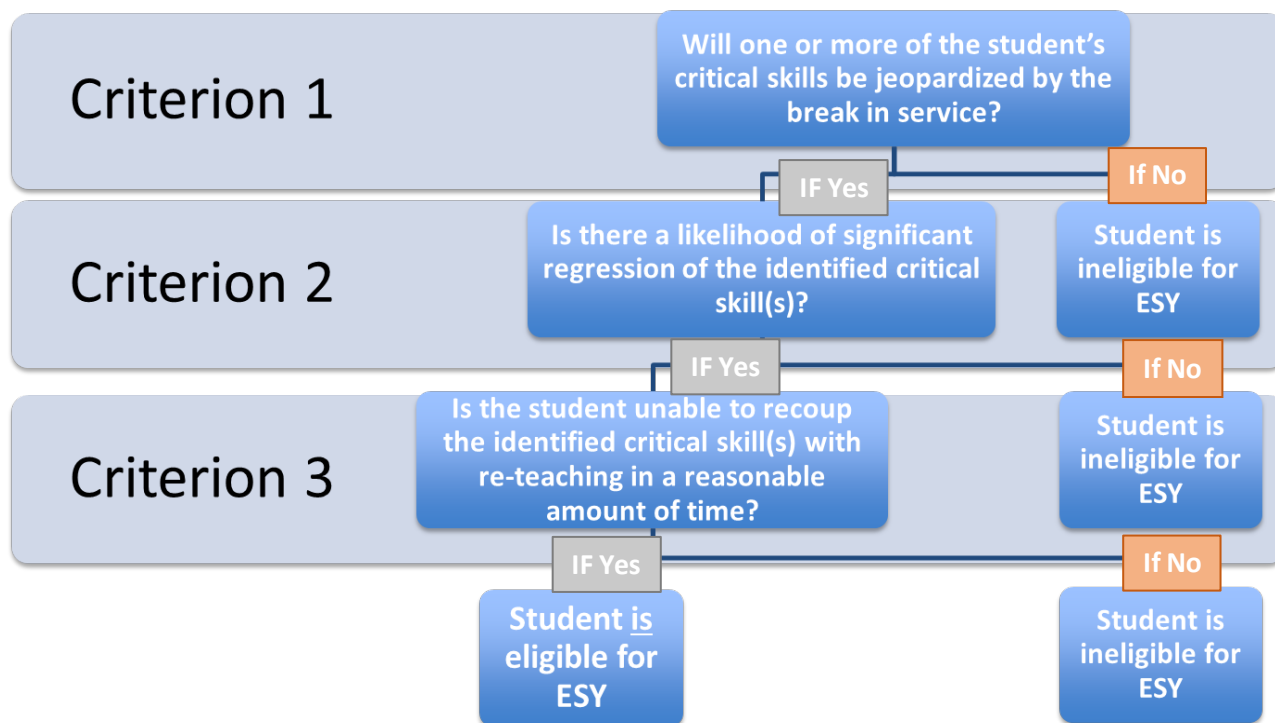

### Definition of ESY

- ESY services are specialized instruction and/or related services provided to a student with a disability beyond the regular school year
- Features of ESY:
  - Ensures students with disabilities can access FAPE
  - Provided in accordance with student's IEP
  - Provided at no cost to parents
  - Must be individualized to the unique needs of each student
  - Provided in accordance with OSSE standards

### ESY Determination Timeline

- **All** ESY decisions must be made between **DECEMBER 1<sup>st</sup> and APRIL 1<sup>st</sup>**.
- If a student has an IEP date *after* April 1<sup>st</sup> and you think s/he may be a candidate for ESY, please plan accordingly and **hold the annual meeting early** to fall within this timeframe.
- If an ESY eligibility decision needs to be reconsidered due to new data, you should hold an amendment meeting between **DECEMBER 1<sup>st</sup> and APRIL 1<sup>st</sup>** to amend the IEP.

## Analysis of Existing Data ESY Eligibility Determination Criteria Decision Tree

\* For more information regarding ESY Related Services, please refer to the DCPS ESY Guidelines on CANVAS.

## Dismissal Guidelines for OT and PT Services

IDEA requires that the IEP service provision system be driven by the child's individual needs. Changes in service delivery (such as changes in frequency, duration, location, or discontinuation of services) must therefore be determined on an individual basis.

Prior to a reduction or exit recommendation for services you need to prepare your IEP team, parents and teachers to support. You can do this by obtaining:

- Teacher buy-in
  - Provide specific strategies to support the carryover and generalization of the targeted skills
  - Use the morning grade-level collaborative blocks to train teachers on specific techniques
  - Email the teachers to check in on how the student is performing on their off-therapy week.
  - Provide teachers with data sampling forms to support your consultation sessions.
- Parent buy-in
  - Send carryover activities to the parents on a regular basis.
  - Invite the parents to observe your session.
  - Send progress notes home. Ex. Note from the OT

- Exit Planning
  - Discuss evolution of services and goal of services at initial eligibility meeting
  - Prepare the student and team with strategies, accommodations, and modifications to ensure access to education after service is removed
  - Generalize skills learned within therapy sessions to the educational environment through push-in services, co-teaching, co-treatment, etc.

**Required steps for reducing a student's services**

If a student meets one or more of these criteria, you may want to consider a reduction or dismissal from services. It is time to develop a transition plan:

- Alter service delivery:
  - Increase group size
  - Modify the location of the services
  - Modify the frequency (i.e., 120 mins per month, 30 mins per week, and 60 mins every other week)
  - Check with classroom teacher on the off-therapy week for signs of regression.
- Have student complete class work rather than clinicians create activities to align learned skills with CCSS and educational curriculum

**Required documentation to reduce services**

- Service tracker notes
- Quarterly progress notes
- Teacher report
- Student work samples if applicable

**Dismissal Criteria for Exiting Students from OT and PT Services**

The team may consider the following conditions when determining that a child no longer needs OT or PT or either one to benefit from the education program when the:

- Student's needs being addressed by OT or PT no longer negatively affect their educational performance in the general education or special education program, is functional within the educational environment, and therapy services are no longer indicated.
- Students no longer require OT or PT as a related service in order to benefit from his or her special education program.
- Students consistently demonstrate behaviors that inhibit progress in OT or PT, such as lack of cooperation, motivation, or chronic absenteeism. In those circumstances, the IEP team should consider the initial eligibility decisions since the behaviors may reflect social maladjustment, environmental, cultural, or economic factors rather than an actual disability. The IEP team may also explore alternative services or strategies to remedy the interfering behaviors or conditions.
- Students' needs are better served by an alternative program and/or service, as determined by the IEP team.
- Therapy is contraindicated because of the change in medical or physical status.
- Students graduate from high school with a diploma.
- Student reaches the age of twenty-two years of age.
- When the student's anticipated goals and expected outcomes related to OT or PT intervention have been met for a particular episode of care.

- When based upon the therapist's judgment it is determined that the student will no longer benefit from therapy.
- The educational setting has changed, and the student is functional within this setting.
- The student has learned appropriate compensatory strategies.

**Required steps and documentation for exiting students**

1. Complete OT or PT Re-Assessment Report
2. Hold eligibility/IEP meeting
3. Complete completion of services form and upload into SEDS under a miscellaneous cover sheet.
4. Parent and IEP team approve changes during IEP meeting.

## Intervention

---

### Intervention Process

School based OTs and PTs base their intervention with a child with a disability on several principles from IDEA and occupational and physical therapy practice. These include the following:

- The child has access to the general curriculum in order to meet the educational standards that apply to all children in the school district. (34 CFR s. 300.39(b)(3) (ii))
- The child is educated with children who are nondisabled to the maximum extent appropriate. (34 CFR s. 300.114(a)(2)(i))
- Special education and related services are designed to meet the unique needs of the child and prepare him or her for further education, employment, and independent living. (34 CFR s.300.1(a))
- Related services to be provided to the child or on behalf of the child are based on peer-reviewed research to the extent practicable. (34 CFR s. 300.320(a)(4))

### IEP Mandated Services- Minutes/ Month Services

#### Monthly IEP Services

Per a student's IEP, occupational and physical therapy services can be provided weekly, monthly or quarterly. Those mandated services must be provided in / out of the general education setting based on the setting designated on the IEP.

All IEP related services are suggested to be written using a monthly frequency. While services are written in a monthly format, delivery throughout the month should reflect the student's need.

- Make monthly selection in SEDS.
- Benefits of monthly services:
  - Flexibility in providing services
  - Accommodating student and classroom needs
  - Increased opportunities to integrate services in the classroom or during school events
  - Allows rescheduling of sessions to accommodate provider unavailability
  - Scheduling options that can change to meet the student's needs
  - Increased opportunities to make up for missed sessions

Service delivery implemented must match the frequency, duration and setting (inside general education setting or outside the general education setting) on the current IEP.

### Occupational Therapy Intervention

AOTA's *Occupational Therapy Practice Framework: Domain and Process, 4<sup>th</sup> ed.* states that the intervention process consists of the skilled services provided by OTs in collaboration with students "to facilitate engagement in occupation related to health, well-being, and achievement of established goals consistent with the various service delivery models." (OTPF, p. 24). Occupational therapy practitioners analyze the demands of an activity or occupation to understand the specific performance skills and

performance patterns that are required and to determine the demands the activity or occupation makes on the student.

*Activity and occupational demands include the following:*

- The tools and resources needed to engage in the activity—What specific objects are used in the activity? What are their properties, and what transportation, money, or other resources are needed to participate in the activity?
- Where and with whom the activity takes place—What are the physical space requirements of the activity, and what are the demands of social interaction?
- How the activity is accomplished—What process is used in carrying out the activity, including the sequence and timing of the steps and necessary procedures and rules?
- How the activity challenges the student's capacities—What actions, performance skills, body functions, and body structures are the individual, group, or population required to use during the performance of the activity?
- The meaning the student derives from the activity—What potential symbolic, unconscious, and metaphorical meanings does the individual attach to the activity (e.g., driving a car equates with independence, preparing a holiday meal connects with family tradition, voting is a rite of passage to adulthood)?

### **Targeting Outcomes**

Outcomes are the result of the occupational therapy process; they describe what a student can achieve through occupational therapy intervention.

Implementation of the outcomes process includes the following steps:

1. Selecting types of outcomes and measures. Outcome measures are:
  - Selected early in the intervention process (see "Evaluation Process" section).
  - Valid, reliable, and appropriately sensitive to change in student's occupational performance
  - Consistent with targeted outcomes
  - Congruent with student academic goals
  - Selected based on their actual or purported ability to predict future outcomes.
2. Using outcomes to measure progress and adjust goals and interventions by
  - Comparing progress toward goal achievement to outcomes throughout the intervention process
  - Assessing outcome use and results to make decisions about the future direction of intervention (e.g., continue intervention, modify intervention, discontinue intervention, provide follow-up, and refer for other services).
  - Place see the table on the following page.

| Intervention  |
|---|
| <p>Intervention Plan</p> <ul style="list-style-type: none"> <li>• Develop the plan, which involves selecting             <ul style="list-style-type: none"> <li>• Objective and measurable occupation-based goals and related time frames;</li> <li>• Occupational therapy intervention approach or approaches, such as create or promote, establish or restore, maintain, modify, or prevent; and</li> <li>• Methods for service delivery, including what types of intervention will be provided, who will provide the interventions, and which service delivery approaches will be used.</li> </ul> </li> <li>• Consider potential discharge needs and plans.</li> <li>• Make recommendations or referrals to other professionals as needed.</li> </ul> |

(Continued)

**Exhibit 2. Operationalizing the Occupational Therapy Process (cont'd)**

| <p>Intervention Implementation</p> <ul style="list-style-type: none"> <li>• Select and carry out the intervention or interventions, which may include the following:             <ul style="list-style-type: none"> <li>• Therapeutic use of occupations and activities</li> <li>• Interventions to support occupations</li> <li>• Education</li> <li>• Training</li> <li>• Advocacy</li> <li>• Self-advocacy</li> <li>• Group intervention</li> <li>• Virtual interventions.</li> </ul> </li> <li>• Monitor the client's response through ongoing evaluation and reevaluation.</li> </ul> <p>Intervention Review</p> <ul style="list-style-type: none"> <li>• Reevaluate the plan and how it is implemented relative to achieving outcomes.</li> <li>• Modify the plan as needed.</li> <li>• Determine the need for continuation or discontinuation of services and for referral to other services.</li> </ul>  |
|--|
| Outcomes   |
| <p>Outcomes</p> <ul style="list-style-type: none"> <li>• Select outcome measures early in the occupational therapy process (see the "Evaluation" section of this table) on the basis of their properties:             <ul style="list-style-type: none"> <li>• Valid, reliable, and appropriately sensitive to change in clients' occupational performance</li> <li>• Consistent with targeted outcomes</li> <li>• Congruent with the client's goals</li> <li>• Able to predict future outcomes.</li> </ul> </li> <li>• Use outcome measures to measure progress and adjust goals and interventions by             <ul style="list-style-type: none"> <li>• Comparing progress toward goal achievement with outcomes throughout the intervention process and</li> <li>• Assessing outcome use and results to make decisions about the future direction of intervention (e.g., continue, modify, transition, discontinue, provide follow-up, refer for other service).</li> </ul> </li> </ul> |

## Physical Therapy Intervention

Intervention is the purposeful interaction of the physical therapist with an individual—and, when appropriate, with other people involved in that individual's care—to produce changes in the condition that are consistent with the diagnosis and prognosis.

Decisions about the physical therapy interventions selected are based on the physical therapist's assessment of the individual's current condition and are contingent on the timely monitoring of the individual's response and the progress made toward achieving the goals. In prescribing interventions for

an individual, the physical therapist includes parameters for each intervention (egg, method, mode, or device; intensity, load, or tempo; duration and frequency; and progression).

### Choosing Interventions

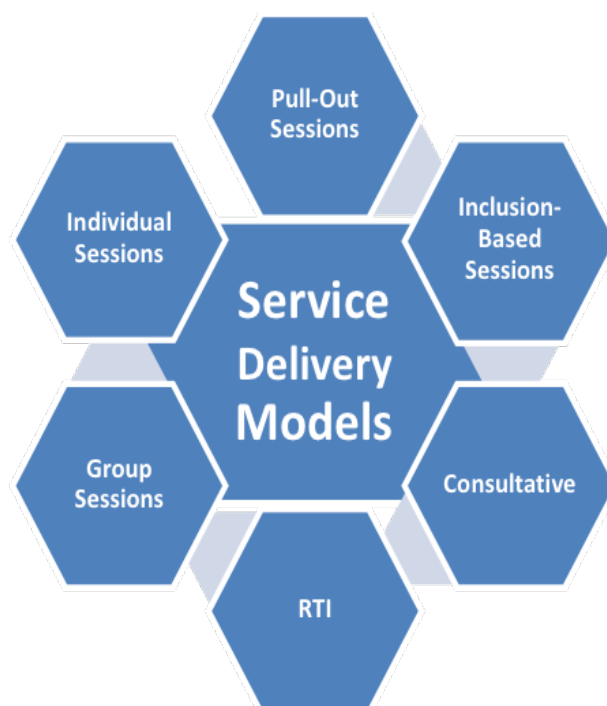

School-based PTs use activity-focused motor interventions for children in preschool and school-based settings. Activity-focused interventions involve structured practice and repetition of functional actions and are directed toward the learning of motor tasks that will increase the student's participation in daily routines. Activity-focused motor interventions are integrated in everyday classroom and school activities.

(Rapport 2009) The PT chooses interventions based upon:

- IDEA, which emphasizes functional performance.
- Peer-reviewed research and evidence-based practice.
- Contemporary research on motor control, motor learning, and motor development.
- Preferred practice patterns (*Guide to Physical Therapist Practice*).
- Enablement models, which emphasize function, participation, and community integration.

### Service Delivery Models

Occupational and physical therapy services are provided to students using a variety of service delivery models to address skills across a wide context of the academic setting based on individualized needs. The type of service delivery model selected must reflect the student's individual level of severity and prognosis. Services should be provided on a continuum from most to least restrictive depending on the student's level of dependence. Providers should be mindful that the purpose of services is to assist the student with generalizing their skills to the classroom setting. These service delivery models can be implemented separately and/or in combination.

### Advantages to Inclusion-based Interventions

- Increased communication between the disciplines
- Improved knowledge about the relationship between sensory-motor development and academics
- Learning new techniques that support academic achievement
- Access to specialists and resources to help all children in the classroom
- Implementation of educationally relevant therapy
- Generalization of therapy & therapy materials (Textbooks, Class assignments, Workbooks)
- Staff members are able to determine where the student is struggling and collaborate to appropriately modify class assignments and tests.
- Provides strategies/techniques for better access/understanding of the curriculum
- Additional support within the classroom for the teacher and the students
- Exposes strategies and techniques regarding sensory-motor skills for other students not on the OT/PT caseload
- Clinicians can provide feedback and/or suggestions regarding the classroom environment to increase engagement/participation

## Services Inside the General Education Setting (Inclusion)

### Models of Inclusion – Service Delivery Options

#### 1. Co-Teaching

- Involves at least two credentialed professionals – indicating that co-teachers are peers having equivalent credentials
- Both professionals coordinate and deliver substantive instruction and have active roles
- Responding effectively to diverse needs students
- Instruction occurs in the same physical space

#### What Is Co-Teaching **NOT**?

- Doesn't involve a teacher and a classroom volunteer or paraprofessional
- Doesn't mean that two adults are merely present in a classroom at the same time
- Doesn't include separating or grouping students with special needs in one part of the classroom
- Doesn't include teaching teams that plan together and then group and instruct students in separate classrooms

#### Lead Role

- Lecturing
- Giving instructions orally
- Checking for understanding with large heterogeneous group of students
- Circulating providing one-on-one support as needed
- Prepping half of the class for one side of a debate
- Facilitating a silent activity
- Re-teaching or pre-teaching with a small group
- Facilitating sustained silent reading
  - Reading a test aloud to a group of students
  - Creating basic lesson plans for standards, objectives, and content curriculum
  - Facilitating stations or groups
  - Explaining new concepts
  - Considering modification needs

#### Support Role

- Modeling notetaking on the board/overhead.
- Writing down instructions on board.
- Checking for understanding with small heterogeneous group of students.
- Providing direct instruction to the whole class.
- Prepping the other half of the class for the opposing side of the debate
- Circulating, checking for comprehension
- Monitoring large group as they work on practice materials
- Reading aloud quietly with a small group.
- Proctoring a test silently with a group of students
- Providing suggestions for notifications, accommodations, and activities for diverse learners
- Also facilitating stations or groups
- Conducting role playing or modeling concept.
- Considering enrichment opportunities.

## 2. Parallel Teaching

- This collaborative model divides the classroom in half and the RSP and the classroom teacher subsequently each instructs one half of the class on the same instructional material.
- The classroom teacher may use a standard format for instruction while the RSP may modify the lesson for the group so that the students will be able to master the material. The groups of students may change to accommodate individual strengths and weaknesses (Capilouto & Elksnin, 1994).

## 3. Complementary Teaching

- Role of the RSP in this model is a tutor, with the classroom teacher as primary instructor
- Classroom teacher presents the majority of the curriculum content & the RSP assists students with their work. The RSP floats around the room and intervenes when children encounter difficulty.

## 4. Supportive Teaching

- Combination of pullout services and direct teaching in the classroom setting.
- RSP teaches information related to the curriculum while also addressing IEP goals.

## 5. Station Teaching

- In this model the RSP and the classroom teacher divide the instructional content into two parts with each professional teaching one group of students
- Once the instruction is completed, the two groups switch to adults so that each group receives instruction from the classroom teacher and the RSP (Capilouto & Elksnin, 1994).

## 6. Consultation

- The RSP works outside the classroom to analyze, adapt, modify, or create appropriate materials composed of strategies.
- Regular, ongoing classroom observations and meetings with teachers take place so as to assist the teacher with planning and monitoring student progress.

## 7. Team Teaching

- The classroom teacher and the SLP, occupational therapist, physical therapist, or other professional teach a class or lesson together with each professional addressing his or her area of expertise.
- The classroom teacher may present the curriculum content while the SLP assists with a communication system. Similarly, the occupational therapist may work on handwriting while the physical therapist assists with positioning (ASHA, n.d.).

## Related Services Provider Weekly Building and Intervention Schedule

**By the first day of school**, LEA Representatives must identify all students who require related services as per their IEP. This identification process includes:

- Type of service and the Related Service Provider assigned to the student
- Beginning date of service
- Intensity of service (e.g., 120 minutes per month, etc.)

**During the first two weeks of school,** Related Service Providers must:

- Check with the LEA Representatives at each of their assigned schools to ensure they have all the students on their caseload assigned to them in SEDS.
- Add students to their caseload using their EasyIEP access.
- If the OT or PT provider has difficulty engaging their LEA Representatives in this process, they should contact the OSSE SEDS (EasyIEP) Call Center (202-719-6500 - Monday – Friday, 7:30am – 6:00pm) for assistance in appropriately assigning students to their caseload and immediately notify their program manager via email.
- Notify your program manager immediately to ensure they are aware of the capacity issue at that school.
- **By the second Friday of the school year-** Complete and submit a **typed** copy of the intervention schedule via email to:
  - Their LEA Representatives and Principal(s), and Program Manager
- Note:
  - All submitted schedules must contain the complete name of the student and the length of the session
  - When changes are made to the schedule, an updated schedule must be submitted to the appropriate school administrator and DSI Supervisor immediately

### **Elements to Include When Creating Your Intervention Schedule**

Your intervention schedule is the first line of defense in assisting you with workload and caseload management. The elements below are helpful in the event the provider has an unplanned leave of absence or if additional assistance is provided to help manage the caseload. Students are often grouped by age or area of deficit being addressed. If you ever need assistance with formulating your intervention schedule, please contact your Program Manager. Intervention schedules must contain the following information:

- All students listed on our caseload must appear on your schedule, including indirect/consultation services
  - First and Last Name
- Name of Clinician
- Name of School
- Contact telephone number for the school
- Make sure to include the following:
  - Time for IEP meetings
  - Time for assessments
  - Indirect/Consultative services
  - Time for collaboration and planning
  - Time for make-up sessions
  - Time for lunch
  - Time to complete documentation (service logs, etc.)
- Room # or location of where the service is provided (you may also indicate if you are providing classroom-based services by indicating teacher's name and classroom number).
- Example: James Doe (L)
  - Jane Blank (L)
  - Ms. Nelson's Class (Rm. 202)

*Refer to appendices for Weekly Intervention Schedule Template.*

## Start Date for Occupational and Physical Therapy Services

Occupational and physical therapists begin service delivery on the **first student day**. Please make up any missed services from that date forward.

OT and PT IEP services for all students receiving an initial IEP, recently enrolling or recently transferred must be delivered within **14 calendar days** of enrolling into the school. To ensure that providers are aware of new students who may be enrolling in their schools who require services, the RSP should check with their LEA Representative assigned to their school(s). Providers should document all attempts to provide and initiate OT and PT services within SEDS.

Once a Part C to B transition student enrolls (ASPEN level 4) in a school, the principal and LEA Representative Designee are notified via email. This QuickBase email alert includes the student information, IEP services and reminds the LEA Representative Designee to add the respective school based RSP in SEDS as the assigned provider.

RSPs will receive an email alert from QuickBase once a Part C to B transition student registers (APSEN level 5) in their school with their respective IEP related service. The email correspondence will include the deadline to deliver the services (direct and/or consultation). The school LEA Representative Designee will also be included on the correspondence.

## Intervention Communication

### Parent/ Guardian Introductory Letter

Each occupational and physical therapist is required to send an introductory letter to each parent / guardian of the students on their caseload no later than the Friday of the second week of employment. The correspondence should contain the following information:

- Your name
- Days assigned to School
- Day student is scheduled for Occupational Therapy or Physical Therapy
- Your contact information (ex. Email or school phone number and extension)

Please refer to appendices for a template. The OT and PT must then document this action in the communications log of each student in SEDS.

During the school year, students are added to the RSP caseload. Once a new student is added to an OT or PT's caseload, the RSP is required to send an introductory letter to the parent of the new student within two weeks.

## Documentation

DSI's goal for all related service providers is to document all service delivery attempts and provide services according to the frequency delineated in the student's IEP. Newly hired providers/contractors must register and complete SEDS training. The website for EasyIEP is: <https://osse.pcgeducation.com/dcdcps>.

### Progress Notes / Medicaid

Each intervention or consultation service listed on the IEP that is provided to a student must be documented in the Special Education Data System (SEDS) EasyIEP. This includes services to students within the local schools, private religious students, missed services, and home-hospital instruction program (HHIP).

Per OSSE guidelines, RSPs should not document services that are not included on the IEP. This includes consultation with parent or teacher, teacher or parent training, or information reported during an IEP meeting. To capture consultations, the RSP should enter the information (date, with whom, and type of contact) in the Communication section in SEDS. **Assessments and consultations should never be listed as a direct service in the service tracker notes.**

### Service Trackers

Each service tracker note must include the following information:

- 1) Identification of the intervention activity / activities
- 2) Description of the student's response to the intervention (quantitative and qualitative information)
  - a. Quantitative includes – accuracy percentage, number of trials/opportunities, etc....
  - b. Qualitative includes – level of prompting/dependence (i.e., moderate verbal prompts, tactile cues, hand-over-hand etc...), behaviors impacting/contributing to progress, etc.....
  - c. Descriptions aligned and relevant to the current OT or PT IEP goals
- 3) Explanation of the relevance of the activity to the IEP goal

DCPS, the Centers for Medicare and Medicaid (CMS), and the Office of the State Superintendent for Education (OSSE) have established a best practice service delivery documentation system. Related Service Providers should document the services they provide or attempt to provide pursuant to the IEP within the same school day those services were scheduled to occur.

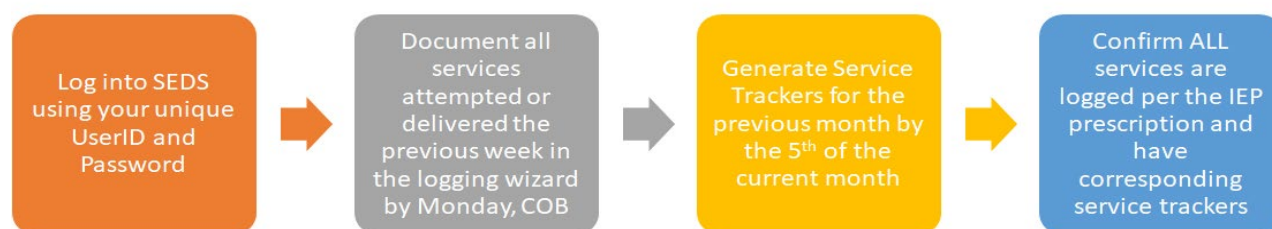

*Definitive Due Date for Documenting Services Logs:* All services provided in a school week **must** be documented by **close of business (COB) on the Monday of the following school week**. If school is closed on Monday, then documentation is due by COB of the next school day. For example, 60 minutes of physical therapy services provided on Friday from 2 to 3 p.m. should be documented by COB that upcoming Monday.

Email your program manager if barriers exist for daily documentation of services. We recognize there may be challenges (e.g., incorporating time to collaborate with teachers and parents) that could prevent you from providing daily documentation 100% of the time. Therefore, DCPS has established a definitive due date for documenting services provided during a school week.

Definitive due date for documenting service trackers. Service tracker must be generated and **finalized no later than the fifth (5<sup>th</sup>) of the following month**. For example, September notes must be generated or finalized by October 5<sup>th</sup>. If the fifth of the month falls on a weekend or holiday, the deadline moves to the next workday.

DCPS obtains Medicaid reimbursement for direct related services provided to students. The finalized service trackers are submitted monthly for reimbursement. A physical signature on the finalized service trackers is not required. By logging into SEDS, the provider understands and accepts that his electronic signature will be created with a unique combination of their network login username and secure password. The unique combination is necessary to ensure that only the provider has completed all documentation submitted into SEDS under this unique combination.

To document services per DSI guidelines, please adhere to the following steps:

### Quarterly IEP Progress Reports

Quarterly IEP progress reports must be completed in EasyIEP/SEDS for each student on the related service provider's caseload. This IEP quarterly progress report must be printed and provided to the parent at the end of each advisory period. **Please refer to the school calendar to obtain DCPS' IEP Progress Reports due dates; and consult your school's LEA RD to know the specific due dates for you to complete these reports.**

Each IEP Progress Report must include the following information:

- Baseline data from the previous reporting period or the beginning of the current reporting period on all IEP goals
- Current performance on all IEP goals, in measurable terms (Quantitative and Qualitative data). *Please see the table below for definitions for each drop-down menu option.*
- Information on **each** goal must be noted on the IEP quarterly progress report. Since goals are written to be measurable, the update of progress toward the goal should be reflected in the current level of performance of what was being measured
- Special factors important to treatment/instruction sessions that supported or interfered with IEP progress (Examples: cooperative, student often refuses to participate and requires

significant encouragement from teacher and therapist to attend therapy sessions, successful strategies, etc.)

- If an IEP goal was not addressed during the quarter, state that the goal was not addressed during the reporting period, indicate why that was the case, and when the goal is anticipated to be targeted.

#### Information that must be Included if the student is on a Missed Services Plan

- Services missed during the quarter secondary to provider gap
- Status of make-up services secondary to provider gap (e.g., number of minutes made up during the term)
- Plan for make-up services secondary to provider gap

#### Additional Information that can be included, but not mandatory, in Progress Reports

- General therapeutic/instructional interventions used in therapy sessions
- Feedback gathered from the student's classroom teacher on progress the student has demonstrated towards achieving their goals.
- Feedback gathered from the student's caregiver on progress the student has demonstrated towards achieving their goals
- Suggestions for parents to address/practice goals/skills for carryover in the home environment

#### **Progress Report definitions for drop-down menu options:**

|                        |   |
|------------------------|---|
| <b>Not introduced</b>  | Goal was never introduced to the student during <i>this or previous</i> IEP progress reporting periods  |
| <b>Just introduced</b> | Goal was introduced within the current IEP progress reporting period  |
| <b>No progress</b>     | Goal was introduced to the student and has been targeted, but student has not shown any progress since introduction or since previous progress reporting period   |
| <b>Progressing</b>     | Goal was targeted and student is demonstrating measurable progress  |
| <b>Regressing</b>      | Goal was targeted and student's performance has declined as compared with previous progress reporting period  |
| <b>Mastered</b>        | <p>Goal was targeted and student achieved the goal. Indicate plan to update/remove goal or skill area at next annual IEP.</p> <p><b>Next Steps:</b></p> <ul style="list-style-type: none"> <li>• Reach out to case manager if an IEP amendment is required prior to the next IEP meeting to update goals or service frequency</li> <li>• Consider whether further assessment is needed to determine continued eligibility for services</li> <li>• Reach out to your assigned program manager if you experience any barriers to convening an IEP team meeting or starting the eligibility process</li> </ul> |

## Consultative (Indirect) Services

Consultation is a service provided indirectly to the student consisting of regular review of student progress, student observation, accommodations and modifications or core material, developing and modeling of instructional practices through communication between the general education teacher, the special education teacher, parent and/or related service provider. **Consultation is not the provision of direct therapy services to a student.** The focus of consultation is to ensure the generalization of the addressed goals are generalized across the academic setting and to assist the student with being independent of the skill outside of the therapy setting.

When documenting indirect services in SEDS, consultations should never be listed as a direct service in the service tracker notes, nor should the activity indicated in the note reflect that a direct service was delivered to the student. Students to be found eligible services in an initial evaluation, should never receive “Consultation-Only” services on their IEPs.

Goals are required for students receiving consultation services on their IEPs. This is necessary to indicate how the skills will be monitored and/or generalized across the academic setting to increase the student’s overall independence.

Best practice for students who receive “Consult-Only” occupational or physical therapy services, should be re-evaluated and dismissed after a full year of not receiving direct services. The rationale behind this practice assumes that during the consultation-only period of service the student’s occupational or physical therapy skills were being generalized across the academic setting and did not require direct services to access their curriculum. Therefore, the student should transition from consultation-only services and dismissed through a comprehensive occupational or physical therapy assessment.

### CONSULTATIVE NOTE QUALITY DOCUMENTATION

Consultation notes should be comprehensive and provide a detailed picture of the tasks or skills consulted on within the session. Consultation sessions should be tied to the consultation goal on the IEP and should consist of observations and/or discussions of how the student is generalizing the skill(s) outlined on the IEP to their educational environment.

Each consultation service note must include the following elements:

- Who the RSP consulted with (e.g., special education teacher, general education ELA teacher)
- Identification of the activities/tasks/skills consulted on
- Description of the student’s skill level during the task(s)/activity consulted on, and provide quantitative or qualitative data if applicable
  - Quantitative includes – accuracy percentage, number of trials/opportunities, etc.
  - Qualitative includes – level of prompting/dependence (i.e., moderate verbal prompts, tactile cues, hand-over-hand etc...), behaviors impacting/contributing to progress, etc.
- Descriptions aligned and relevant to the current SLP, OT or PT IEP goals
- Explanation of the relevance of the consultation to the IEP goal(s)

### Logging Consultation Services on Non-Instructional Days

Providers may consult with teachers on non-instructional days (e.g., parent teacher conference day, records day, etc.). This consultation note should be documented as usual in the SEDS service logs on the date that the consultation occurred and will be counted towards the overall prescription if captured in the monthly service tracker.

## Service Delivery Requirements

The IEP is a legally mandated document that includes goals, specialized instruction, services, and frequency/duration in order for a student to access their curriculum. **RSPs should document and provide IEP services in alignment with the IEP frequency and duration listed on each student's IEP.** Providers' intervention schedules should include flexibility to accommodate the total prescription of services (i.e., weekly or monthly) on students' IEPs. Providers are encouraged to adapt service delivery models to ensure students receive their prescribed services.

## Documenting Missed and Make-Up Services

### Documenting Missed Services

Follow the *DCPS Missed Services and Untimely Assessment Guidelines*, dated April 2017.

*Missed session notes should always reflect the time that would have been spent with the student. For example, if the student was supposed to be seen for 30 minutes and was absent from school, the provider should enter a "student absent" note for 30 minutes.*

Never enter "zero" for minutes or group size in SEDS logs

## Missed Services Versus Compensatory Education

On occasions, related service providers are unavailable due to absences, MDT meetings, etc. When the missed sessions are a significant disruption of occupational or physical therapy and not attributable to the student or student's parents, it must be made up. Missed services are made up in school during the student's school day by the occupational or physical therapist.

If missed service hours have caused educational harm and the school-based OT is unable to make up for it, during the school day, compensatory education hours may be awarded through due process or Hearing Officer Determination (HOD).

## DSI Related Services: Responding to Provider Vacancies

Process for covering service delivery due to RSP resignation or extended leave (more than 2 weeks).

### AUDIOLOGY, OCCUPATIONAL THERAPY, PHYSICAL THERAPY & SPEECH-LANGUAGE PATHOLOGY

| Action Item  | Due Date    | Responsible Person |
|--|-------------|--------------------|
| Notification of resignation or extended leave is provided to the DSI Program Manager | Immediately | DSI RSP or Vendor  |

|  |  |                     |
|--|--|---------------------|
| DSI Program Manager provides notification of resignation or extended leave to the Principal, LEA RD and Accountability Manager.  | Immediately  | DSI Program Manager |
| Review schedules, caseloads, and outstanding assessments of existing discipline providers. Based on availability and capacity, designate one or more providers to cover the gap.             | Within one (1) week of RSP notification                | DSI Program Manager |
| If there is no availability or additional capacity, solicit help from vendors to recruit a contractual provider.<br><i>*Based on available contract funding</i>                              | Within one (1) week of RSP notification                | DSI Program Manager |
| Provide a status update to the Principal, LEA RD and Accountability Manager.   | Within one (1) week of RSP notification                | DSI Program Manager |
| Request LEA RD to inform parents of affected students about the staffing gap and current status of securing a replacement.   |  | School LEA RD       |
| Provide a status update to the Principal, LEA RD and Accountability Manager.   | Weekly   | DSI Program Manager |
| If services are delayed for more than 3 weeks, LEA RD notifies affected families in writing the expected positioning of a new provider and how make-up services will occur.                  | During week 3 of staffing gap                          | DSI Program Manager |
| LEA RD documents the written communication in the SEDS communication log for each student.   |  | School LEA RD       |
| DSI Program Manager will supply the parent letter for the LEA RD.  |  |                     |
| Once a replacement provider (temporary or permanent) is identified, inform Principal, LEA RD and Accountability Manager.   | Before the start of the replacement provider           | DSI Program Manager |
| LEA RD informs affected families in writing of the replacement's start date. LEA RD documents the written communication in the SEDS communication log for each student.                      |  | School LEA RD       |
| DSI Program Manager will supply the parent letter for the LEA RD.  |  |                     |
| Replacement provider sends an introduction letter to the parents with information. Language includes provider will develop and provide a make-up plan for their student within 2 to 4 weeks. | At the start of the second week of work                | Replacement DSI RSP |
| Replacement provider contacts each parent via email to provide a copy of the make-up plan.   | Within 2 to 4 weeks of the parent introduction letter. | Replacement DSI RSP |
| Provider documents the written communication in the SEDS communication log for each student.   |  |                     |

|   |  |  |
|---|--|--|
| The provider uploads a copy of the plan into SEDS.  |  |  |
| Once the make-up hours are completed, the provider updates the plan with the completion date and uploads it into SEDS |  |  |

## OT/ PT Services Through Home and Hospital Instruction Program (HHIP)

Students who are unable to attend school secondary to medical issues, continue to receive instruction and related services through the home-hospital instruction program. Parents must enroll and submit supporting medical documentation for acceptance into HHIP. If a student is accepted into the HHIP program, the school-based related service provider will need to collaborate with the HHIP case manager to determine the student's schedule and if any IEP adjustments are necessary for the student while they remain in HHIP services.

HHIP students can fall into two categories.

- Category 1: The student has consult services for your discipline on their IEP. Students in this category will **remain assigned to the home-school related service provider**. In these cases, the RSP will consult with the HHIP teacher and document these services in SEDS/Frontline.
- Category 2: The student has direct services on their IEP for your discipline. Students in this category will **be assigned to the designated HHIP OT, PT, or SLP**. HHIP services will be documented by the HHIP RSP in SEDS/Frontline.

### HHIP Notification Process

- RSPs should be notified by the LEA-RD or Case Manager when a student goes on HHIP services. If a student has been absent for >2 weeks, the RSP should reach out to the LEA-RD and/or Case Manager to determine whether the student is on HHIP services.
- RSPs will be notified by the HHIP team when a student is slated to return from HHIP services. RSPs should continue services as usual when the student returns.

### Students Returning from HHIP

- When a student returns from HHIP, the RSP should determine if there is any medical documentation noting change in status or contraindications to therapy. A team meeting should be called, should the IEP need to be updated to reflect a change in medical status or tolerance.

If there are questions related to a student's status surrounding HHIP, please email the HHIP team at [hip.dcps@k12.dc.gov](mailto:hip.dcps@k12.dc.gov) and copy your program manager.

<mailto:hip.dcps@k12.dc.gov>

## Assistive Technology Policy and Procedures

---

### Policy At A Glance

School-based teams, including IEP and 504 teams, are responsible for the consideration, provision, and implementation of assistive technology. The following section provides an overview of IDEA requirements for assistive technology, the DCPS assistive technology process for school-teams, and additional support provided by the DCPS assistive technology team. For more information and our complete policy guidebook and training modules please access the [Assistive Technology SharePoint](#) page.

### Assistive Technology

[Assistive Technology \(AT\)](#) is an umbrella term that includes any device, product, software, or system that increases, maintains, or improves the functional capabilities of individuals with disabilities (Assistive Technology Industry Association, 2017). In regard to students with disabilities, AT is used in schools to increase access to the learning curriculum or environment and includes low to high tech features and tools.

### Assistive Technology Eligibility

All students with disabilities are eligible for assistive technology. Unlike traditional evaluations, AT evaluations **are not necessary** to determine if a student should access assistive technology and **are not required** during the initial eligibility or re-evaluation process. Rather, the assistive technology decision making process is a collaborative assessment process that occurs throughout the school year.

### The DCPS Assistive Technology Process

School-based teams should follow a collaborative process for assistive technology decision making. This systematic process is followed to assess a student's assistive technology needs. Each step of this aligns with IDEA guidance and best-practices for assistive technology. The [FACTS mnemonic](#) guides school-teams through each step of this AT process:

*Step 1- Find classroom tools and evidence-based practices to support the area of need.*

School-based teams should implement evidence-based practices and integrate appropriate classroom accommodations and modifications based on the area of need. For students with motor deficits, these supports may text to speech, dictation, worksheet accessibility, and modification to classroom materials. Please see our [AT Consideration Guide](#) for available resources based on the area of concern and our [SharePoint](#) page for potential Tier 1 AT tools.

*Step 2- Analyze data to determine if these supports are effective.*

The school-based team should collect and analyze data to determine if these strategies and supports increase student performance in the area need as well as access to the educational environment. This information should be documented within service trackers in addition to present levels of performance within the IEP.

*Step 3- Consider assistive technology at the annual IEP:*

According to IDEA, school-based teams must consider assistive technology during the annual IEP to discuss student needs, abilities, the effectiveness of current tools, and determine if the student may benefit from additional support. 504 students may also benefit from assistive technology accommodation. During this process, the school-based team uses the [SETT framework](#) to facilitate discussion. Please see our section below, Assistive Technology Consideration, for more information.

#### *Step 4- Trial Assistive Technology Tools*

If the SETT discussion determines that the student may benefit from additional support, the IEP team should then trial specific tools to determine if this assistive technology increases the student's access to the curriculum or performance on IEP goals. Teams may obtain trial assistive technology supports by using available technology within the school (ex: laptops and one-to-one tablets), on loan from the AT team (for specialized equipment), or by receiving a device trial directly from a vendor or the DC Assistive Technology Program.

*Step 5- Supplement to the IEP or 504:* If data indicates this AT tool is effective in supporting student access to the curriculum, school-based teams should update the IEP or 504 plan. This update may include Services and Supplemental Aids section if the student requires a dedicated device, special considerations for assistive technology for additional Tier 1 AT supports, and relevant IEP goals and accommodations. Please see additional guidance for updating relevant section of the IEP on [SharePoint](#).

## Provision of Additional AT Tools

School-based teams are responsible for ensuring that students have access to assistive technology support as documented in the AT consideration, accommodations, goals, and supplemental aids section of the IEP, or required for trial. To ensure that students have access to the required support, school-based teams are responsible for the following:

- Implementation of existing hardware (school laptops, tablets, one-to-one devices) to access district available AT features.
  - o Many assistive technology features are available district wide. If a student requires access to district-wide AT features (ex: text to speech, speech to text, word prediction), school-based teams should ensure that students have access to these features on the available school hardware. Please see our [AT Consideration Guide](#) for available resources based on the area of concern and our [Tier 1 AT Tools resource page](#) for potential Tier 1 AT tools.
- Device loan from the Assistive Technology Department.
  - o The assistive technology team may provide specialized equipment on loan to the school to meet the requirements of the student's IEP or as needed through device trials when tools are recommended or approved by the AT team through the consultation or loan process.
- Device loan from government AT loan facilities (ex: DC Assistive Technology Program) or vendors.
  - o [The DC Assistive Technology Program](#) is a government funded AT loan and training program available to all DCPS staff, students, and residents. This program has a variety of specialized AT equipment available for loan. In addition, some vendors provide loaner

equipment. Please contact the DC Assistive Technology Program or specific AT vendors for guidance on their loaner program.

- Direct purchase of the assistive technology tool.
  - o Schools may also purchase assistive technology support, including adaptive and programmatic AT support required for students to access the building. Please contact your Manager of Accountability for more information.
  - o For sensory needs of students, please contact your assigned RSP manager after collaborative decision making.

## Assistive Technology Consideration

IEP teams are responsible for the consideration of assistive technology. Consideration is the process of determining the effectiveness of existing supports and if a student would benefit from additional low-to-high tech assistive technology tools. During the annual IEP or 504 meeting, school-based teams use a systematic process, guided by the [SETT framework](#), to collaboratively consider assistive technology. This framework helps teams thoughtfully consider the components that impact the student's access to the curriculum and select appropriate AT tools. School-teams should summarize information from the SETT framework into a one paragraph response in the Special Considerations for Assistive Technology section of the 504 or IEP. To learn more about available assistive technology tools and view examples of the AT consideration section, please view the [AT Consideration Guide](#), which provides potential assistive technology support and best practices for implementation based on student need.

## Collaboration with the AT Team

Per IDEA, school-based teams are responsible for the assistive technology decision making process and provision of assistive technology support. However, if the school-based team requires support during these processes, the team may collaborate with the central-based assistive technology team. Collaboration requests are submitted by LEA representatives in the AT QuickBase portal. For each request type, proof of consideration during the IEP process is required. The types of collaboration requests are discussed below as well as our [SharePoint page](#).

### Consultation

School-based teams may receive consultations from the central-based AT team to support in the collaborative assessment of a student's assistive technology needs. **Support from the AT team does not automatically yield a device.** The continuum of support provided by the assistive technology team may also include a focus on using available technology and materials in the classroom. Prior to submitting a consultation request, teams must first consider assistive technology during the annual IEP using the SETT framework. A copy of this SETT framework worksheet is required during the consultation request process. During this process, the AT Team collaborates with the school-based to support with the identification of appropriate assistive technology tools for the area of concern.

This consultation process relies on existing data and information provided by the school-based team, including service trackers, present levels of performance, and information within the SETT framework worksheet. The process also includes mandatory SETT meeting with the school-based team to discuss concerns and brainstorm potential AT solutions and concludes with a written consultation report that provides a summary of the team's decision-making process, recommended assistive technology, and suggested implementation plan. Please see the [Assistive Technology Roles and Responsibilities](#) document for more information on the school-team and central based AT team for more information about roles and responsibilities during this process.

### **Seating and Positioning Equipment**

Some students may require seating and positioning in order to access the educational environment or curriculum. School-based teams should follow the FACTS process and consider the needs of the student using the SETT framework and document this consideration within the IEP. After consideration, the team should submit an AT collaboration request in QuickBase if the team would like support in identifying the most appropriate piece of equipment or if loaner equipment is required. Please see the Seating and Positioning Guide on the [AT SharePoint](#) page for more information.

### **Implementation and Technical Support**

Teams may also request implementation support from the AT team. Implementation support may consist of virtual and live training as well as support with development of an implementation plan. Teams may request implementation support for Tier 1 assistive technology tools, student owned communication devices, and loaner devices. Teams must request additional implementation and coaching support in QuickBase. Our [SharePoint](#) page provides more information about this process. In addition, the assistive technology team provides technical support for the devices provided by our team. Technical support requests must be requested in QuickBase as email requests will not be accepted. In addition, the AT team holds technical support office hours to quickly answer any technical support questions. Please see our [Technical Support Page](#) for more information about this process.

## **Assistive Technology Evaluations**

Many students who require assistive technology do not need a formal evaluation. Identification of assistive technology during the FACTs process and/or consultation with the AT team may quickly match a student with the assistive technology required to access the educational environment. Formal assistive technology evaluations should only be conducted if additional data outside of school-based team consideration and AT team consultation is required for informed AT decision making or requested by a parent or advocate.

Prior to requesting formal AT evaluations, school-teams must consider assistive technology and document this consideration in the AT consideration section of the IEP. Teams must then receive parental consent and request an AT evaluation in SEDS within 24 hours. Formal AT evaluations are a collaborative process that contains the same components as the consultation process, but with additional data collection points. Assistive technology evaluations are coordinated by the specialist but require input and data collection from members of the IEP and 504 teams. Please see our [AT Team Support](#) page for a complete overview of the AT evaluation process.

## Independent Assistive Technology Evaluations

Families may obtain independent assistive technology evaluations, which provide recommendations AT for learning, communication, and access that may assist the student in accessing the educational environment. When independent assistive technology evaluations are conducted, the school-based team should request a copy of the assessment and upload the assessment to SEDS. The school-based team should then schedule a time to review these recommendations as an IEP or 504 team and agree upon the supports that are necessary for the student to access the educational environment. The team should then update the necessary sections of the IEP, including special considerations for assistive technology, IEP goals, or 504 accommodations. If the school-based team requires support in interpreting the results of an independent assistive technology assessment, then the school- team may contact the AT team for support.

## Student Owned Assistive Technology

Students may use their personally owned assistive technology within the educational setting. Many of these devices correlate to independent assistive technology evaluations. Prior to implementing these supports in the classroom, the school-team must first review the results of the outside evaluation as a team and update the IEP. If the team determines that this support will be used within the classroom, teams should update the special considerations for assistive technology section of the IEP by listing the student owned device that will be used and discussing how this will be implemented within the classroom. The team should also update relevant IEP goals to incorporate this device as appropriate. Please see additional guidance on student owned assistive technology devices and outside recommendations on [SharePoint](#).

School-based teams may also determine that this student owned device will not be used within the educational setting, but the student requires comparable assistive technology in order to access the educational environment. School-teams who make this decision should follow the device provision steps listed above.

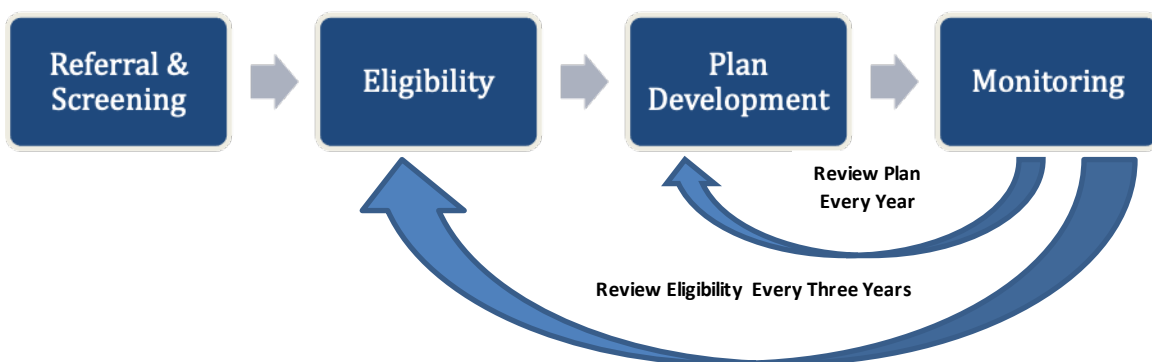

## Contact and Additional Supports.

If you have additional questions, please contact [DCPS.assistivetech@k12.dc.gov](mailto:DCPS.assistivetech@k12.dc.gov). In addition, you may access our complete AT Guidebook and policy and procedure handouts on [SharePoint](#). Implementation and technical training modules are located on [SharePoint](#) and the [AT Canvas Page](#) and Microsoft Stream.

## 504 Plan OT/PT Services

It is the intent of the district to ensure that students who are disabled within the definition of Section 504 of the Rehabilitation Act of 1973 are identified, assessed, and provided with appropriate educational services. Under this policy, a student with a disability is one who (a) has a physical or mental impairment that substantially limits one or more major life activities, (b) has a record of such impairment, or (c) is regarded as having such an impairment. Students may be disabled under Section 504 even though they do not require services pursuant to the Individuals with Disabilities Education Act (IDEA). Due process rights of students with disabilities and their parents under Section 504 will be enforced.

### The Section 504 Process in DCPS

### What are the eligibility requirements for Section 504 accommodations?

For a student to be eligible for accommodations under Section 504, s/he must have a physical or mental impairment that “substantially limits one or more major life activities,” as determined by the “504 team.” Important terms are defined as follows:

- *Physical or mental impairment* can be any physiological condition that affects a body system, such as the respiratory, musculoskeletal, or neurological systems; any mental or psychological disorders, such as emotional or mental illness and intellectual disabilities; or specific learning disabilities. The definition does not limit the impairments that can qualify a student for Section 504 services.
- *Major life activities* mean functions such as caring for oneself, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working. Again, this list does not limit what kind of activities can qualify a student as having a disability.
- *Substantially limits* means that the impairment results in considerable impairment with a permanent or long-term impact. A substantial impairment prevents or severely restricts a person from performing major life activities. Determining whether a child has a substantial impairment is based on a child’s disability without any assistive measures other than ordinary eyeglasses or contact lenses. Eligibility will be reviewed at least annually.

**If a student qualifies for services under the 504 Plan the OT or PT will do the following:**

- Provide accommodations/modifications to the classroom and/or special education teacher
- Provide direct, indirect and/or consultative services
- Conduct ongoing periodic monitoring of progress and/or concerns with the educational team to ensure accommodations/modifications are being implemented
- Collect data regarding performance given strategies
- Document communication with educational team and outside resources
- Participate in the 504 meetings to provide relevant information and updates

If you have any questions regarding the 504 Process, you may contact the identified 504 Coordinator at [DCPS.504@dc.gov](mailto:DCPS.504@dc.gov). Please refer to [CANVAS for 504 Guidelines](#).

**Process for Ordering Assessments for Students in the Section 504 Process:**

This process should be followed when a school-based 504 team believes that a student in the 504 processes (initial or ongoing) may require a related service (occupational therapy, physical therapy, speech-language pathology, audiology, or behavior support services) and/or if a parent/guardian requests a related service assessment.

1. The 504 coordinator and the related service provider shall meet to discuss the referral and the current existing data. The determination of whether additional information is needed shall rely heavily on the expertise of the related service provider.
2. If the related service provider determines that additional information is needed in order to determine eligibility for the related service, the related service provider shall confirm the specific assessment type that will be completed and the 504 coordinator shall create a Related Service Evaluation event in the Frontline (Frontline) database. The 504 coordinator shall obtain written consent for the related service evaluation, upload the consent form in the Related Service Evaluation event, and notify the related service provider(s) that the event has been created and consent has been obtained. If the assessment is to be completed remotely, the 504 coordinator shall also obtain separate consent for a telehealth assessment using the Informed Consent for Telehealth – Assessments form.
3. The related service provider shall complete all necessary assessments in accordance with the DCPS eligibility timeline process, including assigning the assessment to themselves in Frontline. For behavioral support services, the social worker shall complete the Behavioral Support Services Checklist. For more information about the eligibility timelines process or related service assessments, please refer to the relevant related service discipline's program guidebook. Once the assessment has been completed, the related service provider shall upload all relevant documentation from the assessment in the Related Service Evaluation and lock the event to finalize.
4. The 504 team (including the related service provider) shall reconvene to review the results on the assessment. If the student is eligible to receive related services, then the related service provider will:
  - Provide the duration, frequency, tentative start date, and goals of the service to include in the student's 504 plan
  - Provide consultation, including recommendations for accommodations, to the classroom teacher, if applicable

- Provide direct and/or consultative services
- Conduct periodic monitoring of progress and/or concerns with the educational team to ensure accommodations are being implemented
- Collect data regarding student progress toward completing their related service goals
- Document communication with educational team and outside resources
- Participate in 504 meetings to provide relevant information and updates
- Document service delivery in the Frontline (Frontline) database no later than Monday at 3:30 following the service delivery

*Note:* If the timeline for the completion of the assessment extends beyond the timeframe of the 504-eligibility determination process or the timeframe for writing the 504 plan, then the 504 team shall proceed to complete all other parts of the 504-eligibility determination and/or 504 plan without this information and reconvene to discuss the addition of the related service(s) when the assessment results are available.

For questions about the role of the 504 coordinator in this process, please contact [504@k12.dc.gov](mailto:504@k12.dc.gov).

- [Training Video: How to Create a 504 Related Services Evaluation](#)

#### **Documenting 504 interventions:**

Documentation for students receiving direct or indirect services via a 504 Plan is entered into the provider management application at DPCS (FRONTLINE). 504 service notes are due in Frontline by Monday at 3:30pm following the delivery of services.

Providers OT or PT services to students with 504 Plans must complete the 504 Service Tracker. Documentation on 504 Plan interventions follows DCPS guidelines for content and timelines:

- Identify the activity completed or recommended during session.
- Report Student's response (example: 70%, two out of six trials, moderate assistance). This information should be measurable and aligned to the 504 plan's goals and objectives
- Special Factors observed or reported (e.g., cooperative, refuses, missing glasses, etc.)

#### **Important Notes about 504-plans:**

- Students who are not found eligible for an IEP should not automatically qualify for a 504-Plan. The MDT should determine which options and supports are most appropriate and necessary for the student to benefit from their education.
  - If a student has an IEP, necessary accommodations should be able to be captured on their IEP without the need for a separate 504 plan. Examples include: nursing/medical needs.

# Evidence-Based Practice

## Evidence-based Practice Research

Education systems nationwide, including DCPS, endorse the need for an evidence-based education approach and “the integration of professional wisdom with the best available empirical evidence in making decisions about how to deliver instruction”.<sup>3</sup> Federal education statutes and regulations, including IDEA 2004 and NCLB 2002, stress accountability as measured by the “use of effective methods and instructional strategies that are based on evidence-based practice”.<sup>4</sup> Those federal education laws, requiring scientifically based research, make it clear that evidence-based practice is the standard for accountability and must be utilized by school-based OTs and PTs. Evidence-based practice is the “integration of best research evidence with clinical expertise and [child] values”.<sup>5</sup> The laws, as well as AOTA and APTA professional documents, recognize that evidence-based practice is a continuous, dynamic integration of research evidence, professional expertise, and child factors. In addition to using evidence to inform practice, education professionals collect data to review intervention effectiveness in order to comply with the mandate for systematic and quantitative monitoring of the child’s progress. Data can be collected through various methods during both general education, including early intervening services and Response to Intervention, and special education in order to document whether intervention strategies, including environmental adaptations and modifications, are effective at increasing the child’s ability to gain access to the general curriculum and make progress.

### The Steps of Evidence-Based Practice<sup>6</sup>

Evidence-based practice follows a five-step process designed to gather quality research evidence<sup>7</sup>:

- Step 1: Ask a relevant practice question
- Step 2: Gather the best available research evidence
- Step 3: Critically appraise the research
- Step 4: Integrate research evidence
- Step 5: Evaluate the outcomes

### Step 1: Ask a Relevant Practice Question

Relevant practice questions relate to a child’s educational needs. Well-structured questions will assist the therapist in developing key search words and finding research on how to improve the effectiveness and efficiency of treatment. In school-based practice, relevant practice questions can directly incorporate the intent of therapy as reflected in a child’s IEP goals/objectives.

<sup>3</sup> Whitehurst 2002

<sup>4</sup> 20 USC §§ 1401 and 6301

<sup>5</sup> Sackett et al. 2000, 1

<sup>6</sup> Adapted from the guidelines for occupational therapy and physical therapy in California public schools, 2012

<sup>7</sup> Lin, Murphy, and Robinson 2010; Rappolt 2003; Sackett et al. 2000; Salmond 2007; Sarracino 2002; Tickle-Degnen 1999, 2000a, 2000b

**Step 2: Gather the Best Available Research Evidence**

A combination of research evidence, professional expertise, and consensus views should be used to answer the relevant practice question. Research evidence can be gathered from a variety of resources.

**Step 3: Critically Appraise the Research**

The appraisal process guides the OT and PT in evaluating the study's findings, deciding whether a research study is of sufficient quality with results that are applicable to school-based therapy.<sup>8</sup> This step may be difficult, and many factors need to be considered for this process to be constructive. To begin, the OT or PT determines if the study is quantitative or qualitative. If the study is quantitative, the study must be categorized according to its research design and level of evidence. If the study is qualitative, it uses different research designs to examine the subjective views, experiences, and values of individuals and does not follow hierarchical quantitative levels of evidence. During the appraisal process, it is imperative to remember that the evidence-based practice philosophy utilizes the best available external research applicable to the situation. If no high-level quantitative research is found, the practitioner should consider the next level of best available research.<sup>9</sup>

**Step 4: Integrate Research Evidence**

Therapists use their professional expertise coupled with knowledge of the child's functional needs to determine how to best integrate research evidence into service delivery. Well-informed collaborative decisions are made with the IEP team regarding when, where, and how often the intervention will be implemented to achieve the highest probability of desired outcomes.

**Step 5: Evaluate the Outcomes**

It is essential to evaluate whether the intervention used has research evidence for its effects on child progress.<sup>10</sup> The evaluation process documents the outcomes of intervention and can uncover new areas of educational concern.<sup>11</sup> Outcomes can be evaluated through observations, data collection, interviews, standardized and criterion-referenced tools, work samples, ratings, goal attainment scaling, and treatment notes. If evaluation of the outcomes indicates that the child is not improving, the therapist can go back to the results of the current search to see if there are other viable resources or interventions to consider based upon the child and the context of the relevant practice question.

# Training and Support

## Related Service Provider Training Overview

---

DCPS seeks to create a culture in which all school-based personnel have a clear understanding of what defines excellence in their work, are provided with constructive and data-based feedback about their performance and receive support to increase their effectiveness. The objectives of these efforts are:

- Clarify and outline clear performance expectations.
- Define your specific roles and responsibilities.
- Provide clear and concise feedback to enhance performance.
- Facilitate collaboration among service providers, school staff and parents to create the foundation for student success.
- Delivering professional development to supply service providers with the necessary evidence-based resources and support to enhance their role.
- Retain excellent service providers that can work with DCPS on increasing student achievement.

### **Related Service Provider Training Goal**

- The RSD will implement trainings that promote high standards and “best practices” according to processes and procedures that support continuous quality improvement efforts and ensure compliance with court mandates, federal, local and discipline specific national organizations. As illustrated in IMPACT and the discipline specific procedural reference guides, which is allied to enhanced performance, increased collaboration and improved educational outcomes for students.
- The RSD will develop training programs that are evidence-based, empirically driven and results-focused. These initiatives will be implemented through strategic planning aimed to identify effective strategies for improving the performance of related service provider in ways that enhance the quality-of-service delivery, understanding of student’s goals for exiting services, quality assessments, appropriate educational planning, academic achievement, secondary transition outcomes as well as functional skills that improve educational outcomes of students with disabilities.

## Types of Trainings and Professional Development

---

### Professional Development Days (PD)

Reserve professional development dates on your calendar. Attendance on professional development days is required; however, providers may request off with at least two months' notice. Providers may be required to participate in required trainings at a later date. Program Managers reserve the right to request a doctor's note when calling out and able to document as an unexcused absence.

### Optional Trainings

DCPS and the OT/PT Department may offer several free trainings after the workday. These trainings may include workshops, webinars, case conferences, peer reviews, and lecture sessions. Please refer to the OT/PT SharePoint page for any departmental offerings.

Refer to [DCPS school calendar](#) for District-wide scheduled training dates.

## B. Key Terms

The key terms outlined below have specific meanings assigned by IDEA (34 C.F.R §300.34, and/or DCMR 5-3001. This is not an exhaustive list of the developmental, corrective and supportive services that an individual child with disabilities may require. However, all related services must be required to assist a child with disabilities to benefit from special education. To provide clarity on the various types of related services, the individual definitions are provided below.

- **Audiology.** Audiology services include (i) the identification of children with hearing loss, (ii) determination of the range, nature, and degree of hearing loss, including referral for medical or other professional attention for the habilitation of hearing, (iii) provision of habilitative activities, such as language habilitation, auditory training, speech reading (lip-reading), hearing assessment, and speech conservation, (iv) creation and administration of programs for prevention of hearing loss, (v) counseling and guidance of children, parents, and teachers regarding hearing loss; and (vi) determination of children's needs for group and individual amplification, selecting and fitting an appropriate aid, and evaluating the effectiveness of amplification.
- **Counseling.** Counseling services means services provided by qualified social workers, psychologists, guidance counselors, or other qualified personnel.
- **Early identification and assessment of disabilities in children.** Early identification and assessment mean the implementation of a formal plan for identifying a disability as early as possible in a child's life.
- **Interpreting services.** When used with respect to children who are deaf or hard of hearing, this includes (i) oral transliteration services, cued language transliteration services, sign language transliteration and interpreting services, and transcription services, such as communication access real-time translation (CART), C-Print, and TypeWell and (ii) special interpreting services for children who are deaf-blind.
- **Medical services.** This service is for diagnostic, or assessment purposes provided by a licensed physician to determine a child's medically related disability that results in the child's need for special
- **Occupational therapy.** Occupational therapy means services provided by a qualified occupational therapist and (ii) include (a) improving, developing, or restoring functions impaired or lost through illness, injury, or deprivation, (b) improving ability to perform tasks for independent functioning if functions are impaired or lost, and (c) preventing, through early intervention, initial or further impairment or loss of function.
- **Orientation and mobility.** Orientation and mobility services means services: (i) provided to blind or visually impaired children by qualified personnel to enable those students to attain systematic orientation to and safe movement within their environments in school, home, and community, and (ii) includes teaching children the following, as appropriate: (a) spatial and environmental concepts and use of information received by the senses (such as sound, temperature and vibrations) to establish, maintain, or regain orientation and line of travel (e.g., using sound at a traffic light to cross the street), (b) to use the long cane or a service animal to supplement visual

travel skills or as a tool for safely negotiating the environment for children with no available travel vision, (c) to understand and use remaining vision and distance low vision aids, and (d) other concepts, techniques, and tools.

- Parent counseling and training. Includes (i) assisting parents in understanding the special needs of their child, (ii) providing parents with information about child development, and (iii) helping parents to acquire the necessary skills that will allow them to support the implementation of their child's IEP or IFSP.
- Physical therapy. Physical therapy means services provided by a qualified physical therapist.
- Psychological. Psychological services includes (i) administering psychological and educational tests, and other assessment procedures, (ii) interpreting assessment results, (iii) obtaining, integrating, and interpreting information about child behavior and conditions relating to learning, (iv) consulting with other staff members in planning school programs to meet the special educational needs of children as indicated by psychological tests, interviews, direct observation, and behavioral assessments, (v) planning and managing a program of psychological services, including psychological counseling for children and parents, and (vi) assisting in developing positive behavioral intervention strategies.
- Recreation. This service includes (i) assessment of leisure function, (ii) therapeutic recreation services, (iii) recreation programs in schools and community agencies, and (iv) leisure education.
- Rehabilitation counseling. Rehabilitation services means services provided by qualified personnel in individual or group sessions that focus specifically on career development, employment preparation, achieving independence, and integration in the workplace and community of a student with a disability.<sup>12</sup>
- School health and school nurse. These health services are designed to enable a child with a disability to receive FAPE as described in the child's IEP. School nurse services are services provided by a qualified school nurse. School health services are services that may be provided by either a qualified school nurse or another qualified person.
- Social work. Social work in schools including (i) preparing a social or developmental history on a child with a disability, (ii) group and individual counseling with the child and family, (iii) working in partnership with parents and others on those problems in a child's living situation (home, school, and community) that affect the child's adjustment in school, (iv) mobilizing school and community resources to enable the child to learn as effectively as possible in his or her educational program, and (v) assisting in developing positive behavioral intervention strategies.
- Speech-language pathology Services. Speech-language services include (i) identification of children with speech or language impairments, (ii) diagnosis and appraisal of specific speech or language impairments, (iii) referral for medical or other professional attention necessary for the

habilitation of speech or language impairments, (iv) provision of speech and language services for the habilitation or prevention of communicative impairments, and (v) counseling and guidance of parents, children, and teachers regarding speech and language impairments.

- Transportation. Transportation includes (i) travel to and from school and between schools, (ii) travel in and around school buildings, and (iii) specialized equipment (such as special or adapted buses, lifts, and ramps), if required to provide special transportation for a child with a disability.

## Occupational Therapy Initial Parent Letter

---

### **SAMPLE INTRODUCTION PARENT LETTER/EMAIL**

Dear Parent,

I am excited about the opportunity to work with your child on addressing their occupational therapy (OT) goals.

As a parent, you also serve as a crucial partner in the success of the child. At times, I will send home strategies or suggestions on activities you can implement to help with the reinforcement of the skills he/she is working on in occupational therapy (OT). If you should have any questions about any of the activities sent home, please don't hesitate to contact me.

I am the new provider assigned to \_\_\_\_\_ school on \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_ . You can reach me by phone at the school on my assigned days or via email at \_\_\_\_\_ .

In closing I want to invite you to observe your child in their occupational therapy (OT) session at any time during the year.

Once again, welcome to the new School Year. Let's work together to make this a productive school year for your child.

Sincerely,

---

# Occupational Therapy Checklist

## CONFIDENTIAL

### OCCUPATIONAL THERAPY (OT) CHECKLIST – FOR THE CLASSROOM TEACHER

**Name:** Name of student

**DOB:** Date of Birth

**SID#:** Student id number

**CA:** Chronological age

**Examiner:** Name and credentials

**DOE:** Date of Assessment

**DOR:** Date of Report/Review

**Grade:** The grade that the student is in

**School:** Name of Attending school

**Teacher:** Name of student's teacher

## INSTRUCTIONS

- Place a check mark (**v**) by areas of difficulty.
- Place an (**\***) by areas of prominent difficulty.
- Items in italics are RED FLAG indicators for OT assessment.
- Complete all sections.
- Provide completed form to the Occupational Therapist assigned to screen/assess the student

## SELF-HELP SKILLS

### Preschool:

\_\_\_\_\_ Is unable to use eating utensils to feed self by age 3

### School Age:

\_\_\_\_\_ Has trouble with self-help skills beyond kindergarten.

## FINE MOTOR ACTIVITIES

### Preschool:

\_\_\_\_\_ Unable to stack 4-5 small blocks

\_\_\_\_\_ Unable to string 2-3 large beads

\_\_\_\_\_ Uses whole palm to grasp small objects instead of fingers

\_\_\_\_\_ Unable to complete simple inset puzzle (circle, square/triangle)

\_\_\_\_\_ Does not turn pages in a board book

\_\_\_\_\_ *Awkward pencil grip, which interferes with handwriting legibility*

\_\_\_\_\_ Complains of fatigue/hand hurting when writing

\_\_\_\_\_ Pencil lines are tight, wobbly, too faint/too dark; pencil point often breaks when writing

\_\_\_\_\_ Difficulty coloring within the lines (after kindergarten)

\_\_\_\_\_ *Hand dominance not well established (after age 6)*

\_\_\_\_\_ *Awkward cutting skills*

- **\*\*PRE-WRITING / HANDWRITING**

**Preschool:**

- \_\_\_\_\_ Does not scribble on paper
- \_\_\_\_\_ Does not copy basic strokes
- \_\_\_\_\_ Does not trace shapes or letters

**Kindergarten:**

- \_\_\_\_\_ *Difficulty imitating simple geometric shapes*
- \_\_\_\_\_ Difficulty writing first name

**First Grade:**

- \_\_\_\_\_ *Difficulty forming upper/lower case letters and numbers*
- \_\_\_\_\_ *Decreased handwriting legibility that impacts student's success in the classroom*

**After First Grade:**

- \_\_\_\_\_ Difficulty copying from the board
- \_\_\_\_\_ *Decreased handwriting legibility that impacts student's success in the classroom*
- \_\_\_\_\_ *Difficulty completing assignments (slow writer)*

- **VISUAL PERCEPTION:**

- \_\_\_\_\_ Difficulty completing wood inset puzzles by kindergarten

\*\*also indicated above with legibility

- **SENSORY MOTOR ORGANIZATION:**

**Preschool/School Age:**

- \_\_\_\_\_ Resists being held or cuddled
- \_\_\_\_\_ Becomes upset if own clothing, hands, and/or face are messy
- \_\_\_\_\_ Exhibits odd, ritualistic, or self-stimulatory behavior
- \_\_\_\_\_ *Avoids putting hands in various textured substances (glue, putty, sand, paint)*
- \_\_\_\_\_ Seems overly sensitive to loud noises
- \_\_\_\_\_ *Constantly seeks movement opportunities*
- \_\_\_\_\_ *Flat affect, requiring constant instruction to engage in activities*
- \_\_\_\_\_ *Unable to hold head up and/or frequently falls out of chair, is clumsy*

**Specialized equipment:** \_\_\_\_\_

**Medical equipment:** \_\_\_\_\_

- **INTERVENTIONS/PROGRESS**

Please complete the following table, which contains the strategies/interventions that have been implemented to address the student's difficulties you identified above, and also a summary of the progress demonstrated.

| Difficulty | Strategy/Intervention | Length of Implementation (weeks) | Results/Progress |
|------------|-----------------------|----------------------------------|------------------|
|            |                       |                                  |                  |
|            |                       |                                  |                  |
|            |                       |                                  |                  |
|            |                       |                                  |                  |

# Occupational Therapy Screening Report Template

**CONFIDENTIAL**

## **OCCUPATIONAL THERAPY SCREENING REPORT**

### **SECTION I - STUDENT IDENTIFYING INFORMATION:**

**Name:** Name of student

**DOE:** Date of Assessment

**DOB:** Date of Birth

**DOR:** Date of Report/Review

**SID#:** Student id number

**Grade:** The grade that the student is in

**CA:** Chronological age

**School:** Name of Attending school

**Examiner:** Name and credentials

**Teacher:** Name of student's teacher

### **SECTION II**

- a. General Information:
- b. Medical and Education History (birth history, developmental history, surgical procedures, previous and current therapeutic/medical interventions):
- c. Reason for Referral/Presenting Academic Concern:

### **SECTION III – SCREENING TOOLS AND RESULTS**

- a. Clinical Observation (includes classroom observation)
- b. Classroom Teacher Interview/The Occupational Therapy Checklist, completed by classroom teacher:
- c. Parental interview:
- d. Analysis of work samples:
- e. List and describe results of screening tools and procedures

### **SECTION IV. SUMMARY AND RECOMMENDATIONS**

The results achieved from this screening are felt to be a true representation of \_\_\_\_\_'s skills in the areas observed.

- a. Strengths:
- b. Areas needing support:
- c. Impact on learning and participation in academic activities:
- d. Recommendations for the classroom staff:

The results of this screening will be used by the MDT to determine if further Occupational Therapy assessment is needed.

# Occupational Therapy Assessment Report Template

## COMPREHENSIVE OCCUPATIONAL THERAPY INITIAL EVALUATION OR RE-EVALUATION

|                                       |   |
|---------------------------------------|---|
| <b>Name:</b> Name of student          | <b>DOE:</b> Date of Assessment / Evaluation |
| <b>DOB:</b> Date of Birth             | <b>DOR:</b> Date of Report/Review           |
| <b>SID#:</b> Student ID number        | <b>Grade:</b> Student grade level           |
| <b>CA:</b> Chronological age          | <b>School:</b> Name of Attending school     |
| <b>Examiner:</b> Name and credentials | <b>Teacher:</b> Name of student's teacher   |
| <b>Parental Consent Date:</b>         |   |

### REASON FOR REFERRAL

This section must state that the assessment was ordered by the multidisciplinary team, as well as the type of assessment (i.e., initial, re-evaluation, etc....) and purpose (i.e., difficulty writing sentences during classroom activities, etc....). In the case of an initial assessment, this section may also include the person who is making the referral.

*School-based occupational therapy may be provided within special education services. OT is a related service that targets skills that may not be addressed by other services, such as functional fine motor, visual motor, visual perceptual, or sensory processing deficits that impede the student's ability to access their academic curriculum.*

**ASSESSMENT TOOLS & PROCEDURES** (List of all formal and informal assessment procedures used in completing the assessment. Delete any that were not used!)

- Review of Records
- Parent Interview
- Teacher Interview
- Other RSP Interview
- Student Interview
- Clinical Observations
- Analysis of Work Samples
- Standardized/Formal Assessments (list test names):
  - Ex. BOT-2
  - Ex. SPM
- Psychosocial assessment tools/procedures: ex. Classroom observation
- Cognitive assessment tools/procedures: ex. Classroom/clinical observations
- Physical assessment tools/procedures: ex. BOT-2, DTVP-3

### **HISTORY /BACKGROUND / RECORD REVIEW**

- Pertinent birth, medical, and academic history and information from student file
- Current academic program (general education, special education, PARCC or academic data, instructional hours on IEP, current MTSS academic or behavior interventions, 504, etc.)
- Previous OT Assessment results. State the date of previous report, name of previous examiner and findings and level of severity.
- Was MTSS initiated, completed; progress with MTSS
- If re-assessment, include list of current IEP goals, status, progress and performance level.

### **INTERVIEWS - TEACHER, PARENT, OTHER RSP and STUDENT**

Report information from the teacher and/or parent that is gathered from interviews, rating scales, or questionnaires to describe the student's current level of functioning and support possible educational impact. Narrative should the name(s) of individuals interviewed. Teacher interview is required. The other individuals are optional.

### **CLASSROOM OBSERVATIONS**

This section is required and should include observations of the student's performance across multiple educational settings. Observations should include information on the student's performance in the areas of concern expressed by the teacher, parent and/or results from testing; include behavioral observations.

### **TESTING BEHAVIOR**

This section should include observations of the student's behavior while participating in formal or informal assessment. Be sure to include any behavioral observations that may have impacted the validity of the assessment results (*ex. attention, amount of prompting required, behavioral incentives, differences in behavior in 1-1 vs. classroom, etc.*)

### **VALIDITY STATEMENT**

This section must answer the following three (3) questions: (1) Was the assessment procedure valid for the intended purpose? (2) Were the assessment procedures valid for the student to whom it was administered, and the results are a valid report of the student's current functioning? (3) Were procedural modifications made when assessing the student to increase the validity of the results?

### **FORMAL ASSESSMENTS**

**\*\*** All formal assessments or procedures for fine motor, handwriting, visual motor, visual perceptual, sensory processing, and activities of daily living must include the following:

- Description of the test, subtest or procedure and the skill areas measured.
- Description of what the student was supposed to do to indicate the skill (copy letters using sample, etc.)
- Description and interpretation of the standard/scaled scores (include table with scores if appropriate)
- Description of student's strengths and weaknesses on this formal assessment
- All standardized tests must include standardized scores, unless the clinician is unable to establish a baseline/basal. In those instances, the provider must indicate that the test/subtest was

attempted and describe (i.e., behaviors, etc...) that precluded the student from being able to complete the test tasks.

### **CLINICAL OBSERVATIONS AND ANALYSIS**

*\*Describe observations and analysis of each area below in narrative form. Do not ONLY state “within functional limits”; instead provide a description of how you came to the conclusion. Must report on all areas below to ensure the report is comprehensive.*

#### **Neuromotor/Muscular Skills:**

- Muscle Tone (*the resistance felt to movement or the tension in the muscles at rest*):
- Postural Control (*ability of the student to assume and maintain postures against gravity like pivoting on his/ her stomach, lifting legs and head while lying on his/ her back and sitting upright on the chair*):
- Muscle Strength (*the ability of a muscle to produce force, which may result in the production or prevention of movement*):
- Range of Motion (*amount of active [AROM] or passive [PROM] movement available at a joint and is necessary for movement*):
- Motor Planning (*motor planning consists of the ability of students to imagine a mental strategy to carry out a movement or an action; for instance, how to get on top of a table, how to move from point A to point B and overcome some obstacle, how to execute a dance step, or learning how to skip*):

**Fine Motor Skills:** *The refined movements of the hands and fingers to grasp and manipulate a variety of tools within the classroom and school setting, such as pencils, scissors, clothing fasteners, and utensils for self-feeding.*

*\*Examples: In-hand manipulation skills, pencil/scissor grasp, strength, stringing beads, opening containers, putty/play-doh, fingertip-thumb tapping, hand preference/dominance.*

**Bilateral Coordination Skills:** *the efficient use of both sides of the body together to perform a task; it is necessary for writing, cutting, typing, and many other academic activities and self-care tasks.*

*\*Examples: stabilizing the paper with their non-dominant hand, using non-dominant hand to manipulate the paper while cutting with dominant hand, opening and closing containers, folding, crossing midline during writing, coloring or drawing tasks, ball play, stringing beads, removing beads from putty, self-care tasks, typing.*

**Ocular Motor Skills:** *Refers to the ability of the eyes to work together to simultaneously and efficiently to focus on and track objects. Ocular motor skills are important for reading, writing, navigating one's environment, locating items within a backpack, locker or classroom, and focusing on a given task.*

*\*Can complete a brief assessment looking at child's ability to track a highlighter in all directions and converge eyes to track the highlighter to midline. Can include information on convergence/divergence, crossing midline, peripheral vision, smooth saccades, visual fixation, tracking, visual attention.*

**Visual Motor Integration (VMI) Skills:** *The ability to coordinate finger-hand movements given visual information.*

\*Examples: cutting on a line or cutting out a shape, tossing and catching a ball, coloring within a boundary, copying block designs, drawing, puzzles, etc.

**Visual Perceptual Skills:** *The brain's ability to recognize, differentiate, and interpret visual information including size, distance, and shape without motor involvement.*

\*Examples: completing simple puzzles, matching, sorting, figure ground skills, visual closure, visual spatial relations, scanning board/worksheets, climbing stairs, playground skills

**Handwriting Skills:** *Handwriting is a complex task that requires the simultaneous functioning of a variety of sensory and motor processes, including visual motor integration, visual perception, fine motor skill development, overall muscle development, strength and endurance, and sensory processing.*

\*Examples: letter formation, sizing, spacing, alignment, overall legibility, letter/number reversals, speed, endurance, copying vs. dictation, omissions. Does it improve with accommodations, such as dotted-lined paper, visual model, or a slant board?

**Sensory Processing Skills:** *Sensory processing is the brain's ability to orient, regulate, and use multi-sensory information to successfully complete activities and make the appropriate adjustments to assure ongoing success. Sensory processing skills help lay the foundation for a variety of behaviors and skills such as emotional affect, the ability to maintain focus and attention, fine motor and visual-motor skills, and the ability to transition between activities.*

\*Examples: describe appropriate responses towards sensory input, ability to self-regulate, or concerns with hypo- or hyper-responsiveness towards sensory input. Include observable behaviors, such as: covering ears, fidgeting, rocking, climbing on furniture, etc. List interventions trialed, such as: movement breaks, reward charts, frequent breaks, etc.

**Activities of Daily Living:** *Activities of daily living refer to the occupational tasks required of the person throughout the day. Daily occupations within the school setting include but are not limited to classroom/academic tasks, dressing (donning/doffing coat, changing into P.E. clothes, etc.), toileting, and self-feeding.*

\*Examples: donning/doffing coat at the beginning and end of the day, opening and closing backpack, dressing/undressing during toileting, self-feeding, washing hands, maintaining organization of materials in desks/locker, following routines

## **EQUIPMENT**

Is the student currently using equipment or support in the classroom? Description of trial equipment used during assessment. Did the IEP team consider Assistive Technology during the last IEP meeting? Is equipment recommended? Has the IEP team consulted with the Assistive Technology team for support/equipment options?

## **SUMMARY**

Summary of formal and informal assessment, observations, and interpretation. This should be written in paragraph format.

- Include student's strengths and areas of growth
- If re-assessment, compare results with previous test results. Can use chart/table if helpful
  - Psychosocial factors affecting student's access to the curriculum.
  - Cognitive factors affecting student's access to the curriculum.

- Physical factors affecting student's access to the curriculum.

### IMPACT ON LEARNING & PARTICIPATION

- Impact statements must include a clear explanation including at least one specific example of how disability impacts the student's achievement in the general education setting.
- If the results indicate that there are deficits or impairments, then the provider must indicate that there is no potential educational impact or difficulties accessing the curriculum.

### RECOMMENDATIONS

- Include strategies for teachers and parents based on student needs (must align with indicate areas of weaknesses identified in the report or concern areas stated by teacher or parent).
- Statements regarding eligibility and placement should defer to the MDT or IEP after all relevant data / assessments have been reviewed and discussed. **The following statement must be included:** *The results of this evaluation will be reviewed by the MDT to determine the need for occupational therapy as a related service within their educational curriculum.*
- Do not use any references to whether the student qualifies/does not qualify OR make reference to the continuation/discontinuance of services OR service amount/frequency
- Do not recommend any additional evaluations, services, or equipment/materials that parents may expect DCPS to fund.

Sensory Processing Measure (SPM), 2nd Edition  
Will be updated

OBSERVATIONS AND INTERPRETATION:

### Sensory Profile 2: School Companion

The SP-2 is a measure of students' responses to sensory events in the classroom. The teacher completes the Sensory Profile School Companion by assessing the frequency of a student's responses to environmental sensations, body sensations, and his or her classroom behaviors as described in 44 items. Research has shown that the Sensory Profile 2 School Companion can help identify a student's sensory processing patterns; the results can then be used to consider how these patterns might be contributing to or creating barriers to performance in the classroom.

The chart below classifies the child's functioning into one of five categories: Much Less Than Others (2% of children), Less Than Others (14% of children), Just Like the Majority of Others (68% of children), More Than Others (14% of children), and Much More Than Others (2% of children), as compared to same-age peers.

| Sensory Profile 2: School Companion           |                 |                       |                  |                                  |                  |                       |

OBSERVATIONS AND INTERPRETATION:

### The Adolescent/Adult Sensory Profile

The Sensory Profile is a standardized, judgment based, self-assessment questionnaire that asks examines about their responses to sensory stimulation during daily activities. Scores represent patterns of sensory processing using the descriptors of Low Registration, Sensation Seeking, Sensory Sensitivity, and Sensation Avoiding. Each category identifies levels of behaviors compared to other people, ranging from “Much Less Than Most People” to “Much More Than Most People,” Results are indicated below:

| <b>ADOLESCENT/ADULT SENSORY PROFILE</b> |                        |                                   |                              |                               |                              |                                   |
|---|------------------------|-----------------------------------|------------------------------|-------------------------------|------------------------------|-----------------------------------|
| <b>Age Range 18-64</b>                  |                        |                                   |                              |                               |                              |                                   |

### OBSERVATIONS AND INTERPRETATION:

**Low Registration:** *Sensory registration refers to the ability to accurately identify one’s sensory environment. Examples of behaviors that require sensory registration include, the ability to keep up with peers when trying to follow an activity or task, the ability to notice when hands and face are dirty, and the ability to register ambient touch and maneuver around environmental obstacles.*

**Sensation Seeking:** *Sensory seeking refers to an individual creating additional stimuli or looking for environments that provide sensory stimuli. Individuals who are sensory seeking have an interest in exploring the environment and generally associate sensory experiences as pleasurable. Some behaviors that are included in this category are: the creation of stimuli, easily becoming bored in low stimulus environments, or the preference to attend events with a lot of music.*

**Sensory Sensitivity:** *This category highlights behaviors that reveal hypersensitivity or aversion behaviors to different sensations. Some possible behaviors that are included in this category are: fear of heights, easily becoming dizzy, and the sensitivity to certain fabric textures.*

**Sensation Avoiding:** *This category highlights the tendency to avoid sensory experiences. Some possible behaviors included in this category are the avoidance of situations where unexpected things might happen, the preference to spend time alone, and the use of strategies to decrease ambient sound.*

Evaluation Tool of Children's Handwriting (ETCH)

The ETCH is a standardized test that assesses handwriting and considers the legibility of 85% to be accepted by most teachers (teachers feel that they can decipher about 15% of a student's challenging writing). This test was administered to gain additional information about visual-motor skills, with emphasis on writing legibility. *Student* completed the following tasks: printing the alphabet, writing numbers, copying sentences from near-point and far-point, dictation, and writing an original sentence. Scores are then used to determine whether further evaluation of possible underlying deficits is warranted.

OBSERVATIONS AND INTERPRETATION:

Minnesota Handwriting Assessment (MHA):

The MHA is a tool that quantifies selected aspects of a student's handwriting in manuscript form (Zaner-Bloser and D'Nealian). It is normed for students in 1st or 2nd grades. This assessment requires the student to copy words from a printed stimulus and assesses their handwriting in six categories: rate (speed), legibility, form, alignment, sizing, and spacing. Scores in each category are rated "like peers", "somewhat below peers," or "well below peers." Scores are then used to determine whether further evaluation of possible underlying deficits is warranted.

OBSERVATIONS AND INTERPRETATION:

Test of Handwriting Skills (THS):

This tool can be utilized to evaluate manuscript and cursive handwriting for students aged 6.0-18.0 years of age. It is untimed, but typically takes 10 minutes to administer. This test is intended to evaluate the underlying neurosensory integration skills or deficits that may impact a child's handwriting, not simply assess classroom "penmanship."

| SUBTEST      | SKILL                                  | WHAT THE TASK REQUIRES                                   | SCALED SCORE | DESCRIPTOR |

OBSERVATIONS AND INTERPRETATION:

Bruininks-Oseretsky Test of Motor Proficiency, 2nd edition (BOT-2)

The BOT-2 measures a wide array of motor skills for children ages 4-22. The following subtests were administered: Fine Motor Precision (assesses precise control of finger and hand movement), Fine Motor Integration (assess ability to copy various shapes of increasing complexity from a model), Manual Dexterity (assesses reaching, grasping, and bimanual coordination with small objects), and Upper-Limb Coordination (assesses coordination of task performed with arms). The BOT- subtest and composite scores are as follows:

| Subtest:<br>Composite:      | Scale<br>Score | Composite<br>Standard Score | Percentile<br>Rank | Description of<br>Performance |
|-----------------------------|----------------|-----------------------------|--------------------|-------------------------------|
| Fine Motor Precision        |                | --                          | --                 |                               |
| Fine Motor Integration      |                | --                          | --                 |                               |
| <b>FINE MANUAL CONTROL</b>  | --             |                             |                    |                               |
| Manual Dexterity            |                | --                          | --                 |                               |
| Upper-Limb Coordination     |                | --                          | --                 |                               |
| <b>MANUAL COORDINATION</b>  | --             |                             |                    |                               |
| <b>FINE MOTOR COMPOSITE</b> |                |                             |                    |                               |

- \* Subtest Scale Scores within 25+ are considered Well-Above Average
- \* Subtest Scale Scores within 20-24 are considered Above Average
- \* Subtest Scale Scores within 11-19 are considered Average
- \* Subtest Scale Scores within 6-10 are considered Below Average
- \* Subtest Scale Scores within 5 or less are considered Well-Below Average

OBSERVATIONS AND INTERPRETATION:

The Beery-Buktenica Developmental Test of Visual-Motor Integration, 6<sup>th</sup> Edition (Beery VMI) and supplemental tests for Visual Perception and Motor Coordination

The Beery VMI is designed to assess the extent to which individuals can integrate their visual and motor abilities. It consists of a developmental sequence of geometric forms to measure the extent to which individuals can coordinate their visual perception and fine motor abilities. The supplemental tests (Visual Perception and Motor Coordination) are provided to statistically compare an individual's Beery VMI results with relatively pure visual and motor performances. Problems with visual motor integration may impact a student's efficiency with handwriting, organizing written math problems, and various tasks requiring eye-hand coordination. Results are listed in the table below:

| Beery VMI  |                |                 |                   |
|--|----------------|-----------------|-------------------|
| Test   | Standard Score | Percentile Rank | Performance Range |
| Visual-Motor Integration   |                |                 |                   |
| Visual Perception  |                |                 |                   |
| Motor Coordination   |                |                 |                   |
| Standard Score: <70 Very Low, 70 – 79 Low, 80 – 89 Below Average, 90 – 109 Average, 110 – 119 Above Average, 120 – 129 High, >130 Very High. |                |                 |                   |

OBSERVATIONS AND INTERPRETATION:

Visual Motor Integration: *Measures a child's ability to coordinate visual perception and motor coordination to copy complex geometric designs in a developmental sequence. (Child's name) demonstrated strengths/difficulty with...*

Visual Perception: *Measures the ability to match identical designs. (Child's name) demonstrated strengths/difficulty with...*

Motor Coordination: *Measures motor control and consists of drawing lines within a defined boundary. (Child's name) demonstrated difficulty/strengths with....*

Wide Range Assessment of Visual Motor Abilities (WRVMA):

The WRVMA compares visual–spatial, fine motor, and integrated visual–motor skills using norms gathered from the same sample. Designed for 3- to 17-year-olds, WRVMA includes three subtests, which can be used individually or in combination. The drawing test measures visual–motor integration by asking a student to copy designs that are arranged in order of increasing difficulty. The matching test assesses visual–spatial skills by asking a child to look at a visual “standard” and select the option that “goes best” with it. With items are arranged in order of increasing difficulty.

| SUBTEST  | STANDARD SCORE | DESCRIPTIVE CATEGORY |

OBSERVATIONS AND INTERPRETATION:

Developmental Test of Visual Perception- 3rd edition (DTVP-3)

The DTVP-3 is a norm referenced standardized test of visual perceptual and visual motor abilities for children ages 4 - 12.11 years. It consists of five subtests that make up three composite scores: Motor-Reduced Visual Perception, Visual-Motor Integration, and General Visual Perception (combination of motor-reduced and motor-enhanced subtests). The Motor-Reduced Visual Perception subtests include *Figure-Ground*, *Visual Closure*, and *Form Constancy*. The Visual-Motor Integration subtests include *Eye-Hand Coordination* and *Copying*.

- *Eye-Hand Coordination*: Measures the ability to draw precise straight or curved lines in accordance with visual boundaries.
- *Copying*: Measures the ability to recognize the features of a design and to draw it from a model.
- *Figure-Ground*: Measures the ability to see specific figures even when they are hidden in confusing, complex backgrounds.
- *Visual Closure*: Measures the ability to recognize a stimulus figure when it has been incompletely drawn.
- *Form Constancy*: Measures the ability to match two figures that vary on one or more discriminating features (i.e., size, position, or shade).

The DTVP-3 scores are as follows. *\*Italics indicate subtests of the visual-motor integration composite*

| Subtest                         | Standard Score | Percentile | Performance |
|---------------------------------|----------------|------------|-------------|
| <i>Eye-Hand Coordination</i>    |                |            |             |
| <i>Copying</i>                  |                |            |             |
| Figure-Ground                   |                |            |             |
| Visual Closure                  |                |            |             |
| Form Constancy                  |                |            |             |
|                                 | Quotient       | Percentile | Performance |
| <i>Visual-Motor Integration</i> |                |            |             |
| Motor-Reduced Visual Perception |                |            |             |
| General Visual Perception       |                |            |             |

\* Subtest Standard Scores within 13-14 are considered Above Average.

\* Subtest Standard Scores within 8-12 are considered Average.

\* Subtest Standard Scores within 6-7 are considered Below Average.

\* Subtest Standard Scores within 4-5 are considered Poor.

\* Subtest Standard Scores within 1-3 are considered Very Poor.

OBSERVATIONS AND INTERPRETATION:

Developmental Test of Visual Perception- Adolescent and Adult (DTVP-A)

The DTVP-A is a standardized test of visual perceptual and visual motor abilities for people aged 11-74 years. It consists of six subtests that make up three composite indexes: Motor-Reduced Visual Perception, Visual-Motor Integration, and General Visual Perception (combination of motor-reduced and motor-enhanced subtests). The Motor-Reduced Visual Perception subtests include *Figure-Ground*, *Visual Closure*, and *Form Constancy*. The Visual-Motor Integration subtests include *Copying*, *Visual-Motor Search*, and *Visual-Motor Speed*.

- *Copying*: Individuals are shown a simple figure and asked to draw it on a piece of paper. The figure serves as a model for the drawing. Subsequent figures are increasingly complex, eventually becoming three-dimensional.
- *Figure-Ground*: Individuals are shown stimulus figures and asked to find as many of the figures as they can on a page where the figures are hidden in a complex, confusing background.
- *Visual-Motor Search*: The individual is shown a page covered in numbered circles, randomly arranged on the page. The individual connects the circles with a line, in numerical sequence, as quickly as possible. To enhance the visual search component of the task, distractor circles without numbers are included.
- *Visual Closure*: Individuals are shown a stimulus figure and asked to select the exact figure from a series of figures that have been incompletely drawn. To complete the match, examinees have to visualize the missing parts of the figures in the series.
- *Visual-Motor Speed*: Individuals are shown (a) four different geometric designs, two of which have special mark, and (b) a page filled completed with the four designs, none of which have marks in them. Examinees are to draw the marks in as many appropriate designs as they can within a set time period.
- *Form Constancy*: Individuals are shown a stimulus figure and asked to find it twice in a series of figures. In the series, the targeted figure appears in a different size, position, and/or shade, and it may be hidden in a distracting background.

Student's scores are as follows. *\*Italics indicate subtests of the visual-motor integration composite*

| Subtest                         | Standard Score  | Percentile | Performance |
|---------------------------------|-----------------|------------|-------------|
| <i>Copying</i>                  |                 |            |             |
| Figure-Ground                   |                 |            |             |
| <i>Visual-Motor Search</i>      |                 |            |             |
| Visual Closure                  |                 |            |             |
| <i>Visual-Motor Speed</i>       |                 |            |             |
| Form Constancy                  |                 |            |             |
|                                 | Composite Index | Percentile | Performance |
| General Visual Perception       |                 |            |             |
| Motor-Reduced Visual Perception |                 |            |             |
| <i>Visual-Motor Integration</i> |                 |            |             |

\* Subtest Standard Scores within 13-14 are considered Above Average

\* Subtest Standard Scores within 8-12 are considered Average

\* Subtest Standard Scores within 6-7 are considered Below Average

- \* Subtest Standard Scores within 4-5 are considered Poor
- \* Subtest Standard Scores within 1-3 are considered Very Poor

OBSERVATIONS AND INTERPRETATION:

Motor-Free Visual Perception Test, 4th Edition (MVPT-4)

Visual perception is the ability to perceive, process and respond to information within the environment in order to discriminate position, shapes, colors and letter like forms. It is the capacity to interpret or give meaning to what is seen. This area was assessed using the Motor-Free Visual Perception Test (MVPT-4). The purpose of the MVPT-4 is to measure the brain's ability to understand and interpret what the eyes see. Norms are based on a stratified national sample provided for children and adults ages 4-0 to 80+ years. This test assesses figure ground, visual discrimination, visual memory, visual closure and spatial relations. *Student* was presented with a series of test plates and asked to identify the correct answer from among four alternatives for each item. *No motor Involvement is required in providing responses.* Visual Perceptual abilities were categorized under five visual perceptual processes, which are:

- Figure-ground: To distinguish an object from background or surrounding objects.
- Visual Discrimination: The ability to visually perceive differences and match forms. To discriminate position, shapes, colors and letter like forms.
- Spatial relationships: The ability to orient one's body in space and to perceive the position of objects in relation to oneself and other objects (figure reversals and figure rotations).
- Visual-Closure: Determine among unfinished forms the one that is the same as a completed form.
- Visual memory: Remember characters for immediate recall and being able to find among other forms.

| MVPT-4 | Standard Score | Percentile |
|--------|----------------|------------|
|        |                |            |

OBSERVATIONS AND INTERPRETATION:

PDMS-2 (Peabody Developmental Motor Scales, 2nd edition)

The PDMS-2 is a norm-referenced and standardized assessment of fine and gross motor skills for children from birth to 5 years of age. The fine motor composite of the PDMS-2 includes two subtests, grasping (how a child holds and manipulates objects) and visual motor integration (attention to task and problem-solving abilities). The gross motor composite includes three subtests that measure the use of large muscle systems: stationary (ability to sustain control of body within center of gravity), locomotion (ability to move from one place to another), and object manipulation (the ability to manipulate objects with their hands or legs).

| Sub-Category             | Standard Score  | Percentile | Description |
|--------------------------|-----------------|------------|-------------|
| Stationary               |                 |            |             |
| Locomotion               |                 |            |             |
| Object Manipulation      |                 |            |             |
| Grasping                 |                 |            |             |
| Visual-Motor Integration |                 |            |             |
|                          | Composite Score | Percentile | Description |
| Fine Motor Quotient      |                 |            |             |
| Gross Motor Quotient     |                 |            |             |
| Total Motor Quotient     |                 |            |             |

\* Subtest Standard Scores within 13-14 are considered Above Average

\* Subtest Standard Scores within 8-12 are considered Average

\* Subtest Standard Scores within 6-7 are considered Below Average

\* Subtest Standard Scores within 4-5 are considered Poor

\* Subtest Standard Scores within 1-3 are considered Very Poor

OBSERVATIONS AND INTERPRETATION:

Developmental Assessment of Young Children, Second Edition (DAYC-2)

The DAYC-2 is a norm-referenced assessment of early childhood development for children ages birth through 5:11. It measures a child's developmental level across five domains: cognition, communication, social-emotional development, physical development, and adaptive behavior. The purpose of the DAYC-2 is to identify children who perform significantly below same-aged peers in one or more domains, and to monitor progress with intervention.

| Domain Area                  | Standard Score | Percentile Rank | Descriptive Term |
|------------------------------|----------------|-----------------|------------------|
| Cognition                    |                |                 |                  |
| Communication                |                |                 |                  |
| Social-Emotional Development |                |                 |                  |
| Physical Development         |                |                 |                  |
| Adaptive Behavior            |                |                 |                  |

OBSERVATION AND INTERPRETATION (only report on domain areas you assessed):

Cognitive Domain: *measures conceptual skills, including memory, purposive planning, decision making, and discrimination.*

Communication Domain: *measures skills related to sharing ideas, information, and feelings with others, both verbally and nonverbally.*

Social-Emotional Domain: *measures social awareness, social relationships, and social competence.*

Physical Development Domain: *measures fine motor and gross motor development.*

Adaptive Behavior Domain: *measures independent, self-help functioning.*

School Function Assessment (SFA)

The SFA is designed for students in grades K-6 and is used to measure a student's performance on functional tasks which support their participation in the academic setting. The SFA is a questionnaire completed by one or more school professionals who are familiar with the child, and consists of three parts: Participation, Task Supports, and Activity Performance. Activity Performance is comprised of two sub-sections: Physical Tasks and Cognitive/Behavioral Tasks. Physical tasks include travel, maintaining and changing positions, recreational movement, manipulation with movement, using materials, setup and cleanup, eating and drinking, hygiene, clothing management, up/downstairs, written work, and computer and equipment use. Cognitive/behavioral tasks include functional communication, memory and understanding, following social conventions, compliance with adult directives and school rules, task behavior/completion, positive interaction, behavior regulation, personal care awareness, and safety. In the Participation section, students are rated on a scale of 1 (participation extremely limited) to 6 (full participation). In Task Supports and Activity Performance, students are rated on a scale of 1 (extensive assistance/adaptations) to 4 (no assistance/adaptations). Scores provide insight into the student's functional abilities and how it impacts their participation and performance within their academic setting.

| FUNCTIONAL PROFILE                       |        |
|--|--------|
| SETTING                                  | RATING |
| Classroom (General or Special Education) |        |
| Playground/Recess                        |        |
| Transportation                           |        |
| Bathroom/Toileting                       |        |
| Transitions                              |        |
| Mealtime/Snack Time                      |        |

OBSERVATION AND INTERPRETATION (only report on domain areas you assessed):

Movement Assessment Battery for Children –2: is a standardized assessment for children ages 3 to 16 that provides quantitative and qualitative information about how a child performs and approaches various movement tasks. The assessment consists of formal testing and a checklist (for ages 5-12). The formal assessment includes three components: Manual Dexterity, Aiming and Catching, and Balance. Scores in each section fall into a specific zone; the green zone indicates performance within the normal range, the amber zone indicates that the child is “at risk” and needs careful monitoring, and the red zone indicates definite motor impairment. The checklist focuses on how children manage everyday tasks across environments and consists of a motor and non-motor component. The motor component considers the child’s performance in different movement contexts, and the non-motor component considers other aspects such as inattentiveness and behavior, which may impact the child’s ability to perform and learn new movement skills.

| Movement Assessment Battery for Children -2 (Movement ABC-2) |                |            |      |
|--|----------------|------------|------|
| Component  | Standard Score | Percentile | Zone |
| <i>Manual Dexterity</i>                                      |                |            |      |
| <i>Aiming &amp; Catching</i>                                 |                |            |      |
| <i>Balance</i>   |                |            |      |
| <b><i>Total Test Score</i></b>                               |                |            |      |

| Movement Assessment Battery for Children Checklist |       |      |
|--|-------|------|
|  | Score | Zone |
| Section A  |       |      |
| Section B  |       |      |
| <b>Total Motor Score</b>                           |       |      |
| Section C  |       |      |

Discuss findings and observations of both the formal testing and checklist, and the impact it has on the student within the school environment.

**Goal-Oriented Assessment of Lifeskills (GOAL)** *The GOAL is a standardized assessment of motor abilities that are fundamental to execution of daily living skills. This assessment is for children ages 7-17 and is based on theories of motor development and sensory integration, and how these factors impact a person's ability to participate in home, school, and community environments. Scoring of the GOAL is based on three essential elements of performance: independence, accuracy, and speed. Standard scores are developed for both fine motor and gross motor domains and use normative comparisons to peers of the same age and same gender.*

| Goal-Oriented Assessment of Life Skills (GOAL) |                |                 |                   |
|--|----------------|-----------------|-------------------|
| Domain Area                                    | Standard Score | Percentile Rank | Descriptive Range |
| <i>Fine Motor</i>                              |                |                 |                   |
| <i>Gross Motor</i>                             |                |                 |                   |

**Fine Motor Domain:** Fine motor tasks within this domain include cutting, spearing and scooping food, opening a keyed and combination lock, coloring within a boundary, cutting, folding, taping, and organizing papers within a notebook. Discuss student success with each task, including their independence, accuracy and speed.

**Gross Motor Domain:** Gross motor tasks within this domain included clothing management, ball play, carrying a tray, and navigating obstacles. Discuss student success with each task, including their independence, accuracy and speed.

OBSERVATIONS AND INTERPRETATION (\*for each area assessed):

## Physical Therapy Initial Parent Letter

---

### SAMPLE INTRODUCTION PARENT LETTER

Dear Parent,

Welcome to School Year 20XX-20XX! I am excited about the opportunity to work with your child on addressing their physical therapy (PT) goals.

As the parent, you also serve as a crucial partner in the success of the child. At times, I will send home strategies or suggestions on activities you can implement to help with the reinforcement of the skills he/she is working on in physical therapy (PT). If you should have any questions about any of the activities sent home, please don't hesitate to contact me.

I am assigned to \_\_\_\_\_ school on \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_. You can reach me by phone at the school on my assigned days or via email at \_\_\_\_\_.

In closing I want to invite you to observe your child in their physical therapy (PT) session at any time during the year.

Once again, welcome to the new School Year. Let's work together to make this a productive school year for your child.

Sincerely,

---

|                             |      |

# Physical Therapy Screening Report Template

**CONFIDENTIAL**

## PHYSICAL THERAPY SCREENING REPORT

### SECTION I - STUDENT IDENTIFYING INFORMATION:

**Name:** Name of student

**DOB:** Date of Birth

**SID#:** Student id number

**CA:** Chronological age

**Examiner:** Name and credentials

**DOE:** Date of Assessment

**DOR:** Date of Report/Review

**Grade:** The grade that the student is in

**School:** Name of Attending school

**Teacher:** Name of student's teacher

### SECTION II -

#### GENERAL INFORMATION:

**MEDICAL AND EDUCATIONAL HISTORY** (birth history, developmental history, surgical procedures, previous and current therapeutic/medical interventions):

**REASON FOR REFERRAL/PRESENTING ACADEMIC CONCERN:**

### SECTION III – SCREENING TOOLS AND RESULTS

a. Record Review:

b. Clinical Observation (including classroom observations)

c. Classroom Teacher Interview/The Physical Therapy Checklist, completed by classroom teacher:

d. Parental interview:

e. Analysis of Balance, Bilateral Coordination, and Upper Extremity Coordination - Results

- Balance:
- Bilateral Coordination:
- Upper Extremity Coordination:

| Summary of Gross Motor Screening |       |  |              |
|----------------------------------|-------|--|--------------|
| Skill                            | Grade | Screening Test   | Pass/Fail/NA |
| Balance                          | K     | Balance on each foot for 5 seconds   |              |
| Balance                          | 1-2   | Balance on each foot for 10 seconds  |              |
| Balance                          | 3     | Balance on each foot for 12 seconds  |              |
| Bilateral Coordination           | K-2   | Jumping up and down on two feet and landing on both feet while clapping hands five times                           |              |
| Bilateral Coordination           | 3     | Jumping in the air and touching both heels with both hands during two out of three trials                          |              |
| Upper Extremity Coordination     | K-1   | Toss an 8 ½ -inch playground ball in the air and catch it five consecutive times (ball may be trapped in the body) |              |

|                                    |     |   |  |
|------------------------------------|-----|---|--|
| Upper<br>Extremity<br>Coordination | 2-3 | Toss a 4- to 5-inch ball into the air and catch it with hands,<br>five times consecutively, with hands only |  |
|------------------------------------|-----|---|--|

**SECTION IV. SUMMARY AND RECOMMENDATIONS**

The results achieved from this screening are felt to be a true representation of \_\_\_\_\_'s skills in the areas observed.

**Strengths:**

**Areas Needing Support:**

**Impact on Learning and Participation:**

**Recommendations:**

The results of this screening will be used by the MDT to determine if further Physical Therapy assessment is needed.

## COMPREHENSIVE PHYSICAL THERAPY INITIAL EVALUATION OR RE-EVALUATION

|                        |                        |
|------------------------|------------------------|
| Name:                  | Date(s) of Evaluation: |
| Date of Birth:         | Date of Report:        |
| Student ID Number:     | Grade:                 |
| Age:                   | School:                |
| Examiner:              | Teacher:               |
| Parental Consent Date: |                        |

### REASON FOR REFERRAL

This section must state that the assessment was ordered by the multidisciplinary team, as well as the type of assessment (i.e., initial, re-evaluation, etc....) and purpose (i.e., difficulty writing sentences during classroom activities, etc....). In the case of an initial assessment, this section may also include the person who is making the referral.

*School-based physical therapy may be provided within special education services. Physical therapy is a related service that targets functional gross motor skills which impede the student's ability to navigate and access their school environment and educational goals.*

**ASSESSMENT TOOLS & PROCEDURES** (List of all formal and informal assessment procedures used in completing the assessment. Delete any that were not used!)

- Review of Records
- Parent Interview
- Teacher Interview
- Other RSP Interview
- Student Interview
- Clinical Observations
- Standardized/Formal Assessments (list test names):
  - Ex. SFA
- Body Structures assessment tools/procedures
- Body Functions assessment tools/procedures
- Activity limitations/participation restrictions assessment tools/procedures

### HISTORY /BACKGROUND / RECORD REVIEW

- Pertinent birth, medical, and academic history and information from student file

- Current academic program (general education, special education, PARCC or academic data, instructional hours on IEP, current MTSS academic or behavior interventions, 504, etc.)
- Previous PT Assessment results. State the date of previous report, name of previous examiner and findings and level of severity.
- Was MTSS initiated, completed; progress with MTSS
- If re-assessment, include list of current IEP goals, status, progress and performance level.

### **INTERVIEWS - TEACHER, PARENT, OTHER RSP and STUDENT**

Report information from the teacher and/or parent that is gathered from interviews, rating scales, or questionnaires to describe the student's current level of functioning and support possible educational impact. In this section, evaluator can discuss student's participation in field trips and community-based instruction. Narrative should the name(s) of individuals interviewed. Teacher interview is required. The other individuals are optional.

### **CLASSROOM/SCHOOL ENVIRONMENT OBSERVATIONS**

This section is required and should include observations of the student's performance across multiple educational settings. Observations should include information on the student's performance in the areas of concern expressed by the teacher, parent and/or results from testing; include behavioral observations and observations of transitions between settings.

### **TESTING BEHAVIOR and COGNITIVE FUNCTIONS**

This section should include observations of the student's behavior while participating in formal or informal assessment. Be sure to include any behavioral observations or cognitive functions that may have impacted the validity of the assessment results (*ex. attention, amount of prompting required, behavioral incentives, differences in behavior in 1-1 vs. classroom, etc.*)

### **FORMAL ASSESSMENTS**

\*\* All formal assessment write-ups must include the following:

- Description of the test, subtest or procedure and the skill areas measured.
- Description of what skill the testing item was assessing
- Description and interpretation of the standard/scaled scores (include table with scores if appropriate)
- Description of student's strengths and weaknesses on this formal assessment
- All standardized tests must include standardized scores, unless the clinician is unable to establish a baseline/basal. In those instances, the provider must indicate that the test/subtest was attempted and describe (i.e., behaviors, etc...) that precluded the student from being able to complete the test tasks.

### **CLINICAL OBSERVATIONS AND ANALYSIS**

*\*Describe observations and analysis of each area below in narrative form. Do not state "within functional limits." Must report on all areas below to ensure the report is comprehensive.*

#### **Body Structures:**

- Neuromotor (*relating to nerves and muscles, and the communication between the muscular and nervous systems*):
- Musculoskeletal (*relating to the joints, tendons, ligaments, nerves, and muscles which support gross body structures such as the limbs, neck, and back*):
- Muscle Tone (*the resistance felt to movement or the tension in the muscles at rest*):
- Range of Motion (*amount of active [AROM] or passive [PROM] movement available at a joint and is necessary for movement*):

### **Body Functions:**

- Motor Planning (*the ability of students to imagine a mental strategy to carry out a movement or an action*):
- Postural Control (*ability of the student to assume and maintain postures against gravity*):
- Coordination (*the efficient use of body parts together to simultaneously perform an action or task*):
- Muscle Strength (*the ability of a muscle to produce force, which may result in the production or prevention of movement*):
- Endurance (*the ability to sustain contraction of a muscle or muscle groups against resistance for a period of time*):

### **Activity Limitations/Participation Restrictions:**

- Ambulation/Mobility:
- Transfers/Transitions:
- Navigating stairs:
- Participation in physical education:
- Cafeteria Skills:
- Arrival and Dismissal:
- Fire Drills/Evacuation:
- Bus Accessibility:

### **EQUIPMENT**

Is the student currently using equipment or support in the classroom? Description of trial equipment used during assessment. Did the IEP team consider Assistive Technology during the last IEP meeting? Is equipment recommended? Has the IEP team consulted with the Assistive Technology team for support/equipment options?

### **VALIDITY STATEMENT**

This section must answer the following three (3) questions: (1) Was the assessment procedure valid for the intended purpose? (2) Were the assessment procedures valid for the student to whom it was administered,

and the results are a valid report of the student's current functioning? (3) Were procedural modifications made when assessing the student to increase the validity of the results?

### **SUMMARY**

Summary of formal and informal assessment, observations, and interpretation. This should be written in paragraph format.

- Include student's strengths and areas of growth
- If re-assessment, compare results with previous test results. Can use chart/table if helpful
- Be sure to include the following (in paragraph/narrative form):
  - Body structures affecting the student's access to the school environment.
  - Bodily functions affecting the student's access to the school environment.
  - Activity limitations/participation restrictions affecting student's access to the school environment.
  - Overall functional level within the school setting

### **IMPACT ON LEARNING & PARTICIPATION**

- Impact statements must include a clear explanation including at least one specific example of how disability impacts the student's achievement in the general education setting.
- If the results indicate that there are deficits or impairments, then the provider must indicate that there is no potential educational impact or difficulties accessing the school environment and/or curriculum.

### **RECOMMENDATIONS**

- Include strategies for teachers and parents based on student needs (must align with indicate areas of weaknesses identified in the report or concern areas stated by teacher or parent).
- Statements regarding eligibility and placement should defer to the MDT or IEP after all relevant data / assessments have been reviewed and discussed. Example statement: *The results of this evaluation will be reviewed by the MDT to determine the need for physical therapy as a related service within their educational curriculum.*
- Do not use any references to whether the student qualifies/does not qualify OR make reference to the continuation/discontinuance of services OR service amount/frequency
- Do not recommend any additional evaluations, services, or equipment/materials that parents may expect DCPS to fund.

## Alternative Assessment Report Template

### CONFIDENTIAL

#### Occupational Therapy Data Review Evaluation or Physical Therapy Data Review Evaluation

#### STUDENT IDENTIFYING INFORMATION:

**Name:** Name of student

**DOB:** Date of Birth

**SID#:** Student id number

**CA:** Chronological age

**Examiner:** Name and credentials

**DOE:** Date of Assessment

**DOR:** Date of Report/Review

**Grade:** The grade that the student is in

**School:** Name of Attending school

**Teacher:** Name of student's teacher

**Parent Consent Date:**

#### SECTION II. BACKGROUND INFORMATION:

- Background History and Record Review:
  - Birth history:
  - Medical/Physical history:
  - Psychosocial history:
  - Cognitive history:
  - Academic history:
  - Previous Services:
- Student's current program and support consists of:
- Progress on intervention (MTSS or Occupational/Physical Therapy IEP goals)
- Reason for Referral:

#### SECTION III. ASSESSMENT PROTOCOL:

- Record Review
  - SEDS Review, service trackers from RSPs
- Interviews
- Clinical Observations, Classroom Observations and Clinical Assessment
- Analysis of Work Samples
- Previous assessment reports
- Standardized/Non-Standardized Testing

#### A. Interviews

- Classroom Teacher Interview:
  - Teacher's concerns/observed difficulties as they pertain to academics affected by the areas of concern
  - Accommodations and adaptations the classroom teacher has made to mitigate/remediate deficits, and results.
  - Information on the student's cooperation towards the implementation of those accommodations and adaptations.

- Special Education Teacher Interview:
- Parental Interview:
- Other Related-Service Provider Interview:
- Student Interview:

#### **B. Testing Attempts**

- An explicit explanation of why a complete battery of testing measures was not conducted
- A chronological reference to each act of due diligence conducted by the provider. This includes information you sent or provided to the parent/guardian in any format, explaining the scope of the testing you intended to conduct and requesting parental assistance make the student available for testing and to be present on the day of the evaluation. Include dates of phone calls and/or letters sent to caregiver for this purpose.
- Explain your interaction with the LEA, case manager, and school staff. Include reference to any communication that the LEA or school staff has made to the parent regarding this matter

#### **RECOMMENDATIONS:**

- Your report must state that you or another DCPS provider may complete the full range of initially recommended testing if upon review of this report by the IEP team both of the following statements are true:
  1. The team (or parent) still believes there is not enough data available to make an eligibility determination; AND
  2. There is reason to think that the factors that previously inhibited you from completing the testing will be ameliorated.

 Neuropsychological \_\_\_\_\_ Occupational Therapy \_\_\_\_\_ Physical Therapy \_\_\_\_\_ Psychiatric \_\_\_\_\_  
 Psychological \_\_\_\_\_ Speech/Language \_\_\_\_\_ Other \_\_\_\_\_

## Part I: Review by Qualified Personnel

Name and title of DCPS qualified personnel reviewing assessment: \_\_\_\_\_

Name and title of person who completed the independent assessment/and name and title of supervisor (if applicable) \_\_\_\_\_

If the person who completed the assessment is an audiologist, occupational therapist, physical therapist, psychologist, physician, or speech-language therapist, is the person licensed? \_\_\_\_\_ Yes \_\_\_\_\_ No

The report is written, dated, and signed by the individual examiner who conducted the assessment or appropriate designee and appears on agency/company letterhead? \_\_\_\_\_ Yes \_\_\_\_\_ No

Testing and assessment materials and procedures used to assess the student's need for special education and related services are:

- Valid and reliable? \_\_\_\_\_ Yes \_\_\_\_\_ No
- Current version of assessment (newer version that is more than 2 years old does not exist)?  
\_\_\_\_\_ Yes \_\_\_\_\_ No
- Provided and administered in the student's native language, unless it is clearly not feasible to do so?  
\_\_\_\_\_ Yes \_\_\_\_\_ No
- Valid for the specific purpose for which they are used? \_\_\_\_\_ Yes \_\_\_\_\_ No

## Part II: Review, Considerations, and Conclusions

The report includes the following:

- A review of relevant background information (including observation, teacher/parent interview)? \_\_\_\_\_ Yes \_\_\_\_\_ No
- A description of the student's performance on the assessment? \_\_\_\_\_ Yes \_\_\_\_\_ No
- A description of the student's performance in the current school environment (including educational impact)?  
\_\_\_\_\_ Yes \_\_\_\_\_ No
- A variety of assessment tools and strategies to directly assist in determining if the student has an educational handicapping condition as defined by IDEA and Chapter 30? \_\_\_\_\_ Yes \_\_\_\_\_ No

Are there additional data available to the school, which suggests that there are other factors, which significantly impact the student, such as health, attendance, social, or other issues?

\_\_\_\_\_ Yes \_\_\_\_\_ No

If yes, please specify \_\_\_\_\_

Are conclusions supported by the data provided? \_\_\_\_\_ Yes \_\_\_\_\_ No

Is additional information needed? \_\_\_\_\_ Yes \_\_\_\_\_ No

If yes, please specify \_\_\_\_\_

Reviewer has had direct contact with student? \_\_\_\_\_ Yes \_\_\_\_\_ No

The MDT concludes that a DCPS assessment is waived. \_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Yes, with reservations (attach note)

## Occupational Therapy/Physical Therapy Independent Assessment Review

**Name:** Name of student

**DOB:** Date of Birth

**SID#:** student id number

**CA:** Chronological age

**Examiner:** Name and credentials

**DOE:** Date of Assessment

**DOR:** Date of Report/Review

**Grade:** The grade that the student is in

**School:** Name of Attending School

**Teacher:** Name of student's teacher

**SEDS Parental Consent Date:** Date of signed parental consent

### History/Background/Record Review

- Pertinent birth, medical, and academic history and information from student file
- Previous OT/PT Assessment results
- Progress on interventions (MTSS or OT/PT IEP goals)
- When conducting a re-evaluation, this section must include information regarding previous therapy goals and progress made/performance
- When referring to previous assessments, state the date of report/assessment, name and credentials of the examiner, findings and level of severity

### Teacher Interview

- Report information from the teacher and/or parent that is gathered from interviews, rating scales, or questionnaires to describe student's current level of functioning and support possible educational impact.

### Parent Interview

- Report information from the teacher and/or parent that is gathered from interviews, rating scales, or questionnaires to describe student's current level of functioning and support possible educational impact.

### Classroom Observation

- Report information from observing the student engaged in tasks or activities related to the area of concern within the classroom setting.
- Indicate the type of class/setting student was observed in along with their participation and engagement in the tasks.
- Be sure to address information as it pertains to motor skills, self-regulation, attention and focus, etc.

### Assessment Protocol

- List of formal and informal assessment procedures used in completing the assessment

**IEE Results**

- Include assessment result information from the IEE for each area of communication addressed. The information included should be informal and formal assessment information.
- This section should also include test findings and interpretation of the scores from the reviewing related service provider
- For each formal or informal assessment result, an educational impact statement must be included. The educational impact statement answers the question of how the student should perform based on the results of the assessment.

**Additional Assessment Data**

- In the event additional assessment data is required, this section will include formal/informal assessment information for the additional testing completed
- Descriptions of what the test/subtest measured
- Description of what the tasks were supposed to do to indicate the skill
- Results and the interpretation of the standard/scaled scores for each test and/or subtest given
- Qualitative description of the student's performance. Indicate the student's strengths and weaknesses as it pertains to the student's performance on the tests and subtests
- For each formal or informal assessment result, an educational impact statement must be included. The educational impact statement answers the question of how the student should perform based on the results of the assessment.

**Summary**

- Summary of formal and informal assessment information/findings.
- Information on the educational impact of the student's abilities must be discussed.
- Impact statements must include a clear explanation including at least one specific example of how disability impacts the student's achievement in the general education setting
- If the results indicate that there are no motor/sensory impairments, then the provider must indicate that there is no potential educational impact.
- For re-evaluation reports, there must be a comparison statement regarding the current findings of the assessment report with results/performance from previous assessment reports.

**DCPS' Recommendations**

- Statements regarding eligibility and placement should defer to the MDT or IEP after all relevant data / assessments have been reviewed and discussed.
- Do not use any references to whether the student qualifies/does not qualify OR refer to the continuation/discontinuance of services OR service amount/frequency
- Strategies for teachers and parents to improve functional skills based on student needs
- The strategies must align with areas of weaknesses identified in the report
- If there were no areas of weaknesses, then the strategies should align with the referral concerns.

## I. Executive Summary

---

### A. Introduction

The District of Columbia Public Schools (DCPS) provides related services as illustrated in student's Individualized Education Plan (IEP) in accordance with federal and local law. DCPS seeks to provide consistent service delivery to meet the needs of its students and legal obligations. For this reason, **related service providers** (RSPs) must provide consistent service delivery to help students function with greater independence. Related service providers are also responsible for creating supporting documentation and acting to ensure student access to needed services. When delivery of a service is impeded, the RSP is responsible for documenting due diligence consistent with these guidelines. This document delivers the procedures necessary when a student or provider misses a service session. It also provides guidance for the procedures to follow for untimely assessments. Bolded terms will be defined in the glossary at the end of the document. For further information regarding these guidelines, please direct your question to Division of Specialized Instruction ([dcps.relatedservices@dc.gov](mailto:dcps.relatedservices@dc.gov)).

### B. Purpose

The purpose of this document is to provide guidance to related service providers (RSPs) regarding required actions for missed service sessions and untimely assessment. DCPS is required to ensure all students with disabilities receive free appropriate public education (FAPE) consistent with their individualized education program (IEP).<sup>13</sup> These guidelines clarify the roles and obligations of RSPs, identify when and by when missed related service sessions must be made up, and explain how to document missed, make-up, and attempted make-up service sessions.

Truancy is an agency-wide problem in DC Public Schools. **Truancy** is the unexcused absence from school by a minor (5-17 years of age), either with or without parental knowledge, approval, or consent. Since regular school attendance is critical to academic success, chronic truancy must be addressed<sup>14</sup>. Absences impact the number of instructional hours that a student receives and may result in failing grades, disengagement from the school environment, and ultimately, increase the likelihood of students dropping out of school. Since truant students often miss related service sessions, RSPs are uniquely situated to assist in increasing attendance and reducing truancy for special education students.

These guidelines address due diligence for service delivery to truant students and instruct RSPs on how to support truancy prevention. This document also provides necessary information for monitoring student engagement through service delivery, engaging parents in problem solving, and adhering to district reporting requirements for student attendance. RSP providers in every discipline should adhere to these guidelines and all other specialized instruction policies.

---

<sup>13</sup> See OSEP Response Letter Guidance (Mar.8 2016) available at <http://www.asha.org/uploadedFiles/advocacy/federal/idea/OSERPResponseLetterGuidance.pdf> (interpreting 34 CFR §300.101).

<sup>14</sup> 61 DCR 222

## II. Missed Related Service Sessions Scenarios and Due Diligence Procedures

---

### A. Provider Unavailable

#### 1. Provider not available for scheduled service session(s) (e.g., sick leave, annual leave, attending an IEP meeting, professional development)

When a service session(s) is missed because the provider is unavailable to deliver the service, DCPS has the following two options:

- a) The RSP will schedule a make-up service session for the missed service session(s) during the quarter in which the missed service session(s) occurred. If the missed service session(s) occurred during the last week of the quarter, it must be made up within the first week of the following quarter. This policy ensures that all relevant information will be provided in the quarterly progress report. In most cases, this is the option that should be utilized. If the RSP cannot make up the session(s) by the following quarter, he/she must notify the program manager.
- b) When the RSP absolutely cannot make up the session(s), and notifies the program manager, the program manager must assign a substitute provider to make up the missed service session(s) during the quarter in which the missed service session(s) occurred or develop an alternative option with the RSP and LEA. If the missed service session(s) occurred during the last week of the quarter, it must be made up within the first week of the following quarter.

### B. Student Unavailable

#### 1. Student in school, but not able to attend session

a) Student Attendance at School-Related Activities (e.g., field trip, assemblies): If a service session is missed because of student attendance at a school-related activity the RSP must:

- Consider the impact of the missed service session on the child's progress and performance and determine next steps to ensure the provision of FAPE. Determine whether missed session must be made up according to the following criteria:
  - If the missed service session due to the student's unavailability has caused a negative impact on the student's progress or performance, the missed session must be made up.
  - If the missed service session due to the student's unavailability has not caused a negative impact on the student's progress or performance, the missed session does not need to be made up.
- Document this determination in the **Service Log** in SEDS for that missed service session due to student unavailability and state the reason for the student's unavailability.

b) Student Refuses to Participate or Attend (e.g., verbal refusal, student is unable to be located)

When a student misses 3 service sessions because the **student refuses to participate or attend**:

- The RSP must
  - Document each missed service session.
  - Contact the teacher, attendance coordinator, and parent/guardian to determine the reason for the student's absence.
  - Document contacts, attempted contacts, and outcomes in the SEDS communication log.

- Inform the Special Education Coordinator (SEC) via email that the student was absent or refused to participate and that the information has been documented.
- Notify the LEA or case manager via email within 24 hours of the last missed service session. This notification prompts an **IEP meeting**. The LEA or case manager must convene the IEP meeting within 15 school days of the 3<sup>rd</sup> missed service session to consider the impact of the missed session on the student's progress and performance and determine how to ensure the continued provision of a **free and appropriate public education (FAPE)**. Student attendance records should be reviewed at the meeting when making the determination.
- The SEC must:
  - Contact the parent/guardian at least three times using multiple modalities (e.g., written, phone, email, and visit). One contact must be written correspondence sent by certified mail with a return receipt.
  - Notify the related service provider via email when the attempts to contact the parent are made; and
  - Document contacts with parent/guardian, attempted contacts, and outcomes in the SEDS communication log.

The parent/guardian can agree in writing that the attendance of certain IEP Team members is not necessary for this meeting depending on the member's area of curriculum or related services. In this case an *IEP Team Member Excusal Form* must be completed in SEDS. **However, the RSP for the service sessions in question must be in attendance and cannot be excused from this meeting.** If the parent/guardian cannot physically attend the IEP meeting an alternative means of participation may be used (e.g., individual or conference telephone calls).

The SEC will send a letter by certified mail with a return receipt to the parent/guardian within five business days of the IEP meeting if the parent/guardian does not want to attend the IEP meeting or fails to respond to the *IEP Meeting Invitation/Notice*.

The parent's/guardian's signature must be obtained on the IEP and/or the Prior Written Notice (PWN) before the delivery of services can be modified. The LEA or case manager is responsible for obtaining the parent's/guardian's signature on the amended IEP within 5 days of a telephone conference.

While there is no requirement to make up missed service sessions due to student absence or refusal to participate, DCPS seeks to ensure that related services are delivered despite the reason for missed service sessions. Therefore, the IEP team should consider alternative service delivery options or a change in services when a student's absence or refusal is significantly impacting service implementation as outlined above. Examples of alternative service delivery options include service delivery in the classroom, a consultation delivery model, or transition out of the current service type and replacement with different services (e.g., exit from speech/language services and increase research-based reading intervention). Appropriate alternative service delivery does not include inclusionary delivery of services (e.g., RSP attends assembly with student as part of their service session).

## C. Multiple Student Absences/Truancy and Suspension

### 1. Student absent from school and scheduled service sessions

a) Truancy with or without approval, parental knowledge, or consent) The District of Columbia Compulsory School Attendance Law 8-247<sup>15</sup> and DC Municipal Regulations Title V Ch. 21<sup>16</sup> govern mandatory school attendance and the ways schools must respond when students are truant. The Compulsory School Attendance Law states that parents/guardians who fail to have their children attend school are subject to the following:

- Truancy charges may be filed against the parent or student.
- Neglect charges may be filed against the parent.
- The parents may be fined or jailed.
- School-aged students may be picked up by law enforcement officers during school hours for suspected truancy.
- Students may be referred to Court Diversion and other community-based interventions; and
- Parents and students may be assigned community service and placed under court supervision/probation.

### 2. When a student misses a related services session because of an excused or unexcused student absence the RSP must:

- a) Speak with the teacher and Attendance Counselor / Attendance Designee to determine reason for the student's absence.
- b) Check ASPEN to provide information regarding the student's absence.
- c) Contact the student's parents, make a home phone call (*if the absence is excused, there is no need to contact the student's parents*).
- d) Document the contact with the student's guardian in the SEDS **Communication Log**.
- e) Document each missed session in an entry the Service Log in SEDS (see examples below).
  - "Attempted to provide (state related service), however (name of student) is absent per report of classroom teacher (name teacher). Per ASPEN the student's absence is excused/unexcused."
  - You may also add information received following phone call with parent/guardian. For example, "Per telephone conversation with parent (name the parent/guardian), (student's name) is absent from local school because (state the provided excuse)"; and
- f) Notify the LEA or case manager via email within 24 hours of the missed service session.

### 3. When a student misses five (5) related service sessions because of unexcused student absences the RSP must:

- a) Contact the student's parent or guardian by making a home phone call.
- b) Inform the teacher, Attendance Counselor / Attendance Designee to determine what staff has already done to address attendance concerns.

<sup>15</sup> D.C. Law 8-247, § 2(a), 38 DCR 376, D.C. Law 20-17, § 303(a), 60 DCR 9839

<sup>16</sup> 5-A DCMR § 2103

- c) Inform the LEA/Case Manager of the absences and attempts to contact the student's parent or guardian; and
- d) Document the attempts to service the student and contact the student's guardian in the SEDS Communication Log and in the Service Log.

**4. Per DCPS' Attendance Intervention Protocol, after five (5) unexcused absences:**

- a) The Attendance Counselor / Attendance Designee will mail an Unexcused Absences ASPEN letter to the student's home requesting an attendance conference.
- b) The student is referred to the Student Support Team (SST).
- c) Student, parent or guardian and appropriate school officials develop Student Attendance Support Plan to connect the family to in-school or community resources and city agencies, and to make recommendations for next steps.
- d) Follow up within 10-days to track student's progress on next steps identified in attendance conference. The SST Team will follow up with programs/resources identified for support during attendance conference to determine if student/family is participating; and
- e) A home visit must be conducted by the SST Team if the parent is not responsive to meeting request.

The Attendance Counselor / Attendance Designee or SST chair will request RSP attendance in the SST meeting. RSPs should be prepared to contribute to the development of the Student Attendance Support Plan. A decision to reduce or remove a related service from a student's IEP due to truancy should not be made without consideration from the MDT to determine whether the student's non-attendance of service sessions is a manifestation of their disability. Refer to the *DCPS Attendance Intervention Protocol* provided below for the detailed protocol.

## E. Student Suspension from School

### 1. Suspensions lasting ten (10) days or less

IDEA allows school administrators to apply short-term disciplinary removals of students with disabilities and students suspected of having disabilities for up to ten consecutive school days or ten accumulated school days throughout the course of the school year.

If a service session is missed due to a short-term disciplinary removal from school the RSP must:

- a) Consider impact of the missed service session(s) on the child's progress and performance and determine the next steps to ensure the provision of FAPE. Determine whether missed session must be made up according to the following criteria:
  - If the missed service session due to short-term suspension has caused a negative impact on the student's progress or performance, the missed session must be made up.
  - If the missed service session due to short-term suspension has not caused a negative impact on the student's progress or performance, the missed session does not need to be made up.
- b) Document this consideration in the Service Log for the missed service session(s).

## 2. Suspensions beyond ten (10) consecutive or accumulated school days

Any additional removal beyond ten consecutive school days or ten accumulated school days constitutes a change in placement for the student. Under these circumstances, the IEP team must meet to determine:

- e) The setting for the Individual Alternative Educational Setting (IAES).
- f) The services that will be provided to the student at the IAES in order for the student to meet the student's IEP goals.
- g) If additional services are necessary to ensure the misbehavior does not continue into the IAES; and
- h) How the student will continue to participate in the general education curriculum.

On the 11th day of a student's removal from school, educational services must begin at the IAES. The IDEA's procedural safeguards require that all students with disabilities who have been suspended or expelled from school still must receive a free and appropriate education, which includes services provided to the student at the IAES in order for the student to meet his or her IEP goals. RSPs must provide services in the IAES regardless of whether the incident leading to suspension was a manifestation of the student's disability.

## E. Administrative Circumstances

### 1. Student Withdrawn from ASPEN but showing in SEDS

If the school registrar has completed the steps to withdraw a student from ASPEN but the student is still showing in SEDS, the RSP must:

- a) Document the missed service session (see *Procedures for Documentation*); and
- b) Document as "student unavailable".
  - The Service Log entry must include:
  - Date student was withdrawn in ASPEN.
  - Reason for withdrawal (noted in ASPEN); and
  - Attending school if known.
- c) Continue to document the missed services until the student is no longer showing in SEDS.

## F. School Closure: School closed for holiday or emergency.

When school is not in session due to a scheduled holiday, delayed opening, or complete closure due to poor weather there is no requirement to make up the missed service session(s).

## III. Documentation for Missed and Make-Up Sessions

---

### A. Missed Service Sessions

#### 1. SEDS Service Log Procedures

For all missed service sessions, the RSP must complete the SEDS Service Log as follows:

- a) Include detailed information to identify the missed service section and the students' progress:
  - Date of missed service session.
  - Service type (e.g., student absent, student unavailable, provider unavailable, school closure).
  - Duration of service scheduled (service duration must be documented even if a student is absent; if the student receives only partial service, document the altered duration.).
  - Group size; and
  - "Progress Report" (e.g., just introduced, mastered, no progress, not introduced, progressing, regressing).
- b) Complete the "Comments" box in the SEDS Service Log:
  - Document why the service session was missed (e.g., student unavailable, student absent, provider unavailable, school closure); and
  - List action taken to ensure service delivery (e.g., contacted the parent/guardian, talked with the teacher, contacted the student).

#### 2. Documenting Missed Services if Student is Unavailable

As mentioned above, in certain cases of "student unavailable," consider and document the impact of the missed session on the child's progress and performance. If the missed session has impacted the student's progress or performance, indicate that services will be made up and include the make-up plan dates. If the missed session has not impacted the student's progress or performance, please indicate and provide supporting data.

### B. Make-Up Service Sessions

#### 1. SEDS Service Log

- a) The RSP must log all delivered or attempted make-up service sessions in the SEDS Service Log as follows:
  - Include detailed information to identify the missed service section and the students' progress:
  - Date and time of make-up service provided.
  - Service type (e.g., student absent, student unavailable, provider unavailable, school closure).
  - Duration of the service provided (if the student receives only partial service, document the altered duration).
  - Group size.
  - "Progress Report" (e.g., just introduced, mastered, no progress, not introduced, progressing, regressing).
- b) Complete the "Comments" box in the SEDS Service Log:

- Describe the session (i.e., “MAKE UP SERVICE SESSION for Missed Session on XX/XX/XXXX”).
- Record progress note standards for service sessions delivered; and
- List action taken to ensure service delivery (e.g., notified the parent/guardian of the make-up service session dates(s)).

## C. Make-Up Service Session Attempts

### 1. SEDS Procedures for Session Attempts

The RSP is required to attempt to make up a service session three times. All attempts at make-up service sessions should be documented in SEDS as follows:

- a) Any failed attempt prior to the third scheduled make-up session should be logged in the SEDS Communication Log, including:
  - Attempted date and time of service session; and
  - Which attempt it was (e.g., first, second, third, etc.).
- b) Upon the third failed attempt the scheduled missed make-up service session should be logged in the SEDS Service Log indicating:
  - Attempted date and time of service session.
  - Service type (e.g., student absent, student unavailable, provider unavailable, school closure).
  - Which attempt it was (e.g., first, second, third).
  - Duration of service attempted (number of minutes or zero minutes).
  - Group size; and
  - “Progress Report” (e.g., just introduced, mastered, no progress, not introduced, progressing, regressing).
- c) When documenting the third failed attempt, complete the “Comments” box in the SEDS Service Log:
  - Describe the session (i.e., “MAKE UP SERVICE SESSION for Missed Session on XX/XX/XXXX”); and
  - List action taken to ensure service delivery (e.g., contacted parent/guardian, talked with the teacher, contacted the student).
- d) After three attempts have been made and documented in an effort to make up the missed service session(s) and DCPS has exercised due diligence, attempts to implement a make-up session for the missed session(s) can be discontinued.

## IV. Untimely Assessments Scenarios and Due Diligence Procedures

---

The purpose of these Guidelines is to provide guidance when assessments are not conducted in a timely manner due to the student's absence, truancy, or refusal to participate or attend, lack of or withdrawal of parental consent for evaluation/reevaluation, or incomplete assessment.

### A. Student Unavailable

#### 1. Parent/Guardian Consent is Granted but the Student is Frequently Absent, Truant, and/or Refuses to Participate or Attend

When 2-3 attempts to assess are unsuccessful because the student is absent, truant and/or refuses to participate or attend:

- a) The Related Service Provider (RSP) assigned to complete the assessment must:
  - Contact the teacher, attendance coordinator, and parent/guardian to determine the reason for the student's absence.
  - Document the reason for the student's absence for each time a scheduled assessment is missed.
  - Reschedule the assessment with the parent/guardian and document the agreed upon session in the SEDS communication log; and
  - Document contacts, attempted contacts, and outcomes in the SEDS communication log.
  - Inform the Special Education Coordinator (SEC) via email that the student was absent or refused to participate and that the information has been documented.
- b) The SEC must:
  - Contact the parent/guardian at least three times using multiple modalities (e.g., written communication via letter, phone call, and email message when available). One contact must be written correspondence sent by certified mail with a return receipt.
  - Notify the related service provider via email when the attempts to contact the parent are made; and
  - Document contacts with parent/guardian, attempted contacts, and outcomes in the SEDS communication log.
- c) The IEP Team must convene within 15 school days of the second failed attempt to assess. The Team will:
  - Review the student's attendance history since consent was obtained.
  - Consider the reason(s) for the student's absence, truancy, and/or refusal to participate or attend; and
  - Determine if an alternate assessment or schedule for the assessment may be warranted. Refer to discipline program guidebooks for the required elements of the alternative assessment report.

The parent/guardian and DCPS can agree in writing that the attendance of certain IEP Team members is not necessary for this meeting depending on the member's area of curriculum or related services; allowing a partial team to meet to address this particular situation. **However, the related service provider assigned to that assessment MUST be in attendance.** If the parent/guardian cannot physically attend the IEP meeting, an alternative means of participation may be used such as teleconference or virtual communication tools such as Skype.

The SEC will send a letter by certified mail with a return receipt to the parent/guardian within five business days of the IEP meeting if the parent/guardian does not want to attend the IEP meeting or fails to respond to the *IEP Meeting Invitation/Notice*.

## 2. No Parent/Guardian Consent for Initial Evaluation

If the parent/guardian fails to respond to the *Parent/Guardian Consent to Initial Evaluation/Reevaluation* within 15 school days, the SEC must:

- a) Contact the parent/guardian at least three times using multiple modalities (e.g., letter, phone, email when information is available). Importantly, RSP shall not if contact information is wrong or unavailable in the communication log after each attempt to access parent/guardian contact information. One contact must be written correspondence sent by certified mail with a return receipt.
- b) Document contacts, attempted contacts, and outcomes in the SEDS communication log.
- c) Send a Prior Written Notice (PWN) by certified mail with a return receipt to the parent/guardian indicating that the special education process has stopped. At this point, DCPS is no longer obligated to pursue consent or conduct assessments; and
- d) Contact the cluster supervisor via email if he/she feels it is necessary to pursue the consent to evaluate. DCPS may elect to proceed to mediation and/or a due process hearing in order to override the lack of consent for assessment.

# Appendices

## Appendix A: DC Public Schools Attendance Intervention Protocol

**\*\*Connect-Ed calls to absent students occurs daily ONLY when absence is recorded the same day as absence\*\***

| # OF ABSENCES                | SCHOOL ACTION  | DISTRICT ACTION  | LEGAL ACTION   |
|------------------------------|--|--|--|
| 1 & 2<br>(Total)             | a. Teacher calls home<br>➤ Teachers should inform Attendance Counselor (AC)/ Designee (AD) of any contact attempted/made with parent and on non-working phone numbers.   | a. **Connect-Ed calls to absent students (occurs daily)**  |  |
| 3<br>(Unexcused)             | a. AC/AD mails <b>3-Day Unexcused Absences</b> Attendance Notice STARS letter and mails to student's home (elementary and middle school and educational center students only).   | a. Connect-Ed call from Chancellor   |  |
| 5<br>(Total)                 | a. AC/AD mails <b>5-Day Total Absences</b> Attendance Notice STARS letter and mails to student's home.<br>➤ AC/AD submits 5-day letter to nurse to:<br>✓ Check for the Universal Health Form<br>✓ Contact family<br>✓ Develop Individual Health Plan for students (i.e. Asthma Action Plan)  |  |  |
| 5 (Unexcused) & MPD Pick-ups | a. AC/AD mails <b>5-Day Unexcused Absences</b> STARS letter to the student's home requesting an attendance conference<br>b. Student is referred to the Student Support Team (SST)<br>c. Determine and document root cause of absences and intervention in STARS<br>➤ Student, parent/guardian and appropriate school officials develop <b>Student Attendance Support Plan</b> to connect the family to in-school or community resources and city agencies, and to make recommendations for next steps<br><b>**Follow up within 10-days to track student's progress on next steps identified in attendance conference. Document submission to OYE in STARS adhoc field</p>   | <p>a. OYE will approve and send court referral to OAG/CSS</p> <p>b. OYE will monitor court referral compliance rate</p>                       |   |
| 16+<br>(Unexcused)  | a. Continue to monitor student's progress and modify Student Support Plan  |   |  |
| 20*<br>(Unexcused Consecutive)                            | <p>b. AC/AD mails letter to student's home to notify parent/guardian that the student is eligible to be withdrawn from school</p> <ul style="list-style-type: none"> <li>➤ School must have executed all the above interventions before withdrawal</li> </ul>  | a. Attendance Specialists will review list of students that have been withdrawn and will refer dropped students to Student Placement Team     |  |

**Additional Instructions for MPD Drop-offs**

1. Student goes to designated office to sign in
2. AC/AD documents time of entry in adhoc MPD field in STARS
3. AC/AD contacts student's parent/guardian to inform them of MPD pick up
  - a. Print and send STARS MPD Pick Up letter requesting a meeting within 5 days of pick up
4. AC/AD convenes **Attendance Conference** with parent/guardian to develop Student Support Plan

## Appendix B: Glossary

---

### **Communication Log**

Tab in SEDS where all communications with parents should be documented in detail. Log entries should include date, mode of outreach (i.e., phone call, email), summary of communication, and parent response.

### **FAPE (Free Appropriate Public Education)**

Public education special education and related services that a) are provided at public expense, under public supervision and direction, and without charge; b) meet the standards of the SEA, including the requirements of this part; c) include an appropriate preschool, elementary school, or secondary school education in the State involved; and d) are provided in conformity with an individualized education program (IEP)" (34 CFR 300.17).

### **IEP Meeting**

A written statement for each child with a disability that is developed, reviewed, and revised in a meeting that includes a) a statement of the child's present level of academic achievement and functional performance; b) a statement of measurable annual goals, including academic and functional goals; c) a description of how the child's progress toward meeting the annual goals will be measured; d) a statement of the special education and related services and supplementary aids and services to be provided to the child and a statement of the program modifications or supports or school personnel that will be provided to the child; e) a statement of any individual appropriate accommodations that are necessary to measure the academic achievement and functional performance of the child on assessments; and f) the projected date for the beginning of the services and modifications and the anticipated frequency, location, and duration of those services and modifications.

### **Related Service Providers (RSPs)**

Related Service Providers (RSPs) provide wrap-around services for students. These positions include speech-language pathologists, social workers, school psychologists, and school counselors, etc.

### **Service Log**

Tool in SEDS where all services (including those provided, missed, attempted, and made-up) should be documented in detail. Log entries should include date, duration of session, and summary of session.

### **Truancy**

The unexcused absence from school by a minor (5-17 years of age), either with or without parental knowledge, approval, or consent.

# Electronic Signature

DISTRICT OF COLUMBIA  
PUBLIC SCHOOLS

## QUICK REFERENCE GUIDE

### Adding Signature & Uploading Assessments in SEDS

#### Scan Your Signature to Email

1. Using a Blank Sheet of Paper – Sign your Signature to the sheet of paper.
2. Go to a copy/fax machine with scanning capabilities. Scan the document.
3. Enter the destination email. ex. Janice.Joplin@dc.gov
4. Once the scanned signature has been received in email. Save it as a JPG or Picture file.

**Note**

The fax or copier must have scanning capabilities.

#### Adding Your Signature to Documents

1. Open your document or assessment in Microsoft Word.
2. Go to the signature line of the document.

Direct instruction in the rules that govern spelling is an important way to help Darryl improve his spelling. Teaching spelling rules, such as adding endings to words with a silent e (e.g. take, taking), or adding a suffix to closed syllables ending in a single consonant (e.g., fit, fitting), as well as building knowledge about root words and affixes, gives Darryl a means to spell words without relying solely on memorizing how words look.

The five-step spelling strategy is an effective, multisensory approach to improving spelling performance. The strategy should be taught explicitly to insure that Darryl understands the strategy and can implement it independently. A cue card presenting the five steps of the strategy is provided to the student. The five steps are (1) Say the word, (2) Write and say the word, (3) Check the spelling, (4) Trace and say the word, and (5) Write the word from memory and check it.

Explicit instruction in the mechanics of writing may improve Darryl's fluency with writing tasks. His writing fluency may improve if he can spell words phonetically, can spell high-frequency sight words correctly, and has legible writing. In addition, when Darryl's focus is on the ideas being expressed rather than on the underlying basic skills, the quality of his writing improves.

*Janice Joplin*

Signature of Provider

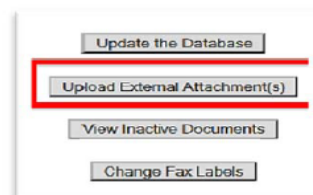

3. Click Insert Picture.
4. Select the file containing your signature and Click Insert.

#### Upload Document in SEDS

**Note**

The Upload Document feature can be accessed from both the documents tab and the associated section of SEDS.

1. Click on the Documents tab and scroll to the bottom of the page.
2. Click on the Upload External Attachment(s).

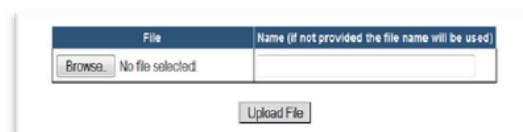

3. Click the button next to the document you want to associate a file with

Upload Attachments for Uke Eyewalker

Permitted file extensions are: PDF, DOC, XLS, TXT, RTF, PPT, TIF, JPG, PNG, XLSX, PPTX, and DOCX. No file may be greater than 2.00 MB in size.

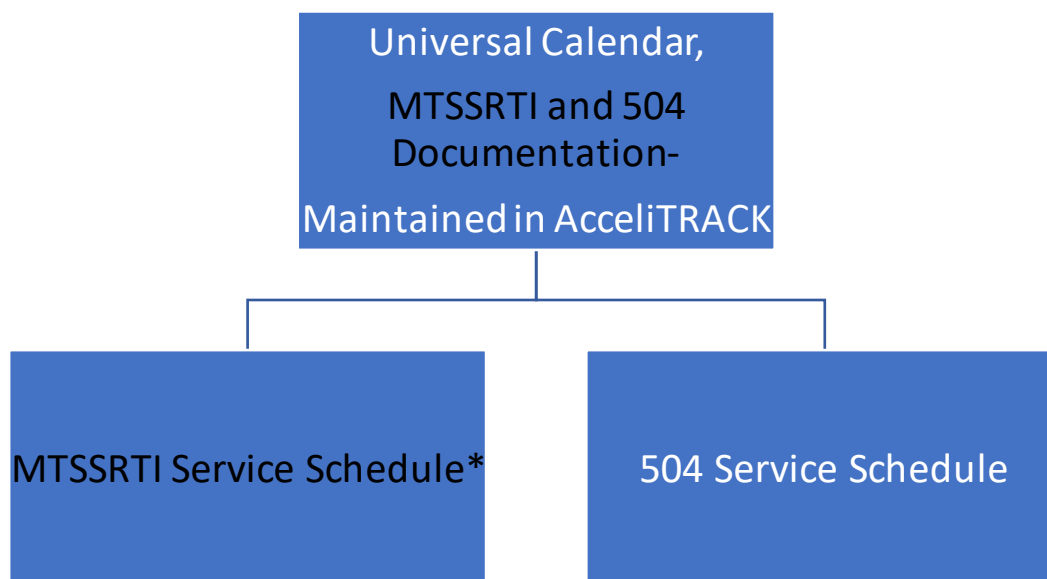

| Doc ID  | Date Generated | Document   |
|---------|----------------|--|
| 2243240 | 12/16/2013     | Transportation Criteria Cover Sheet                            |
| 2243151 | 12/06/2013     | Disability Worksheet - Multiple Disabilities - Revised 2011    |
| 2243152 | 12/06/2013     | Disability Worksheet - Autism Spectrum Disorder - Revised 2011 |

4. Scroll to the bottom of the page and browse to locate the document.
5. Click the Upload File button.

Please note the acceptable file types for upload are: PDF, DOC, XLS, TXT, PPT, TIF, JPG, XLSX, PPTX and DOCX.

## Frontline Documentation Requirements for DSI RSPs

### Universal Calendar (Based on Provider Scope of Work)

- Required for DSI RSPs assigned to central office teams (NPU, CIEP, ECAT, Bilingual)
- Create template and copy standing appointments and activities forward each week
- Record notes in activities and service lines by COB each Monday

### RTI Service Schedule

RTI/RTI service lines must be created in RTI AcceliPLAN (following workflow events) to be added to provider caseload to drag and drop onto TRACK calendar.

- Providers should create a service line for students to whom they are assigned in the Aspen RTI Plan.
- Providers should create a service line if you are meeting a general education student for more than 3 times for ongoing intervention (intermittent contacts with a student should be recorded in the “student activity” screen).

RTI

504 Service Schedule

- Add “Create Service” in the TRACK Calendar by clicking onto the day/time of service. A 504 Service Detail screen will appear.
- Document the service log notes in corresponding fields
- Record delivery status

RTI

For How-To instructions of system functionality, browse knowledgebase articles at [support.acceliplan.com](https://support.acceliplan.com).

## DC DOH License

*Providers should maintain an updated copy of their DC Department of Health license in Frontline.*

### Adding/Editing a License

- From the home screen, go to the AcceliTrack drop-down, and select Administrative Tools, then License Manager.
- From the License Manager, select the  icon.
- To create a new License, click  and fill out all required fields on the Provider Certificate Details form and click .
- To upload a license, click , select the desired file, and then click .
- Edit your licenses by clicking the  icon.
- Delete your license by clicking the  icon.

Note: You can also access the License Manager from the Toolbox tab in the Administrative Tools section.

## DCPS Data System User Security Pledge - Frontline

---

I will have access to confidential student data provided by the District of Columbia Public Schools (DCPS) via the Frontline system. I understand that access to this confidential data carries with it the responsibility to maintain the confidentiality of such data in a secure fashion, including the duty to guard against any unauthorized use and unauthorized access.

To treat information as confidential means not to divulge it to or cause it to be accessible by any unauthorized person. To secure confidential data means to take all necessary precautions to prevent unauthorized persons from accessing such data.

I agree to fulfill my responsibility under this security pledge as follows:

1. I agree not to permit unauthorized access to these sensitive data, either electronically or in hard copy.
2. I agree to notify DCPS if there is a breach of data confidentiality as outlined in this pledge.
3. I agree to follow all DCPS policies and procedures governing the confidentiality and security of DCPS data in any form, either electronic or in hard copy.
4. I agree that I will not access, release or share confidential data except as necessary to complete my project duties or role responsibilities.
5. I agree that I will use all reasonable means to protect the security of confidential data in my control, and to prevent it from being accessed or released, except as permitted by law.
6. I agree that when my affiliation/employment with DCPS ends, I will not take any confidential data with me, and I will not reveal any confidential data I had access to as a result of my role/responsibilities.
7. I agree to report unauthorized use or disclosure of confidential data, or security issues impacting the proper safeguard of confidential data to DCPS immediately.

***I understand that disclosing confidential data directly, or allowing unauthorized access to such data, or failing to adequately secure data may subject me to criminal prosecution and/or civil recovery and may violate the code of research ethics, District of Columbia laws and DCPS rules and regulations.***

Y I agree to the terms and conditions of use. E-Signature \_\_\_\_\_
