DCPS Pocket Budget Guide

New Tools & Resources for Fiscal Year 2021
School Budget Planning
What You Need to Know

On average, DCPS schools are receiving an 8 percent budget increase for Fiscal Year 2021 (FY21).

School budgets are designed to meet our shared priorities of great schools; equity and transparency; and post-secondary success. The FY21 budget builds off our progress and expands key investments for students and families, including:

$2.1 million to Connected Schools to provide wraparound services, including wellness and behavioral health supports, housing, childcare, and financial assistance referrals.

Continuing a multi-million technology investment to help reach a 1:1 student to device ratio with grades 4, 7, 10. They join grades 3, 6, 9 on the path to cover grades 3-12 by 2022.

$500,000 for early literacy intervention programs to help reach our goal of every K-2 student reading at grade level by 2022.
What You Need to Know

Initial fiscal year 2021 (FY21) budget allocations for each school are available online at [dcpsdatacenter.com](http://dcpsdatacenter.com).

Over the next few weeks, your **Local School Advisory Team** (LSAT) — comprised of both school staff and family members — will work together to guide key budget decisions based on school-level priorities. Principals also have the option to petition around flexibility in their budget.

Then, **school principals** will submit the next fiscal year budgets to DCPS central office, so the entire district budget can go to the DC Council for approval.

LSAT meetings are open to anyone interested in attending in an observer capacity. **Contact your school principal or LSAT Chair** to learn about upcoming meetings at your school.
Students and families also benefit from services provided by city agencies, targeted grants, DCPS central office, and community partnerships.
School Budgets 101

1. **Enrollment Projections**
   DCPS provides each school with an expected student enrollment count for the following year.

2. **Initial Funding Amount**
   This allocation is based on each school’s unique population and is determined by the Comprehensive Staffing Model, non-personnel costs, and additional funding opportunities available.

3. **School Budget Development**
   School principals and their Local School Advisory Team (LSAT) gather input from their community to build a budget that covers required positions and make decisions on flexible spending areas.

4. **Review and Approval**
   DCPS compiles and submits all school budgets, along with that of the central office, to the Mayor, which goes into the overall DC budget for council approval.
FY21 Planning Tools

DCPS is committed to increasing transparency and engagement around our budget and helping you understand how school funds are allocated.

Year-To-Year Budget Notes

DCPS Sample's initial FY21 formula allocation is $10M. This is a decrease of $250K compared to last year. School budgets are primarily driven by two key factors: enrollment and unique student need. In 2019-20, DCPS Sample's projected enrollment was 500. For FY20-21, their projected enrollment is 530, an increase of 30 students. At the same time, due to a decrease in the number of students receiving special education services with more intensive needs, two self-contained special education classrooms at DCPS Sample are no longer required, resulting in a decreased allocation of staff members and overall formula allocation, compared to last year.

High School Comprehensive Staffing Model Allocation

The table below provides a detailed accounting of the resources initially allocated to this school.

Levels of Flexibility Key

Level 1 (L1): Required - These allocations cannot be adjusted.

Level 2 (L2): Flexible with Petition - Principals may petition to reprogram the allocation and must demonstrate how they will meet related programmatic requirements, as applicable.

Level 3 (L3): Flexible - These allocations are optional and may be budgeted at the principal's discretion.
